**COMMONWEALTH OF PUERTO RICO**  
**Financial Information and Operating Data Report**  
**October 18, 2013**

**INTRODUCTION**

**General**

The financial and operating information about the Commonwealth of Puerto Rico (the “Commonwealth” or “Puerto Rico”) included in this Report has been updated as of June 30, 2013, except as otherwise provided herein. The Commonwealth’s fiscal year runs from July 1 through June 30 of the following year. References in this Report to a particular fiscal year are to the year in which such fiscal year ends.

**Forward-Looking Statements**

The information included in this Report contains certain “forward-looking” statements. These forward-looking statements may relate to the Commonwealth’s fiscal and economic condition, economic performance, plans, and objectives. All statements contained herein that are not clearly historical in nature are forward-looking, and the words “anticipates,” “believes,” “continues,” “expects,” “estimates,” “intends,” “aims,” “projects,” and similar expressions, and future or conditional verbs such as “will,” “would,” “should,” “could,” “might,” “can,” “may,” or similar expressions, are generally intended to identify forward-looking statements.

These statements are not guarantees of future performance and involve certain risks, uncertainties, estimates, and assumptions by the Commonwealth that are difficult to predict. The economic and financial condition of the Commonwealth is affected by various financial, social, economic, environmental, and political factors. These factors can be very complex, may vary from one fiscal year to the next, and are frequently the result of actions taken or not taken, not only by the Commonwealth and its agencies and instrumentalities, but also by entities such as the government of the United States of America or other nations that are not under the control of the Commonwealth. Because of the uncertainty and unpredictability of these factors, their impact cannot, as a practical matter, be included in the assumptions underlying the Commonwealth’s projections.

The projections set forth in this Report were not prepared with a view toward complying with the guidelines established by the American Institute of Certified Public Accountants with respect to prospective financial information, but, in the view of the Commonwealth’s officers responsible for the preparation of such information, were prepared on a reasonable basis, reflect the best currently available estimates and judgments, and present, to the best of such officers’ knowledge and belief, the expected course of action and the expected future financial performance of the Commonwealth. However, this information is not fact and should not be relied upon as being necessarily indicative of future results, and readers of this Report are cautioned not to place undue reliance on the prospective financial information. Neither the Commonwealth’s independent auditors, nor any other independent auditors, have compiled, examined, or performed any procedures with respect to the prospective financial information contained herein, nor have

they expressed any opinion or any other form of assurance on such information or its achievability and disclaim any association with the prospective financial information. Neither the Commonwealth's independent auditors, nor any other independent auditors, have been consulted in connection with the preparation of the prospective financial information set forth in this Report, which is solely the product of the Commonwealth, and the independent auditors assume no responsibility for its content.

## **Recent Developments**

### *Adoption of Comprehensive Reform of Commonwealth Employees Retirement System and Decision by the Commonwealth Supreme Court Upholding the Constitutionality of Act 3*

On April 4, 2013, the Governor signed into law Act 3-2013 ("Act 3"), which adopted a comprehensive reform of the Employees Retirement System of the Commonwealth of Puerto Rico and its instrumentalities ("Employees Retirement System"), the largest of the three public retirement systems that are funded primarily with budget appropriations from the Commonwealth's General Fund.

Prior to the enactment of Act 3, it was anticipated that (i) the net assets of the Employees Retirement System would have been depleted during fiscal year 2014 and that its gross assets, which do not take into consideration the liability relating to the outstanding pension bond obligations of the Employees Retirement System, would have been depleted by fiscal year 2019, and (ii) the cash funding shortfall during the period between fiscal year 2019 and fiscal year 2043 would have totaled, on average, \$905 million per year, which the Commonwealth and the other participating employers would have been required to contribute. With the enactment of Act 3, the gradual increase in the statutory employer contribution rates enacted in 2011 and the additional annual contributions from the participating employers (which include the municipalities and certain public corporations) required by Act 32-2013 ("Act 32") to be made from fiscal year 2014 through fiscal year 2033, it is projected that the gross assets of the Employees Retirement System will no longer be depleted. This additional contribution (which will be approximately \$120 million in fiscal year 2014) will be determined on an annual basis based on actuarial studies to be performed by the Employees Retirement System's actuaries.

On June 24, 2013, the Puerto Rico Supreme Court upheld the constitutionality of Act 3 after it was challenged in several lawsuits brought by participants of the Employees Retirement System.

For more information regarding Act 3 and the financial condition of the Commonwealth retirement systems, see "RETIREMENT SYSTEMS."

### *Federal Government Shutdown*

Certain programs and operating expenses of the Commonwealth of Puerto Rico and its instrumentalities are funded by the federal government. The approved budget for Fiscal Year 2014 includes approximately \$6.5 billion in federal funding for diverse programs, primarily directed at the social welfare of the population, including nutrition, health care and housing assistance.

On October 1, 2013 the United States Government commenced an organized shutdown of many of its operations due to the absence of legislative appropriations to maintain the federal government funded. The Commonwealth believes, based on guidance issued by federal sponsoring agencies, discussions with the United States Office of Management and Budget, and internal contingency planning, that federal spending authority for the operation of federal programs for the Commonwealth, combined with federal and state carryover, surplus or current fiscal year funding, is sufficient for the continued, uninterrupted operation of federal programs for the month of October. However, the Government's ability to forecast the budgetary or liquidity impact of the federal government shutdown beyond the month of October is limited.

At this point, the Commonwealth's ability to forecast the budgetary or liquidity impact of the federal government shutdown beyond the month of October is limited. However, due to the relatively high reliance on federal funding and the effect of federal funding reimbursement cycles, the Commonwealth may be disproportionately affected by an extended delay in the approval of the necessary federal legislative appropriations.

#### *New Revenue Raising Measures for the Commonwealth's General Fund*

The current Commonwealth administration, which came into office in January of 2013, has sponsored the enactment of various tax laws designed to generate additional revenues to allow the Commonwealth to meet its obligations and reduce its fiscal deficit.

In February 2013, the Commonwealth amended Act 154-2012 ("Act 154"), which imposes an excise tax on the acquisition of certain manufacturing products produced and services rendered in Puerto Rico, in order to extend the effective period of the excise tax until December 31, 2017 and reset the excise tax rate to a fixed 4% commencing on July 1, 2013. It is projected that for fiscal year 2014, revenues from Act 154 will amount to \$1.956 billion and constitute approximately 20.5% of the total revenues of the General Fund. See "Major Sources of General Fund Revenues-Act 154" under PUERTO RICO TAXES, OTHER REVENUES AND EXPENDITURES.

In June 2013, the Commonwealth made significant changes to many of its tax laws to broaden the tax base and increase its revenues. These included: the increase of certain income taxes and the limitation of certain deductions applicable to corporations; an increase in the taxes paid by self-employed professionals; a limitation on mortgage interest deductions; a moratorium on certain tax credits; an increase in the excise tax on cigarettes and other tobacco derivatives; an additional 1% tax on insurance underwriting premiums; the imposition of the sales and use tax on certain business to business transactions; the elimination of certain exemptions to the sales and use tax on purchases made by certain entities; and the elimination of the resellers certificate exempting resellers from paying sales and use tax on their purchasers and its substitution with a new credit system for such taxes paid.

For more information on the new tax laws, see "Major Sources of General Fund Revenues" under PUERTO RICO TAXES, OTHER REVENUES AND EXPENDITURES.

## *New Revenue Raising Measures for Public Corporations*

The current administration has taken steps to help certain public corporations become self-sufficient entities capable of operating without budgetary subsidies or deficit financings from the GDB.

On July 15, 2013, the Puerto Rico Aqueduct and Sewer Authority (“PRASA”) implemented a sixty percent water rate increase (on average) that is expected to allow the corporation to cover all of its expenses and debt service. The rate increase is projected to increase operating revenues for fiscal year 2014 by approximately \$344 million, or 44%, over fiscal year 2013. For fiscal year 2015 and beyond, the increase in operating revenues is projected at \$444 million (as compared to fiscal year 2013), as the rate adjustment will cover an entire fiscal year. Further water rate increases are not expected to be necessary at least until fiscal year 2017. As a result, in contrast to prior years, the Commonwealth does not anticipate having to appropriate funds to PRASA for its operational expenses.

On June 25, 2013, the Commonwealth enacted Act 30-2013 (“Act 30”) and Act 31-2013 (“Act 31”) to provide approximately \$270 million in additional revenues to the Puerto Rico Highway and Transportation Authority (“PRHTA”). Pursuant to these laws, (i) PRHTA will receive the motor vehicle license fee revenues received in prior fiscal years by the Commonwealth Treasury Department, which currently amount to approximately \$62.5 million per year (for the avoidance of doubt, such amount was not included as revenue in the budget for fiscal year 2014), (ii) the tax on petroleum products received by PRHTA was increased from \$3.00 per barrel to \$9.25 per barrel, which is currently estimated to result in approximately \$189 million in additional annual revenue, and (iii) PRHTA will receive the first \$20 million in annual cigarette excise tax revenues collected by the Commonwealth Treasury Department. The new revenues have allowed PRHTA to begin repaying its outstanding lines of credit with the GDB and provide additional revenues to fund operational expenses.

### *New COFINA Legislation*

On October 9, 2013, the Governor signed into law legislation to increase from 2.75% to 3.50% the portion of the Commonwealth sales and use tax transferred to the Sales Tax Financing Corporation (“COFINA”) and expand the permitted uses of COFINA bond proceeds to, among others, refinance Bond Anticipation Notes (“BANs”) and other lines of credit used to help finance the Commonwealth’s deficit for fiscal years 2013 and 2014. Bonds issued by COFINA are currently the most cost effective source of long term financing available to the Commonwealth.

For more information regarding COFINA, see “Other Public Corporations-*Sales Tax Financing Corporation*” under PUBLIC CORPORATIONS.

### *Implementation of Universal Health Care Access*

On September 30, 2013, the Governor of Puerto Rico notified the Secretary of the United States Department of Health and Human Services (“HHS”) that the Commonwealth had elected not to implement a Health Insurance Exchange pursuant to the provisions of the Patient Protection

and American Affordable Care Act (“ACA”). Instead, the Commonwealth will implement a new affordable health care plan for individuals who do not qualify for the existing “Mi Salud” public health insurance program. The new program will allow individuals with income levels of \$10,000 to \$25,000 per year to qualify for a new subsidized health insurance plan (“UAP”). The newly eligible beneficiaries would receive Essential Health Benefits, as defined by ACA, at the “Bronze” level. While the monthly fee for the UAP would be fully covered by funds from the Commonwealth Health Insurance Services Administration (“PRHIA”), the beneficiary would contribute approximately 40% of the cost of coverage through deductibles, copayments and other cost-limiting or sharing mechanisms. PRHIA estimates that the per-member cost of the new plan, due to differences in coverage and cost sharing-arrangements, would be approximately 55% lower than for beneficiaries of Mi Salud.

The funding for the UAP would be obtained by raising the Medicaid poverty income eligibility level from \$400 per month to \$550 per month. This would cause approximately 76,000 current beneficiaries of Mi Salud that are currently covered 100% with PRHIA funds to become eligible for Medicaid federal reimbursement. Based on these estimates, the required replenishment or renewal date for ACA funds would move forward from March 2019 to January 2019. For additional information regarding the Commonwealth’s compliance with the ACA see “Health Insurance Administration – PRHIA” under PUBLIC CORPORATIONS).

*Preliminary General Fund revenues and expenses for the first three months of fiscal year 2014*

*Revenues.* Preliminary General Fund revenues for the first three months of fiscal year 2014 (July, August and September of 2013) were \$1,698.8 million, an increase of \$88.0 million, or 5.4%, from \$1,610.8 million in revenues for the same period in the prior fiscal year. These revenues are approximately \$10.4 million, or 0.6%, more than the revenues of \$1,688.4 million budgeted for the first three months of fiscal year 2014.

Preliminary sales and use tax collections for the first three months of fiscal year 2014 were \$305.3 million, an increase of \$15.9 million, or 5.5%, from the sales and use tax collections \$289.4 million for the first three months of the prior fiscal year. These sales tax collections are approximately \$4.7 million, or 1.6%, more than the sales tax collections of \$300.6 million budgeted for the first three months of fiscal year 2014.

*Expenses.* Payroll expenses chargeable to the Commonwealth’s General Fund payroll accounts for the first three months of the 2014 fiscal year, totaled \$583.9 million, equivalent to \$33 million or 5.3% below the same period for the prior fiscal year. With respect to the approved fiscal year 2014 budget, the first three months were \$3.6 million or 0.6% under budget. The decrease in payroll expenses is principally attributed to the increased rate of attrition produced by the enactment of Act 3.

For the months of July, August and September, the Office of Management and Budget (“OMB”) estimates that General Fund actual expenses were in line with the budgeted appropriations. In terms of year-end forecast, however, the Department of Education has estimated overspending, if uncorrected, based on hiring that occurred in August for the beginning of the school year. As a result, OMB has implemented short term hiring control measures which include

a hiring freeze, on-site OMB employees, and a direct veto at the system level of payroll additions. In addition, with OMB support, the Department of Education has prepared a corrective action plan that includes quantified, substantial measures in the payroll, transportation, security and services accounts. OMB believes that such plan, combined with the use of a carry forward reserve, application of contingency account appropriations, surpluses from other agencies, would neutralize the initially estimated overspending projection, and that no General Fund overspending forecast is currently warranted.

### *Offset of Federal Funds*

In April 2011, the Commonwealth received a notification from the United States Army Corps of Engineers (“USACE”) establishing the Commonwealth’s share of the construction costs of the Cerrillos Dam and Reservoir and the Portuguese-River and Bucana-River Projects and the repayment schedule therefor. According to USACE’s notification, the Commonwealth’s allocated share of construction costs plus accrued and projected interest through June 30, 2046 amounted to approximately \$598 million. The USACE notification also required the payment of \$190.6 million in accordance with such repayment schedule. On October 10, 2012, due to nonpayment of this amount, the USACE placed this debt into the United States Treasury Department Offset Program. As a result, the United States Treasury Department withheld \$157.8 million in federal funds through May 13, 2013, which funds would have otherwise been directed to certain Commonwealth agencies and instrumentalities, and offset them against the moneys owed to USACE.

On May 15, 2013, the Secretary of the Treasury of the Commonwealth requested the USACE an immediate stay of the Offset Program and the waiver of certain penalties. The Secretary also proposed a new payment plan consisting of 32 annual payments of \$7.08 million and a final payment of \$6.97 million in 2046, for a total of \$233.5 million, including interest. This payment, together with the \$157.8 million previously withheld from the Commonwealth would amount to a total payment of \$391.3 million.

Although the requested stay of the Offset Program was granted, the Commonwealth has yet to be notified that its offer has been accepted. The Commonwealth is confident that a final agreement with respect to this matter will be reached soon.

### *Outstanding short term financings*

As of October 10, 2013, the Commonwealth and its instrumentalities had entered into the following short term financings payable between December 1, 2013 and August 28, 2015, all of which are intended to be refinanced with long-term financings if market conditions allow:

- (i) the Commonwealth has approximately \$543 million outstanding in BANs, \$400 million due on December 1, 2013 and \$143 million due on December 31, 2013, the net proceeds of which were used to repay previous financings from the GDB and to refinance Commonwealth debt;
- (ii) GDB has sold to certain commercial banks participations in certain lines of credit extended by the GDB to the Commonwealth, which participations have an

outstanding balance of approximately \$243 million and are due on December 31, 2013;

- (iii) Puerto Rico Highways and Transportation Authority has \$400 million outstanding in BANs, the net proceeds of which were used to repay amounts owed under various GDB lines of credit, and which are due between December 1, 2014 and September 1, 2015;
- (iv) COFINA has approximately \$333 million outstanding in BANs issued to complete the funding for the Commonwealth's operating budget for fiscal year 2013, which mature on September 30, 2014; and
- (v) Puerto Rico Infrastructure Financing Authority has approximately \$96.8 million outstanding in revenue bonds due on November 15, 2013 (originally due in June 2013), which were sold in a private placement. Such bonds are secured by a standby GDB note due on December 15, 2013, guaranteed by the Commonwealth.

The Commonwealth and its instrumentalities believe that they have various financing alternatives, including the rollover of certain of these financings, in the event that GDB determines that market conditions are not favorable for the issuance of long-term debt.

In addition, as of October 11, 2013, the Commonwealth has \$1.2 billion outstanding in Tax and Revenue Anticipation Notes ("TRANS"), which include \$300 million in revolving TRANS purchased by the GDB and which are payable from income taxes collected during the current fiscal year. Certain of the Commonwealth's agencies and instrumentalities may enter into other short-term financings in the ordinary course of business to finance working capital and other short-term needs.

#### *Ratings of Certain Commonwealth Bonds*

On October 3, 2013, Moody's Investors Service ("Moody's") affirmed its rating of "Baa3" on the Commonwealth's general obligation bonds and maintained its negative outlook. On March 20, 2013, Fitch, Inc. lowered its rating on the Commonwealth's general obligation bonds from "BBB+" to "BBB-" with a negative outlook. On March 13, 2013, Standard & Poor's Rating Services ("S&P") lowered its rating on the Commonwealth's general obligation bonds from "BBB" to "BBB-" with a negative outlook.

On October 3, 2013 Moody's lowered its rating on the Commonwealth's COFINA Sales Tax Revenue Bonds, Senior Series from "Aa3" to "A2", and affirmed its rating on the Commonwealth's COFINA Sales Tax Revenue Bonds, First Subordinate Series at "A3". Moody's changed its outlook on both COFINA Senior Series Bonds and First Subordinate Series Bonds from stable to negative. On September 30, 2013, S&P maintained the current ratings of "AA-" and "A+" on the Commonwealth's COFINA Sales Tax Revenue Bonds Senior Series and First Subordinate Series, respectively, and lowered its outlook from stable to negative for such bonds.

The ratings and outlooks described above reflect only the opinions of such rating agencies and an explanation of the significance of such ratings may be obtained only from the relevant rating agency.

## **Overview of Economic and Fiscal Condition**

### *Economic Condition*

*Gross National Product.* Puerto Rico's economy is closely linked to the United States economy; around 71% of Puerto Rico's exports go to the United States and 42% of the imports come from the United States. In recent fiscal years, however, the performance of Puerto Rico's economy has not been consistent with the performance of the United States economy. Puerto Rico's economy entered a recession in the fourth quarter of fiscal year 2006. For fiscal years 2007, 2008, 2009, 2010 and 2011 Puerto Rico's real gross national product contracted by 1.2%, 2.9%, 3.8%, 3.6% and 1.6%, respectively, while the United States real gross national product grew at rates of 1.7% and 2.5% during fiscal years 2007 and 2008, respectively, contracted by 3.4% during fiscal year 2009, and grew by 0.5% and 2.5% during fiscal years 2010 and 2011. For fiscal year 2012 Puerto Rico's gross national product grew by 0.1%, while the United States' gross national product grew by 2.1%. According to the Puerto Rico Planning Board's latest projections, made in April 2013, it is projected that Puerto Rico's real gross national product for fiscal year 2013 decreased by 0.4%. Puerto Rico's real gross national product for fiscal year 2014 is currently forecasted to grow by 0.2%. The Planning Board is expected to publish a new forecast in October 2013.

*Employment.* According to the Household Survey, total employment fell by 1.1% in fiscal year 2012 and by 0.6% in fiscal year 2013. The unemployment rate for fiscal year 2012 and for fiscal year 2013 was 15.2% and 14.0%, respectively. According to the Establishment Survey, total payroll employment grew by 0.8% in fiscal year 2012 and fell by 0.7% in fiscal year 2013. For the first two months of fiscal year 2014 year-over-year total payroll employment decreased by 4.2%, while total employment according to the Household Survey for the same period decreased by 2.3%. The Household Survey figures were recently revised significantly to adjust them to the results of the population census of 2010.

*Economic Activity Index.* For fiscal year 2013, the Government Development Bank–Economic Activity Index (the "EAI") showed a year-over-year reduction of 0.9%, compared to fiscal year 2012. The EAI for August 2013 reflected a 5.4% reduction compared to August 2012. The average cumulative value for the eight months of calendar year 2013 (January to August 2013) showed a reduction of 3.7% compared to the same period of 2012. The EAI is a coincident indicator of ongoing economic activity but it does not measure the real GNP annual growth rates. Since the EAI is generated with only four variables, it is more volatile than the real GNP figures. This means that both increments and declines reflected in the EAI amplify the corresponding movements of the real GNP. For a more detailed discussion of the EAI, see "General" under THE ECONOMY. The employment figures of the Establishment Survey were revised in March 2013 by the Bureau of Labor Statistics as part of the annual benchmark revision and such revision changed considerably the intra-annual behavior of the EAI for fiscal year 2012. For example, the latest benchmark revision added 18,400 jobs, which represented an increase of nearly 2% from what had

been previously reported for 2012 (previous changes did not reach the magnitude of 1%). This major revision could be related to the higher economic activity from public works due to the electoral cycle. The payroll employment revision had two major effects; it raised the employment base for 2012 and, therefore, it accentuates the employment reductions observed in 2013. Moreover, the recent changes in the Employees Retirement System resulted in more retirements of state and local employees. Approximately 40% of the total payroll employment reductions experienced from June to August corresponded to decreases in state and local government employment.

### *Fiscal Condition*

Since 2000, the Commonwealth has faced a number of fiscal challenges, including an imbalance between its General Fund revenues and expenditures. This imbalance reached its highest historical level of \$2.864 billion in fiscal year 2009, when revenues were \$7.825 billion and expenditures were \$10.689 billion. Since then, the Commonwealth has been able to reduce its deficit every year, except fiscal year 2012, through various measures designed to increase revenues and reduce expenses. For fiscal year 2013, according to preliminary results, the Commonwealth was able to reduce the deficit to \$1.290 billion. The budget for fiscal year 2014 contemplates a further reduction of the deficit to \$820 million, which will be financed by a refinancing of \$575 million of general obligation debt service payments and \$245 million of new borrowings. Although the Commonwealth continues to pursue deficit reduction policies, the Commonwealth's ability to continue to reduce its deficit will depend in part on its ability to continue increasing revenues and reducing expenditures, which in turn depends on several factors, including improvements in economic conditions.

The table below shows total revenues from taxes, licenses and other internal or external sources (which does not include financing proceeds), total expenditures (including debt service payments) and the resulting deficit for the last five fiscal years. Total revenues and expenditures include certain non-recurring revenues and expenditures from temporary measures. Accordingly, the amount of the Commonwealth's "structural deficit," or the difference between recurring revenues and expenditures, is higher than the amount shown below. Depending on what revenues and expenditures are considered "recurring," such difference may be significant.

Revenues include (i) total revenues of the General Fund (shown in footnote 1), (ii) revenues from the electronic and traditional lotteries (shown in footnote 2) that are available to the General Fund, and (iii) revenues from the 1.03% property tax collected by the Municipal Collections Revenue Center (shown in footnote 2) which by law must be used to pay general obligation bonds of the Commonwealth. Other revenues may also be included as indicated in the footnotes to the table.

Expenditures include (i) total expenditures of the General Fund (shown in footnote 6), (ii) the transfer of rental payments made by the Commonwealth to the Public Buildings Authority for properties leased by the Government (shown in footnote 7), (iii) debt service payments for the Commonwealth's general obligation bonds (shown in footnote 8), and (iv) debt service payments for the Commonwealth appropriation bonds (shown in footnote 8). The totals for items (ii) and (iii) include debt service of \$159.6 million, \$517.8 million, \$638.7 million, \$839.8 million and

\$884.79 for fiscal years 2009, 2010, 2011, 2012 and 2013, respectively, on the Commonwealth's general obligation bonds and the Commonwealth-guaranteed bonds of Public Buildings Authority refinanced through the issuance of refunding bonds.

**Deficit**  
Fiscal Years ended June 30,  
(in millions)

<u>Fiscal Year</u>	<u>Total Revenues</u> <sup>(1) (2)</sup>	<u>Total Expenditures</u> <sup>(6)(7)(8)</sup>	<u>Deficit</u>
2009	\$7,825	\$10,689 <sup>(9)</sup>	\$(2,864)
2010	\$8,032 <sup>(3)</sup>	\$10,756 <sup>(10)</sup>	\$(2,724)
2011	\$8,343 <sup>(4)</sup>	\$10,144	\$(1,801)
2012	\$8,783	\$11,158	\$(2,375)
2013*	\$8,697 <sup>(5)</sup>	\$9,987	\$(1,290)

\*Preliminary and unaudited; subject to change.

<sup>(1)</sup> Includes General Fund total revenues of \$7.583 billion, \$7.593 billion, \$7.994 billion, \$8.573 billion and \$8.198 billion for fiscal years 2009, 2010, 2011, 2012 and 2013, respectively, as presented in the "Statement of Revenues and Expenditures- Budget Basis- General Fund" in the Comprehensive Annual Financial Report ("CAFR") of the Commonwealth (except for fiscal year 2013 revenues which are preliminary and unaudited).

<sup>(2)</sup> Includes (i) revenues attributable to the electronic and traditional lotteries of \$126.7 million, \$122.8 million, \$101.9 million, \$94.0 million and \$63.2 million for fiscal years 2009, 2010, 2011, 2012 and 2013, respectively, and (ii) revenues from the 1.03% property tax of \$115.2 million, 114.7 million, \$122.2 million, \$116.0 million and \$117.0 million for fiscal years 2009, 2010, 2011, 2012 and 2013, respectively.

<sup>(3)</sup> Includes \$201.0 million from the sale of securities in the Puerto Rico Infrastructure Authority corpus account.

<sup>(4)</sup> Includes approximately \$125.3 million of moneys transferred to the General Fund during fiscal year 2011 from the Puerto Rico Sales Tax Financing Corporation, consisting principally of Sales and Use Tax Collections remaining after providing debt service on its bonds for that fiscal year.

<sup>(5)</sup> Includes (i) \$240 million in excess funds transferred from the Redemption Fund to the General Fund and (ii) \$78 million of excess funds transferred from the Puerto Rico Sales Tax Financing Corporation to the General Fund.

<sup>(6)</sup> Includes General Fund total expenditures of \$9.927 billion, \$9.640 billion, \$9.075 billion, \$9.911 billion and \$8.723 billion for fiscal years 2009, 2010, 2011, 2012 and 2013, respectively, as presented in the "Statement of Revenues and Expenditures- Budget Basis- General Fund" in the CAFR for each fiscal year (except for fiscal year 2013 expenditures which are preliminary and unaudited).

<sup>(7)</sup> Includes the transfer of rental payments made by the Commonwealth to the Public Buildings Authority for properties leased by the Government of \$330.4 million, \$250.7 million, \$267.1 million, \$331.0 million and \$383.0 million, for fiscal years 2009, 2010, 2011, 2012 and 2013, respectively.

<sup>(8)</sup> Includes (i) debt service for general obligation bonds of \$413.6 million, \$865.3 million, \$801.8 million, \$849.0 million and \$865.0 million for fiscal years 2009, 2010, 2011, 2012 and 2013, respectively, and (ii) debt service for appropriations bonds of \$18.0 million, \$66.9 million and \$15.8 million for fiscal years 2009, 2012 and 2013, respectively.

<sup>(9)</sup> Does not include approximately \$442 million of non-recurring expenses related to prior fiscal years, which have been included as part of total expenditures for fiscal year 2009 in the Fiscal Condition section of prior Commonwealth Reports.

<sup>(10)</sup> Does not include approximately \$50 million of non-recurring expenses related to prior fiscal years, which have been included as part of the total expenditures for fiscal year 2010 in the Fiscal Condition section of prior Commonwealth Reports.

Source: Commonwealth of Puerto Rico Comprehensive Annual Financial Report, Department of the Treasury and Government Development Bank.

The Commonwealth has undertaken various initiatives with a view to reduce and eventually eliminate the deficit restore sustainable economic growth and safeguard the investment-grade ratings of the Commonwealth general obligation bonds.

The current administration, which commenced its term in January 2013, implemented the following measures to increase revenues and reduce the deficit for fiscal year 2013: (i) an initiative that resulted in the collection of \$235 million in advance payments of non-resident withholding tax related to manufacturing patents; (ii) the transfer of \$240 million in excess funds in the Redemption Fund to the General Fund; (iii) the implementation of a tax amnesty program which encouraged taxpayers with older tax liabilities to pay such obligations, which resulted in immediate cash collections of \$98 million and payment plans for an additional \$176 million; and (iv) the elimination of \$140 million in projected excess expenditures. These and other measures reduced the projected deficit for fiscal year 2013 from a January 2013 estimate of \$2.213 billion to a June 30, 2013 estimate of \$1.290 billion.

On June 30, 2013, the Commonwealth legislature approved a budget for fiscal year 2014 that reduces to \$820 million the General Fund deficit for such year by enhancing the revenue base of the General Fund and reducing reliance on deficit financing and debt service restructurings. The estimated \$820 million deficit for fiscal year 2014 constitutes a reduction of approximately 36% from the deficit for fiscal year 2013 (\$1,290 million), and a reduction of approximately 65% from the deficit for fiscal year 2012 (\$2,375 million). For additional information regarding the current administration's fiscal stabilization measures see "Fiscal Stabilization" under THE ECONOMY.

Prior administrations have also sought to address the budget deficit through expense reduction measures and various revenue raising measures. For example, the prior Administration adopted Act No. 7-2009 ("Act 7"), which included (i) a reduction in payroll, which is the main component of government expenditures, and other expenses, and the reorganization of the Executive Branch; (ii) a combination of revenue raising measures and additional tax enforcement measures; and (iii) certain financial measures.

In fiscal year 2009, the Commonwealth allocated an additional portion of its sales and use tax to the Puerto Rico Sales Tax Financing Corporation ("COFINA") in order to issue revenue bonds to repay debt and finance operating expenses. As of June 30, 2013, COFINA had \$15.224 billion of revenue bonds outstanding.

*Budget for Fiscal Year 2014.* The approved budget for fiscal year 2014 provides for General Fund total resources and total expenditures of \$9.770 billion. General Fund resources include \$245 million in deficit financing and \$575 million in general obligation debt service refinancing.

The principal changes in the fiscal year 2014 budgeted central Government revenues compared to fiscal year 2013 preliminary results are accounted mainly by the projected collections from sales and use taxes (up \$312.2 million attributed mostly to the elimination of various exemptions to the application of sales and use taxes), corporate income tax (up \$836.5 million), withholding taxes on non-residents (down \$162.9 million), excise taxes on motor vehicles and

accessories (up \$21.2 million), projected increases in excise tax under Act 154 (up \$278.8 million), and personal income taxes (up \$8.7 million).

The budget for fiscal year 2014 provides for General Fund total expenditures of \$9.770 billion, which include \$3.384 billion for education, \$1.388 billion for health, \$437 million for welfare, \$1.562 billion for public safety and protection, and \$3 billion for other expenses.

The approved budget expenditures for fiscal year 2014 represent an increase of \$687 million when compared to the budget for fiscal year 2013. The main changes are incremental retirement system contributions of \$202 million, primarily attributed to the pension reform adopted pursuant to Act 3; incremental appropriations for debt service, including principal and interest, of \$292 million; incremental appropriations of \$77 million to the University of Puerto Rico pursuant to legislation restoring the prior UPR appropriation formula; incremental appropriations to the Department of Education of \$121 million; and a net reduction of \$4 million in appropriations for all other General Fund expense items. These figures include as debt service a \$40 million appropriation relating to the assumption by the Commonwealth of existing municipal obligations payable from the sales and use tax.

The budget increase of \$121 million for the Department of Education was intended to partially offset the unavailability for fiscal year 2014 of certain non-recurring sources of funds which covered recurring expenses in fiscal year 2013; these include a \$105 million carryforward surplus reserve and a decline, estimated at the time of budget configuration, of \$80 million in available federal funding, both from from lower balances in applicable federal funds surplus reserves and cuts in the Federal Fiscal Year 2014 Budget proposed by the President.

The current budget includes non-General Fund sources to cover contingencies (including lawsuits), technology projects and capital improvements. These include a \$100 million future debt issuance for the Capital Improvements Fund; a \$100 million appropriation for the Science and Technology Fund to be funded from the proceeds of a special 50% tax imposed on a \$200 million dividend distribution to be made by the consortium of insurance companies that provide mandatory car insurance; and a \$96.5 million appropriation for the Budgetary Support Fund funded by contributions from accumulated surplus in certain public corporations and surplus balances in special state funds accumulated from revenue-producing activities by Commonwealth central government agencies. OMB considers that out of the \$296.5 million in appropriations just described, approximately \$60 million represents ongoing recurring programs or administrative costs of the Commonwealth.

For more information regarding the budget for fiscal year 2014, see “Budget for Fiscal Year 2014” under BUDGET OF THE COMMONWEALTH OF PUERTO RICO.

*Preliminary Results for Fiscal Year 2013.* Preliminary General Fund total revenues for fiscal year 2013 are expected to be approximately \$8.697 billion. This total includes (i) \$8.502 billion in General Fund revenues (consisting of \$8.198 billion of operating revenues, \$63.2 million of revenues from the electronic and traditional lotteries that are available to the General Fund, and \$240 million in excess funds transferred from the Redemption Fund), (ii) \$117 million of revenues

from property taxes that are available to pay general obligation bonds, and (iii) \$78 million of excess funds transferred from COFINA.

Preliminary General Fund total expenses for fiscal year 2013 are expected to be approximately \$9.987 billion, consisting of \$8.723 in operating expenditures, \$383 million in PBA rental payments and \$880.8 million of other financing uses (mostly debt service). These expenditures include \$775 million of debt service payments on the Commonwealth's general obligation bonds and Commonwealth guaranteed PBA bonds which were expected to be refinanced (but which are included in the deficit projected for fiscal year 2013). This represents a decrease of \$1.17 billion in expenditures from fiscal year 2012.

Expenditures for fiscal year 2013 are based on preliminary budget accounting results. The final settlement for certain agencies that have autonomous accounting systems, including the synchronization with the central accounting system and the final reconciliation with payroll, has not occurred. However, the Office of Management and Budget does not anticipate an aggregate overdraft versus appropriations for fiscal year 2013.

Certain recurring expenses for fiscal year 2013 were funded from non-General Fund sources, including a \$105 million carry-forward surplus reserve from prior years from the Department of Education, and \$31 million in excess sick-leave liquidations for the Puerto Rico Police.

*Results for Fiscal Year 2012.* General Fund total revenues for fiscal year 2012 were \$8.783 billion. This total includes (i) \$8.668 billion in General Fund revenues (consisting of \$8.573 billion of operating revenues and \$94.0 million of revenues from the electronic and traditional lotteries that are available to the General Fund) and (ii) \$116 million of revenues from property taxes that are available to pay general obligation bonds. This represents an increase of \$440 million, or 5.3%, from fiscal year 2011. The increase in General Fund revenues for fiscal year 2012, compared to fiscal year 2011, was mainly due to an increase of approximately \$1.2 billion in excise tax revenues under Act 154 which was in effect for its first full fiscal year. This increase was partially offset by a decrease in income taxes of approximately \$353 million and a decrease of approximately \$200 million from the expiration of the special property tax.

General Fund total expenses for fiscal year 2012 amounted to \$11.158 billion, consisting of \$9.911 billion of operating expenditures, \$331 million in rent payments to the PBA, and \$915.9 million of other financing uses (mostly debt service). These expenses were \$1.014 billion, or 10%, higher than the total expenses for fiscal year 2011. The difference between revenues and expenses for fiscal year 2012 of \$2.375 billion was covered with the proceeds from COFINA bonds of \$952 million, \$839.8 million of debt restructuring, and other financing sources including lines of credit from the GDB payable from appropriations.

*Results for Fiscal Year 2011.* General Fund total revenues for fiscal year 2011 were \$8.343 billion. This total includes (i) \$8.158 billion in General Fund revenues (consisting of \$7.994 billion of operating revenues and \$101.9 million of revenues from the electronic and traditional lotteries that are available to the General Fund), (ii) \$122.2 million of revenues from property taxes that are available to pay general obligation bonds, and (iii) \$125.3 million of excess funds

transferred from COFINA. This represents an increase of \$311 million, or 3.9%, from fiscal year 2010.

The increase in General Fund total revenues for fiscal year 2011, compared to fiscal year 2010, were mainly due to an increase of \$170.1 million in tax withholdings from non-residents and the collection of \$677.6 million as a result of the new temporary excise tax and the expansion of the taxation of certain foreign persons adopted in Act 154 as part of the tax reform (discussed below under “2011 Tax Reform”), which the Government began collecting in February of 2011. This increase was partially offset by a decrease of \$406.5 million in collections from income tax on individuals as a result of such tax reform and current economic conditions.

General Fund total expenses for fiscal year 2011 were \$10.144 billion, consisting of \$9.075 billion of operating expenditures, \$267 million in PBA rental payments and \$801.8 million of other financing uses (principally debt service payments). Total expenditures of \$10.144 billion exceeded General Fund total revenues by \$1.801 billion, or 21.6%. The difference between revenues and expenses for fiscal year 2011 was covered principally from proceeds of COFINA bonds.

*Results for Fiscal Year 2010.* General Fund total revenues for fiscal year 2010 were \$8.032 billion. This total includes (i) \$7.716 billion in General Fund revenues (consisting of \$7.593 billion of operating revenues and \$122.8 million of revenues from the electronic and traditional lotteries that are available to the General Fund), (ii) \$114.7 million of revenues from property taxes that are available to pay general obligation bonds, and (iii) \$201.0 million from the sale of securities of the Puerto Rico Infrastructure Financing Authority corpus account. This represents an increase of \$207 million, or 2.6%, from fiscal year 2009. The increase in General Fund revenues for fiscal year 2010, compared to fiscal year 2009, was mainly due to \$227 million from the special temporary property tax.

Total expenditures for fiscal year 2010 were \$10.756 billion (which included \$173 million of expenditures related to a Commonwealth stimulus program); consisting of (i) \$9.640 billion of operating expenditures, (ii) \$250.7 million in PBA rental payments and (ii) \$865.3 million of general obligations debt service payments. Total expenditures exceeded General Fund total revenues by \$2.724 billion, or 33.9%. The difference between revenues and expenses for fiscal year 2010 was covered principally by proceeds from a COFINA bond issue.

## **Geographic Location and Demographic Trends**

Puerto Rico, the fourth largest of the Caribbean islands, is located approximately 1,600 miles southeast of New York City. It is approximately 100 miles long and 35 miles wide.

According to the United States Census Bureau, the population of Puerto Rico was 3,725,789 in 2010, compared to 3,808,610 in 2000. The population of San Juan, its capital and largest city, was 381,931 in 2010, compared to 434,374 in 2000.

## **Relationship with the United States**

Puerto Rico came under United States sovereignty pursuant to the Treaty of Paris, signed on December 10, 1898, which ended the Spanish-American War. Puerto Ricans have been citizens of the United States since 1917. In 1950, after a long evolution toward greater self-government, Congress enacted Public Law 600, authorizing Puerto Rico to draft and approve its own Constitution, guaranteeing a republican form of government. The Constitution was drafted by a popularly elected constitutional convention, approved in a special referendum by the people of Puerto Rico, amended and ratified by the United States Congress, and subsequently approved by the President of the United States.

The United States and the Commonwealth share a common defense, market and currency. The Commonwealth exercises virtually the same control over its internal affairs as do the 50 states. It differs from the states, however, in its relationship with the federal government. The people of Puerto Rico are citizens of the United States but do not vote in national elections. They are represented in Congress by a Resident Commissioner that has a voice in the House of Representatives but no vote (except in House committees and sub-committees to which he belongs). Most federal taxes, except those such as Social Security taxes, are not levied in Puerto Rico. No federal income tax is collected from Puerto Rico residents on income earned in Puerto Rico, except for certain federal employees who are subject to taxes on their salaries. Income earned by Puerto Rico residents from sources outside of Puerto Rico, however, is subject to federal income tax.

The official languages of Puerto Rico are Spanish and English.

## **Governmental Structure**

The Constitution of Puerto Rico provides for the separation of powers of the executive, legislative, and judicial branches of government. The Governor is elected every four years. The Legislative Assembly consists of a Senate and a House of Representatives, the members of which are elected for four-year terms. The highest court within the local jurisdiction is the Supreme Court of Puerto Rico. Decisions of the Supreme Court of Puerto Rico may be appealed to the Supreme Court of the United States under the same conditions as decisions from state courts. Puerto Rico constitutes a District in the federal judiciary and has its own United States District Court. Decisions of this court may be appealed to the United States Court of Appeals for the First Circuit and from there to the Supreme Court of the United States.

Governmental responsibilities assumed by the central government of the Commonwealth are similar in nature to those of the various state governments. In addition, the central government assumes responsibility for local police and fire protection, education, public health and welfare programs, and economic development.

## **Principal Officers Responsible for Fiscal Matters**

*Alejandro J. García Padilla* was sworn in as Governor of Puerto Rico on January 2, 2013. From 2009 until becoming Governor, Mr. García Padilla served as an elected senator in the Senate

of the Commonwealth of Puerto Rico. Prior to that, Mr. García Padilla was an attorney in the private sector. From 2005 to 2007, Mr. García Padilla was Secretary of the Commonwealth's Department of Consumer Affairs. Mr. García Padilla was a professor at the School of Law of the Inter American University of Puerto Rico from 2000 to 2002. Mr. García Padilla clerked for the Commonwealth's Court of Appeals from 1997 to 1999. He holds a bachelor's degree in Political Science and Economy from the University of Puerto Rico and a Juris Doctor from the Inter American University School of Law.

*Melba Acosta Febo* was designated Secretary of the Treasury Department effective January 2, 2013 and confirmed by the Senate of the Commonwealth on February 25, 2013. Ms. Acosta was subsequently also appointed on March 1, 2013 as Chief Public Financial Officer of the Commonwealth of Puerto Rico. Before these appointments, Ms. Acosta was Director of OMB and Chief Information Officer from 2001 to 2004, and Chief of Staff of the Municipality of San Juan from 1997 to December 2000. In the private sector, Ms. Acosta worked as an attorney with McConnell Valdés from 1995 to 1997 and from 2010 to 2012. She served as Executive Vice President, Chief Operating Officer, and Chief Financial Officer of RG Financial Corporation and its bank subsidiary, RG Premier Bank, from 2004 to 2010. In addition, she served as Tax Consultant with Price Waterhouse from 1988 to 1990. Ms. Acosta is a certified public accountant and an attorney-at-law. She holds a bachelor's degree in Accounting from the School of Business Administration of the University of Puerto Rico, an MBA from the Harvard Graduate School of Business Administration and a Juris Doctor from the School of Law of the University of Puerto Rico. She is a member of the Boards of Directors of the Puerto Rico Art Museum, the Luis Muñoz Marín Foundation and GDB. Previously, she was a member of the Board of Directors of United Funds.

*Carlos D. Rivas Quiñones* was appointed Director of OMB in January of 2013. Mr. Rivas returned to public service after having been General Manager of UPM Group and Principal with Advent Morro Equity Partners. Prior to his tenure with UPM Group, he was Executive Director of the Puerto Rico Housing Finance Authority from 2005 to 2008. Mr. Rivas' private sector experience includes serving as an associate with McKinsey & Company and with Davis Polk & Wardwell. Mr. Rivas' experience in public service includes serving as a Deputy Advisor on Economic Development and as Executive Aide to the Governor and the Chief of Staff, focusing on public finance, economic development and budget issues. Mr. Rivas holds a law degree from Stanford University and a bachelor's degree in Economics from Princeton University.

*José V. Pagán Beauchamp* was designated Acting President of the Government Development Bank for Puerto Rico on July 17, 2013. At the time of his appointment, he was Executive Vice President for Financing a position he has held since July 1, 2013. Immediately before that he had been Senior Advisor to the President since January 22, 2013. Mr. Pagán Beauchamp has worked in the areas of public and private financing, investment banking, corporate finances, accounting, insurance, financial consulting and project management. During his professional career he previously held key executive positions in investment banks, municipal bond underwriters, insurance companies and consulting firms, such as: Citibank, Salomon Smith Barney, The First Boston Corporation, MAPFRE, Ernst & Whinney, and Truenorth. In public service, he previously served as GDB Senior Executive Vice President for Financing from 2001 to 2002, and Executive Vice President for Financing in 1992. In academia, he worked as Director of

the Business Administration Department of the Sacred Heart University. Mr. Pagán Beauchamp holds an M.B.A. in Finance from the New York University Graduate School of Business Administration, a B.A. in Engineering and Applied Sciences from Yale University, as well as a master's degree in Computer Science from the Polytechnic University of Puerto Rico.

### Political Trends

For many years, there have been two major views in Puerto Rico with respect to Puerto Rico's relationship with the United States: one favoring commonwealth status, represented by the Popular Democratic Party, and the other favoring statehood, represented by the New Progressive Party. The following table shows the percentages of the total votes received by the gubernatorial candidates of the various parties in the last five elections. While the electoral choices of Puerto Rico's voters are not based solely on party preferences regarding Puerto Rico's relationship with the United States, candidates who support a continued relationship between Puerto Rico and the United States have prevailed in elections for many years.

	<u>1996</u>	<u>2000</u>	<u>2004</u>	<u>2008</u>	<u>2012</u>
Popular Democratic Party	44.5%	48.6%	48.4%	41.3%	47.7%
New Progressive Party	51.1%	45.7%	48.2%	52.8%	47.1%
Puerto Rico Independence Party	3.8%	5.2%	2.7%	2.0%	2.5%
Others, Blank or Void	-	0.5%	0.6%	3.9%	2.6%

With the results of the 2012 election, the Popular Democratic Party gained control of the Executive Branch and the Legislative Branch. The current membership of the Senate and House of Representatives by political party is as follows:

	<u>Senate</u>	<u>House</u>
Popular Democratic Party	18	28
New Progressive Party	8	23
Puerto Rico Independence Party	1	0
Total	<u>27</u>	<u>51</u>

The next general election (gubernatorial, municipal and legislative) in Puerto Rico will be held in November 2016.

## THE ECONOMY

### General

Puerto Rico's economy experienced a considerable transformation during the second half of the twentieth century, from an agriculture-based economy to an industrial one. Factors contributing to this transformation included government-sponsored economic development programs, major tax incentives, increases in the level of federal transfer payments, and the relatively low cost of borrowing. During some of these years, these factors were aided by a significant rise in construction investment driven by infrastructure projects, private investment, primarily in housing, and relatively low oil prices.

In more recent years, the continuous contraction of the manufacturing sector, partially due to the long-term effects of the end of the federal tax incentives under Section 936 of the U.S. Internal Revenue Code, significant oil price increases, and the budgetary pressures on government finances, have resulted in a general contraction in the economy.

Puerto Rico's economy entered a recession in the fourth quarter of fiscal year 2006. For fiscal years 2007, 2008, 2009, 2010 and 2011, the real gross national product contracted by 1.2%, 2.9%, 3.8%, 3.6% and 1.6%, respectively. For fiscal year 2012, preliminary reports indicate that the real gross national product grew by only 0.1%. The Puerto Rico Planning Board currently projects a decrease in real gross national product of 0.4% for fiscal year 2013 and an increase of 0.2% for fiscal year 2014. The Planning Board's forecast for fiscal year 2014 took into account the estimated effect of the projected growth of the United States economy, tourism activity, personal consumption expenditures, federal transfers to individuals and an increase of investment in construction. The Planning Board is expected to publish a revision of this forecast in October 2013.

In fiscal year 2012, aggregate personal income was \$62.3 billion (\$59.4 billion in 2005 prices) and personal income per capita was \$16,934 (\$15,995 in 2005 prices). Personal income includes transfer payments to individuals in Puerto Rico under various social programs. Total United States federal transfer payments to individuals amounted to \$16.0 billion in fiscal year 2012 and \$15.6 billion in fiscal year 2011. Entitlements for previously performed services or resulting from contributions to programs such as Social Security, Veterans' Benefits, Medicare, and United States Civil Service retirement pensions were \$11.3 billion, or 70.4% of the transfer payments to individuals in fiscal year 2012 (\$10.9 billion, or 70%, in fiscal year 2011). The remainder of the federal transfers to individuals is represented by grants, mostly concentrated in the Nutritional Assistance Program (Food Stamps) and Pell Grant scholarships (higher education).

Total average annual employment (as measured by the Puerto Rico Department of Labor and Human Resources Household Employment Survey, known as the "Household Survey") decreased during the last decade. From fiscal year 2000 to fiscal year 2013, total employment decreased at an average annual rate of 0.9%, from 1,150,291 to 1,029,019. A reduction in total employment began in the fourth quarter of fiscal year 2007 and has continued consistently through fiscal year 2013 due to the current recession and contractionary fiscal adjustment measures.

During the first two months of fiscal year 2014, total employment fell at an average rate of 2.3% as compared to the same period for the prior fiscal year. The Household Survey numbers are the numbers used for the computation of the employment and participation rates. However, the Establishment Survey numbers are the numbers used to measure employment across the various sectors of the economy. According to the Establishment Survey, payroll non-farm employment decreased by 4.2% during the first two months of fiscal year 2014. This reduction is partially attributable to attrition and to the changes to the Employees Retirement System, as approximately 40% of the total employment reductions experienced from June to August of 2013 corresponded to decreases in central and municipal government employment.

The dominant sectors of the Puerto Rico economy in terms of production and income are manufacturing and services. The manufacturing sector has undergone fundamental changes over the years as a result of the phase out of Section 936 of the United States Internal Revenue Code and an increased emphasis on higher-wage, high-technology industries, such as pharmaceuticals, biotechnology, computers, microprocessors, professional and scientific instruments, and certain high technology machinery and equipment. At the present time, almost 90% of manufacturing is generated by chemical and electronic products. The service sector, which includes finance, insurance, real estate, wholesale and retail trade, transportation, communications and public utilities, and other services, plays a major role in the economy. It ranks second to manufacturing in contribution to gross domestic product and leads all sectors in providing employment.

The following table shows the Puerto Rico gross national product for fiscal years 2008 through 2012, compared to the annual percentage increase in real gross national product in the United States. Note that there are some differences between the previously reported figures of Puerto Rico's gross national product and the current figures set forth below due to the recent revision of several components of the gross national product, which included changes since fiscal year 2001. Therefore, growth rates and figures before fiscal year 2001 are not wholly comparable with the amounts reported afterwards.

**Commonwealth of Puerto Rico**  
**Gross National Product**  
**Fiscal Years Ended June 30,**  
**(dollar amounts in \$ millions)**

	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012<sup>(1)</sup></b>
Gross national product (PR) (current prices) <sup>(2)</sup>	\$62,703	\$63,618	\$64,295	\$65,567	\$69,462

The economy of Puerto Rico is closely linked to the United States economy, as most of the external factors that affect the Puerto Rico economy (other than oil prices) are determined by the policies and performance of the mainland economy. These external factors include exports, direct investment, the amount of federal transfer payments, the level of interest rates, the rate of inflation, and tourist expenditures. During fiscal year 2012, approximately 70.9% of Puerto Rico's exports went to the United States mainland, which was also the source of approximately 42.6% of Puerto Rico's imports. In fiscal year 2012, Puerto Rico experienced a positive merchandise trade balance of \$12.3 billion.

The following graph compares the growth rate of real gross national product for the Puerto Rico and United States economies since fiscal year 2001, and the forecast of the growth rate for fiscal years 2013 and 2014.

Estimate for Puerto Rico from the Puerto Rico Planning Board (Apr-2013).

\*\* Estimate for U.S. from IHS-Global Insight (Sep-2013).

Sources: Puerto Rico Planning Board & IHS-Global Insight.

Since the 1950s, the Planning Board has prepared a complete set of macroeconomic measures like those prepared for the United States by the Bureau of Economic Analysis (“BEA”) of the Department of Commerce, as part of the National Income and Product Accounts (“NIPA”). In contrast with the BEA, which computes the economic accounts on a quarterly basis, the Planning Board computes Puerto Rico’s NIPA on an annual basis. Like the BEA, the Planning Board revises its statistics on a regular basis. The Planning Board classifies its statistics as preliminary until they are revised and made final in conjunction with the release of new data each year. Thus, all macroeconomic accounts for fiscal year 2012 shown in this Report are preliminary until the revised figures for fiscal year 2012 and the preliminary figures for fiscal year 2013 are released, and the forecast for fiscal year 2014 is revised.

Certain information regarding current economic activity is available in the form of the EAI, a coincident indicator of ongoing economic activity. This index, shown in the following graph and published by GDB since October 2009, is composed of several variables (total payroll employment based on the Establishment Survey, total electric power generation, cement sales and consumption of gasoline) that highly correlate to Puerto Rico’s real gross national product.

However, the EAI does not measure the real GNP annual growth rates. Since the GDB-EAI is generated with only four variables, it is more volatile than the real GNP figures. This means that both increments and declines reflected in the GDB-EAI amplify the corresponding movements of the real GNP.

The EAI for August 2013 was 123.8, a 5.4% reduction compared to August 2012. The average cumulative value for the first two months of fiscal year 2014 (July to August 2013) showed a reduction of 5.2% compared to the same period of fiscal year 2013. For fiscal year 2013, the EAI showed a reduction of 0.9%, compared to the corresponding figure for fiscal year 2012. The average growth rate of the index for fiscal year 2012 was 0.1%, after a reduction of 2.9% for fiscal year 2011. The previously published figures of this index were reflecting a slight contraction (-0.2%) for fiscal year 2012, while the current index shows a slight increase (0.1%) for the same fiscal year. This is due to a major revision on the total non-farm employment numbers recently published by the Bureau of Labor Statistics, and to the recent changes to the Employees Retirement System (see the section *Employment and Unemployment* below).

## *Economic Forecast for Fiscal Years 2013 and 2014*

In April 2013, the Planning Board released its revised gross national product forecast for fiscal year 2013 and its gross national product forecast for fiscal year 2014. The gross national product forecast for fiscal year 2013 was revised downward from a projected growth of 1.1% to a decline of -0.4%, both in constant dollars. This revision took into account the estimated effects on the Puerto Rico economy of the United States budget sequestration, the end of the federal ARRA funds, the impact of the initial phase of the tax reform, the recent initiatives to promote private employment creation, and the end of the Commonwealth stimulus plan. The revised forecast also considered the effect on the Puerto Rico economy of general and global economic conditions, the United States economy, the volatility of oil prices, interest rates and the behavior of local exports, including expenditures by visitors. The Planning Board's forecast for fiscal year 2014 projects an increase in gross national product of 0.2% in constant dollars. The Planning Board's forecast for fiscal year 2014 took into account the estimated effect of the projected growth of the United States economy, tourism activity, personal consumption expenditures, federal transfers to individuals and an increase of investment in construction. The Planning Board is expected to publish a revision of this forecast in October 2013.

According to the Household Survey, the number of persons employed in Puerto Rico during fiscal year 2013 averaged 1,029,019, a decrease of 0.6% compared to the previous fiscal year; and the unemployment rate averaged 14.0%.

### *Fiscal Year 2012*

The Planning Board's preliminary reports on the performance of the Puerto Rico economy for fiscal year 2012 indicate that real gross national product increased 0.1% (an increase of 5.9% in current dollars) over fiscal year 2011. Nominal gross national product was \$69.5 billion in fiscal year 2012 (\$48.3 billion in 2005 prices), compared to \$65.6 billion in fiscal year 2011 (\$48.3 billion in 2005 prices). Aggregate personal income increased from \$61.6 billion in fiscal year 2011 (\$50.0 billion in 2005 prices) to \$62.3 billion in fiscal year 2012 (\$49.7 billion in 2005 prices), and personal income per capita increased from \$16,611 in fiscal year 2011 (\$13,496 in 2005 prices) to \$16,934 in fiscal year 2012 (\$13,513 in 2005 prices).

According to the Household Survey, the number of persons employed in Puerto Rico during fiscal year 2012 averaged 1,035,465, a decrease of 1.1% compared to the previous fiscal year; and the unemployment rate averaged 15.2%, one percentage point below the reported rate for fiscal year 2011.

Among the variables that contributed to the small growth in gross national product were the continuous contraction of the manufacturing sector and the increase in the average price of West Texas Intermediate (WTI) oil, which went up from \$89.4 per barrel in fiscal year 2011 to \$95.0 per barrel in fiscal year 2012, an increase of 6.3%. After the financial crisis in the United States which had significant direct consequences in the local economy, the historically low interest rates have not been enough incentive to jumpstart private investment or to counteract other external factors.

## *Fiscal Year 2011*

The Planning Board's reports on the performance of the Puerto Rico economy for fiscal year 2011 indicate that real gross national product decreased 1.6% (an increase of 2.0% in current dollars) over fiscal year 2010. Nominal gross national product was \$65.6 billion in fiscal year 2011 (\$48.3 billion in 2005 prices), compared to \$64.3 billion in fiscal year 2010 (\$49.1 billion in 2005 prices). Aggregate personal income increased from \$60.0 billion in fiscal year 2010 (\$49.6 billion in 2005 prices) to \$61.6 billion in fiscal year 2011 (\$50.0 billion in 2005 prices), and personal income per capita increased from \$16,078 in fiscal year 2010 (\$13,287 in 2005 prices) to \$16,611 in fiscal year 2011 (\$13,496 in 2005 prices).

According to the Household Survey, total employment for fiscal year 2011 averaged 1,046,719, a decrease of 28,200, or 2.6%, from the previous fiscal year. The unemployment rate for fiscal year 2011 was 16.2%, a slight reduction from 16.3% for fiscal year 2010.

Among the variables contributing to the decrease in gross national product was the continuous contraction of the manufacturing and construction sectors and the increase in the average price of West Texas Intermediate (WTI) oil, which went up from \$75.2 per barrel in fiscal year 2010 to \$89.4 per barrel in fiscal year 2011, a rise of 18.9%. Although the continuation of the difficulties associated with the financial crisis kept short-term interest rates at historically low levels, such low interest rates did not translate into a significant improvement in the construction sector due in part to the high level of inventory of residential housing units.

### **Fiscal Stabilization**

During the period from 2009 to 2012, the Commonwealth sought to reduce the General Fund deficit primarily by reducing operating expenses and by enacting temporary revenue increasing measures. The Commonwealth reduced payroll expenses during this period principally through incentivized voluntary resignations and workday reduction programs, an involuntary layoff plan, and a temporary suspension of certain provisions of laws, collective bargaining agreements, and other agreements.

Notwithstanding efforts by the past administration to reduce the deficit, significant short and long-term challenges remained. When the current administration came into office the projected deficit for fiscal year 2013 was approximately \$2.213 billion, as of January 31, 2013, according to internal estimates by the Commonwealth Treasury Department. Several of the Commonwealth's largest and most important public corporations, including the Puerto Rico Aqueduct and Sewer Authority and the Puerto Rico Highway and Transportation Authority, were under severe financial strain. The net assets of the Employees Retirement System were expected to be depleted by fiscal year 2014 and it was anticipated to have an average cash funding shortfall of \$905 million per year during the period between fiscal year 2019 and fiscal year 2043.

During the past nine months, the Commonwealth has begun the implementation of a comprehensive fiscal stabilization plan (the "Fiscal Plan") in order to protect its credit and investment grade ratings. This Fiscal Plan, formulated to address the short and long-term fiscal challenges inherited by the new administration, is designed to achieve a balanced budget on or

before fiscal year 2016, turn the Commonwealth's public corporations into self-sufficient enterprises, and address structural problems that threaten the Commonwealth's long-term fiscal stability. The following is a description of the Fiscal Plan initiatives already undertaken by the new administration or to be undertaken in the next few months.

#### *Reducing the Projected Deficit for Fiscal Year 2013*

Upon taking office, the new administration faced a projected deficit of approximately \$2.213 billion as of January 31, 2013. While the budget for fiscal year 2013 originally included \$333 million in deficit financing and \$775 million in debt service restructurings, as of January 31, 2013, the Treasury Department projected a revenue shortfall of approximately \$965 million and excess spending of approximately \$140 million. The new administration implemented a corrective action plan to reduce the projected deficit for fiscal year 2013, including: (i) an initiative that resulted in the collection of \$235 million in advance payments of non-resident withholding tax related to manufacturing patents; (ii) the transfer of \$240 million in excess funds in the Redemption Fund to the General Fund; (iii) the implementation of a tax amnesty program which encouraged taxpayers with older tax liabilities to pay such obligations, which resulted in immediate cash collections of \$98 million and payment plans for an additional \$176 million; and (iv) the elimination of \$140 million in projected excess expenditures through recurring and non-recurring actions, including the freezing of accounts, transfer of non-General Fund balances to cover leave liquidations, and others. As of June 2013, the projected revenue shortfall had been reduced from \$965 million to \$247 million. The remaining shortfall is expected to be reduced or eliminated through (i) the sale of old tax receivables (\$128 million) and new tax receivables (\$199 million) and (ii) two closing agreements with pharmaceutical companies expected to be finalized in October 2013 (\$98 million).

The above measures have reduced the projected deficit for fiscal year 2013 from the January 2013 estimate of \$2.213 billion to the current estimate of \$1.290 billion as of June 30, 2013.

#### *Reducing the Deficit for Fiscal Year 2014*

On June 30, 2013, the legislature approved a budget for fiscal year 2014 that reduces to \$820 million the General Fund deficit by enhancing its revenue base and reducing reliance on deficit financing and debt service restructurings. The estimated \$820 million deficit for fiscal year 2014 constitutes a reduction of approximately 36% from the deficit for fiscal year 2013 (\$1,290 million), and a reduction of approximately 65% from the deficit for fiscal year 2012 (\$2,375 million).

As part of the efforts to close the General Fund's structural deficit, on February 28, 2013, the Commonwealth amended Act 154 to extend the duration of the excise tax until December 31, 2017 and reset the excise tax rate at a fixed 4% commencing on July 1, 2013. The excise tax was originally scheduled to apply for a period of six years (ending on December 31, 2016) and was set at 4% for calendar year 2011, declining every year until reaching 1% in 2016. For more information on Act 154, see "Major Sources of General Fund Revenues-Act 154" under PUERTO RICO TAXES, OTHER REVENUES AND EXPENDITURES.

Furthermore, the approved budget for fiscal year 2014 also contemplates revenue increases as compared to the preliminary revenues for fiscal year 2013 from sales and use taxes (up \$312.2 million attributed mostly to the elimination of various exemptions to the application of sales and use taxes), corporate income tax (up \$836.5 million), withholding taxes on non-residents (down \$162.9 million), excise taxes on motor vehicles and accessories (up \$21.2 million), projected increases in excise tax under Act 154 (up \$278.7 million), and personal income taxes (up \$8.7 million).

### *Comprehensive Reform of Employees Retirement System*

On April 4, 2013, the Governor of Puerto Rico signed into law Act 3 which adopted a comprehensive reform of the Employees Retirement System, the largest of the three public retirement systems that are funded primarily with budget appropriations from the Commonwealth's General Fund. The other two retirement systems are the Puerto Rico System of Annuities and Pensions for Teachers (the "Teachers Retirement System") and the Commonwealth Judiciary Retirement System (the "Judiciary Retirement System"). See "RETIREMENT SYSTEMS" for a description of the three retirement systems.

Act 3, which became effective on July 1, 2013, made the following changes to the Employees Retirement System: (i) it froze and grandfathered the benefits that had accrued through June 30, 2013 of those participants who were covered by the Employees Retirement System's defined benefit formula (those who joined the Employees Retirement System prior to January 1, 2000, whose retirement benefits accrued at a rate of 1.5% or 2.0% per year of creditable service) (the "Defined Benefit Employees"); (ii) beginning on July 1, 2013, the retirement benefits accruing on and after such date for Defined Benefit Employees will be calculated based on a defined contribution formula, similar to the "System 2000" formula currently applicable to employees who joined the Employees Retirement System on or after January 1, 2000, with all such benefits being paid in the form of a lifetime annuity rather than a lump sum payment (upon retirement, the employee will receive (a) the benefits accrued through June 30, 2013 based on the defined benefit formula plus (b) the contributions made by the employee after June 30, 2013); (iii) defined contribution benefits accrued pursuant to System 2000 will also be paid in the form of a lifetime annuity rather than a lump sum payment; (iv) it eliminated the so called "merit pension", which provided to participants who joined the Employees Retirement System prior to April 1, 1990 after attaining 30 years of service, a retirement benefit of 65% (if less than 55 years of age) or 75% (if age 55 or greater) of the average salary earned during the highest 36 months of employment; (v) it increased the retirement age for various groups of participants; (vi) it increased the employee contribution to the Employees Retirement System from 8.275% to 10% of compensation; (vii) it eliminated or reduced various retirement benefits previously granted by special laws; (viii) it increased the minimum pension from \$400 to \$500 per month for current retirees; and (ix) it eliminated or modified other benefits, such as disability and survivor benefits.

For many years, the financial condition of the three Commonwealth retirement systems has been one of the principal fiscal challenges facing Puerto Rico. Although certain measures had been implemented in recent years to address the recurring solvency issue of the retirement systems, such as the enactment in 2011 of a gradual increase in the statutory rate for employer

contributions to the Employees Retirement System and the Teachers Retirement System, the retirement systems were projected to run out of cash within the next ten years unless a more comprehensive reform was adopted. As of June 30, 2012, the date of the latest actuarial valuations of the three retirement systems, the unfunded actuarial accrued liability (including basic and system administered benefits) for the Employees Retirement System, the Teachers Retirement System and the Judiciary Retirement System was \$26.4 billion, \$10.3 billion and \$358.0 million, respectively, and their funded ratios were 4.5%, 17.0% and 14.1%, respectively.

Prior to the enactment of Act 3, it was anticipated that the gross assets of the Employees Retirement System would be depleted by fiscal year 2019 and that the cash funding shortfall during the period between fiscal year 2019 and fiscal year 2043 would be, on average, \$905 million per year, which the Commonwealth and the other government employers would have been required to fund on a pay-as-you-go basis. It is estimated that the Commonwealth would be responsible for approximately 74% of the combined annual funding deficiency of the three retirement systems, with the balance being the responsibility of municipalities and participating public corporations.

In addition to Act 3, to further improve the liquidity and solvency of the System, the Commonwealth enacted Act 32, which provides for incremental annual contributions from the participating employers (which includes the municipalities and certain public corporations) beginning in fiscal year 2014 and up to fiscal year 2033. This incremental contribution, which is in addition to the increase in the statutory rates of employer contributions enacted in 2011, will be determined on an annual basis based on actuarial studies to be performed by the System's actuaries. An appropriation for such additional contribution of \$120 million is included in the Commonwealth's budget for fiscal 2014. However, the accelerated pace of retirements that occurred as a result of Act 3 may require higher appropriations in the future than the one made for fiscal year 2014.

Based on current census data, expectations of market conditions and other actuarial information provided by the consulting actuaries, the changes instituted by Act 3, along with the annual contributions to be received from the Commonwealth during the next twenty years, as provided by Act 32, should be sufficient to cover the Employees Retirement System's current and future obligations.

The constitutionality of Act 3 was upheld by the Puerto Rico Supreme Court after it was challenged in several lawsuits brought by participants of the Employees Retirement System.

For more information regarding Act 3 and the situation of the Commonwealth retirement systems, see "RETIREMENT SYSTEMS."

## *Reforming the Public Corporations*

Since January 2013, significant steps have been taken to turn certain public corporations of the Commonwealth into self-sufficient entities capable of operating without budgetary subsidies from the Commonwealth or deficit financings from the GDB. Among the main measures taken are the following:

- *Puerto Rico Aqueduct and Sewer Authority (“PRASA”)*. On July 15, 2013, PRASA implemented a sixty percent water rate increase (on average) that is expected to allow the corporation to cover all of its expenses and debt service. The rate increase is projected to increase operating revenues for fiscal year 2014 by approximately \$344 million, or 44 %, over fiscal year 2013. For fiscal year 2015 and beyond, the increase in operating revenues is projected at \$444 million (as compared to fiscal year 2013), as the rate adjustment will cover an entire fiscal year. Further water rate increases are not expected be necessary at least until fiscal year 2017. As a result, in contrast to prior years, the Commonwealth does not anticipate having to appropriate funds to PRASA for its operational expenses.
- *Puerto Rico Highway and Transportation Authority (“PRHTA”)*. On June 25, 2013, the Commonwealth enacted Act 30 and Act 31 to provide approximately \$270 million in additional annual revenues to PRHTA. Pursuant to these laws, (i) PRHTA will receive the motor vehicle license fee revenues previously received by the Commonwealth Treasury Department, which currently amount to approximately \$62.5 million per year, (ii) the tax on petroleum products received by the PRHTA was increased from \$3.00 per barrel to \$9.25 per barrel, which is currently estimated to result in approximately \$189 million in additional annual revenue, and (iii) PRHTA will receive the first \$20 million in annual cigarette excise tax revenues collected by the Commonwealth Treasury Department. These new revenue measures will also allow PRHTA to repay lines of credit outstanding with the GDB and provide additional revenues to fund operational expenses.
- *Puerto Rico Ports Authority (“PRPA”)* – In February of 2013, the fiscal position of the PRPA was strengthened by the execution of a forty-year lease agreement with Aerostar Airport Holdings, LLC (Aerostar), pursuant to which Aerostar will finance, operate, maintain and improve the Luis Muñoz Marín International Airport, the busiest airport in the Caribbean. As a result of this transaction, on February 27, 2013, the PRPA received from Aerostar a lump-sum payment of \$615 million, \$402 million of which were used to retire 43% of the outstanding debt of the PRPA. The PRPA will also receive an estimated \$552 million in revenue sharing over the life of the lease.
- *Puerto Rico Electric Power Authority (“PREPA”)* – In order to ensure PREPA’s long term fiscal stability, PREPA has implemented a set of cost reduction measures that include reductions in the number of employees and healthcare benefits, limits on overtime and miscellaneous expenses, and implementing enhanced budget controls and expenses in each of three operational areas of the business. These measures, which PREPA began implementing in 2009, have resulted in recurring annual savings of

approximately \$125 million. PREPA also expects other cost reduction initiatives for fiscal year 2014, such as further reductions in overtime, materials and administrative expenses, to result in additional annual savings of approximately \$15 million. On August 21, 2013, PREPA issued \$673,145,000 in Power Revenue Bonds to fund its capital improvement program, including the continuation of the conversion to natural gas of existing oil-fired generating units, which is expected to enable PREPA to improve its operating efficiency.

### *OMB Spending Controls*

OMB maintains significant institutional spending controls including but not limited to, review of contracts for professional and purchased services at the Commonwealth agencies to ensure compliance with austerity policies and appropriation limits; authorization of individual personnel transactions for budgetary impact; and approval of several of various agency transactions with budgetary impact, such as rent or lease agreements.

Payroll expenses chargeable to the Commonwealth's General Fund for the months of July, August and September, the first three months of the 2014 fiscal year, totaled \$583.9 million, equivalent to \$33 million or 5.3% below the same period for the prior fiscal year. With respect to the approved fiscal year 2014 budget, the first three months were \$3.6 million or 0.6% under budget. However, the totality of year-over-year payroll savings does not constitute a year-to-date budget surplus on the payroll account due to contingencies and budget assumptions.

The decrease in payroll expenses has been driven by a substantial reduction in headcount due, among others, to increased attrition due to the enactment of pension reform under Act 3. Reserve contingencies of more than \$130 million have been set aside, both through legislative appropriation and OMB administrative action, in the General Fund budget to cover the liquidation of sick leave and vacation leave of the recently retired employees. These payroll figures exclude those teachers chargeable to the school wide mixed state-federal funding pool, which is not classified as payroll, whose salaries represent close to 10.5% of the General Fund budget, and whose expense accounting lags and has not transpired yet for the current fiscal year. In addition, they exclude the payroll of autonomous entities such as the University of Puerto Rico, the Judicial Branch, and other smaller agencies, which receive fixed monthly payments, totaling approximately \$1,410 million, or 14.4% of the General Fund budget. OMB expects that some retired employees, particularly those that provide direct services such as nurses and social workers, will have to be replaced over the course of the fiscal year.

### *Comprehensive Reform of Teachers Retirement System*

Act 3 did not address the underfunded condition of the Teachers Retirement System. The Commonwealth is evaluating alternatives for a comprehensive reform to the Teachers Retirement System in order to allow the system to cover all of its future obligations as they become due while eliminating the projected pay-as-you go burden of the system on the General Fund. The Commonwealth expects to present a comprehensive reform package this fiscal year.

## *Achieving a Balanced Budget by Fiscal Year 2016; Reducing the Deficit by at least Half by Fiscal Year 2015*

The budget for fiscal year 2014 contemplates a deficit of \$820 million, which the Commonwealth expects to finance with \$575 million in general obligation debt service refundings and \$245 million in new deficit financing. The Commonwealth aims to submit a proposed budget for fiscal year 2015 that contains no additional deficit financing and significantly reduces the amount of debt service refundings. Additional information with respect to the proposed fiscal year 2015 budget is expected to be presented in the next several months.

### *Improve Governmental Efficiency*

The Commonwealth is committed to expense reduction, beyond immediate tactical controls, through strategic initiatives directed at government efficiency. In particular, OMB believes that there are three main opportunities. First, the creation of a centralized federal funds monitoring office with the objective of increasing the amount and effectiveness of federal funds utilization by agencies of the Commonwealth, through improved procurement, agency capability building and optimized loss mitigation. Second, the implementation of a robust and systemic upgrade of Commonwealth budget, accounting and payroll information systems, to integrate entities and concepts, such as the Department of Education and the Department of Health, to improve reporting and business intelligence. Third, a comprehensive re-engineering effort focused on government organization, human capital, and cost efficiency, covering the core administrative functions of the government such as real estate, transportation, purchasing, utilities, payroll and services. With respect to the final point, the Government has signed an Executive Order to ensure multi-sector (including legislative and private sector) input and commitment to the initiatives

### **Economic Growth**

Since January 2013, recognizing the urgency to reignite the economy, the new Commonwealth administration has been actively working to attract investment, create jobs and rethink how to best deploy available resources. The Government favors initiatives that promote sustainable economic growth and job creation, while accelerating the transition to a knowledge-based and innovation driven economy, focused mainly in the development of human capital and intellectual property, thus diversifying Puerto Rico's economic base.

#### *Sector Initiatives*

The Government's outreach efforts are directed at increasing awareness of Puerto Rico's competitive advantages for businesses and investors in sectors where the Commonwealth has natural or structural competitive advantages. This outreach program has prioritized the following industry sectors: manufacturing, knowledge services, and tourism.

*Manufacturing.* Puerto Rico has been a strong manufacturing center for many decades. One of the administration's main goals is to bolster Puerto Rico's strong manufacturing base by aggressively growing key segments within this sector by (i) retaining existing pharmaceutical operations and pursuing opportunities in the emerging generic pharmaceuticals and biologics

markets, (ii) capturing new opportunities and moving up the value chain in medical devices manufacturing, and (iii) tapping growth opportunities in the emerging bio-agriculture R&D.

- *Retaining Existing BioPharma Operations.* Puerto Rico is a proven high-quality pharma manufacturing location, with a large reservoir of physical, intellectual, and human capital built over its 60 years as a world-class manufacturing destination. Twelve of the top twenty biopharmaceutical companies currently operate in Puerto Rico and seven of the top ten biopharmaceutical products sold in the world are manufactured in Puerto Rico. Puerto Rico offers low manufacturing costs compared to the mainland U.S. or other Western countries and a sophisticated industrial manufacturing base. Furthermore, increased concern and scrutiny brought on by quality and infrastructure challenges in other low-cost locations has sparked a renewed interest in proven, high quality locations such as Puerto Rico. Biopharma manufacturing currently represents approximately 25% of Puerto Rico's Gross National Product and approximately 17,000 people work in this sector.
- *Target on Medical Devices Manufacturing.* Puerto Rico already has a strong medical device manufacturing presence with 50% of pacemakers and defibrillators sold in the U.S. manufactured in Puerto Rico. As the global medical devices market grows, the current administration seeks to build on the existing presence to consolidate Puerto Rico's position as a global manufacturing destination for the medical technology sector. This is expected to be accomplished by leveraging Puerto Rico's competitive advantages including its vast life sciences experience, tax incentives, convenient location, status as a U.S. jurisdiction, and extensive talent pool. The Puerto Rico Industrial Development Company ("PRIDCO") believes that Industry trends favor Puerto Rico's competitive position because of industry consolidation which leads to larger facilities and manufacturing network optimization, as well as the Affordable Care Act excise tax on medical devices which highlights the importance of Puerto Rico's tax incentives.
- *Tapping opportunities in Bio-Agriculture R&D.* A combination of supportive government policies, including fast-tracking permitting, and natural benefits such as four harvests a year, have already made Puerto Rico a leading player in the growing area of bio-agriculture, in which traditional crops are improved through genetic modification. Many leading companies are already established in Puerto Rico; in addition to crop testing, many of these companies have built additional R&D facilities in Puerto Rico to support their efforts.

The administration's outreach initiatives have already resulted in the following positive developments as of September 2013:

- a \$137 million 3-year military apparel contract which is expected to create 2,200 jobs.

- a \$250 million expansion of an existing medical devices manufacturer which is expected to create 350 jobs.
- a \$9 million contract with a medical devices manufacturer which is expected to create 200 new jobs.
- eighty-four new contracts negotiated by PRIDCO with a commitment to create 7,500 new jobs in the aggregate related to different manufacturing sectors including: biopharma, construction & engineering, medical devices, knowledge services, aerospace electronics and information technology.
- continued improvement in Puerto Rico's global competitiveness as evidenced in the recent World Economic Forum's Global Competitive Report for 2013 with Puerto Rico's ranking improving from 31 to 30 and number 1 in Latin America and inclusion in Future Brands's Country Brand Index for Latin America, ranking 10 out of 21 countries

*Knowledge Services.* Puerto Rico also provides a compelling value proposition as a nearshoring destination, focused on the Americas. Puerto Rico has one of the most highly educated workforces in Latin America with strong bilingual skills and a close cultural affinity to the United States, which translates into a high quality service offering for companies. Puerto Rico's cost structure is competitive with other Latin American locations, particularly after incentives are taken into account. Puerto Rico's status as a U.S. jurisdiction is especially advantageous in certain sectors (such as Aerospace and Defense) because companies located in Puerto Rico comply with "U.S. soil" requirements while providing a significant cost advantage over the U.S. mainland, allowing them access to markets competitors cannot reach (e.g. Federal Government contracting). Overall, Puerto Rico represents a significant opportunity for companies to "outsource" to a lower cost destination, while remaining in the U.S. and benefiting from the U.S. legal system and infrastructure. The administration's goal is to establish Puerto Rico as a worldwide Knowledge Process Outsourcing ("KPO") hub, by providing knowledge services to clients worldwide, with focus on the Americas and the United States.

Successful initiatives in this sector since January of 2013 have included: (i) \$1 million investment in machinery and equipment for a development center to support technology implementation which is expected to create 300 new jobs, (ii) \$1 million investment in the knowledge services outsourcing sector which is expected to create 200 new jobs, and (iii) an alliance between a global IT global leader and a local partner which is expected to create 400 new jobs in the software development field.

*Tourism.* Puerto Rico has focused its recent efforts on expanding its air and maritime access, given its importance for both tourism and trade growth. Efforts are focused on the following strategic priorities: (i) achieving direct air access to Latin America (currently all connections are via Miami or Panama); (ii) recuperating access routes lost to the departure of American Eagle, (iii) expanding access to the US West Coast, and (iv) restarting growth in cruise passenger arrivals.

During the past few months, there has been significant progress in all of the above areas. The arrival of Southwest Airlines in April opens the doors to tap into its strength in the US West Coast as a potential for future growth. In July, Puerto Rico established its first direct connection to Colombia in 12 years, with the start of a non-stop route to Bogota via Avianca Airlines, with connections to other Latin American countries. The key Caribbean routes have been reestablished with new openings from Jet Blue (Santiago and Punta Cana), LIAT, Winnair (St. Maarten), and Seaborne (Dominica, Martinique). Cruise passenger arrivals have increased 84% in August 2013 versus the same period last year, and scheduled visits for 2014 are expected to increase by an additional 15%. Recent legislation regarding cruise industry incentives should help continue this growth. In addition, work is expected to begin in the coming months on the necessary improvements to Pier 3 that will allow the new Quantum and Oasis mega-class ships to arrive in Puerto Rico starting in December 2014.

The December 2012 opening of the Ritz Carlton Reserve at Dorado Beach, the first Reserve for the Ritz in the Americas, has helped position Puerto Rico as a luxury destination in the Caribbean. New luxury accommodations projects being contemplated in the short term are expected to help continue developing this market, such as the Vanderbilt in San Juan, Capella in Humacao, Four Seasons in Fajardo, and the JW Marriott in Dorado. Additionally, the recent purchase of the largest marina in the Caribbean, Puerto del Rey in Fajardo by U.S. investors is expected to boost tourism in the east coast area with additional on-site hotel and condo-hotel developments, retail space and a yacht club for increased economic and job-creation activity.

### *Jobs Act*

With the purpose of boosting employment and promoting the creation of small and medium enterprises, the Jobs Now Act was adopted in February 2013. Its objective is to create jobs by eliminating certain hurdles that delay and impede the establishment of new businesses or expanding existing businesses in Puerto Rico, allow better access to capital, and providing incentives under agreements between certain eligible businesses and the Government of Puerto Rico through the Puerto Rico Commerce and Export Company. The benefits provided under the law include, among others, partial reimbursement of salaries paid to certain persons previously unemployed, nominal rents on buildings owned by PRIDCO, two year property tax exemption for previously vacant buildings, a preferential income tax rate for the first two years of operation, full municipal license tax and personal property tax exemption for first two years of operation, an extended carryover period for net operating losses incurred during the first two years of operations and an energy credit per incremental job to be used against the electricity bill. The law also establishes an expedited permitting process for establishing eligible businesses. The Economic Development Bank is ordered to give priority to loan applications submitted by eligible businesses and to create programs to guarantee private financing to such eligible entities. Since the enactment of the Jobs Now Act, over 348 businesses have been granted an incentive decree with a pledge for the creation of over 5,990 new jobs.

### *Energy Policy*

The Commonwealth is committed to diversifying its energy sources with the aim of lowering energy costs. To that aim, the Puerto Rico Electric Power Authority (“PREPA”) recently

completed the conversion to natural gas of its Costa Sur plant with plans to convert to natural gas its Aguirre plant and build a liquefied natural gas port by 2015. The Government's goal is to increase the use of natural gas for power generation to 50% by 2015 and to 70% by 2017.

PREPA is conducting two separate efforts for the development of natural gas delivery solutions. In order to provide natural gas to its Aguirre power complex, which is PREPA's largest facility, PREPA entered into a Memorandum of Understanding ("MOU") with Excelerate Energy Limited Partnership ("Excelerate"), an liquefied natural gas ("LNG") transportation, floating regasification and storage provider, in order to, among other things, undertake the permitting for the Aguirre Offshore GasPort, an LNG import facility and pipeline to bring natural gas to the Aguirre power complex. PREPA and Excelerate are currently negotiating certain definitive agreements based on a Term Sheet that was executed in 2012. On April 17, 2013, Excelerate filed the FERC permit application and is currently applying for all necessary permits, clearances, and licenses relating to the construction and operation of the Aguirre Offshore GasPort. Excelerate has expressed that it expects to receive the FERC authorization and other permits to construct the Aguirre Offshore GasPort during 2014 and anticipates requesting authorization to commence construction approximately one month after receiving FERC's authorization. If the permits are timely obtained, the facility would be in service during 2015. Meanwhile, in order to transport natural gas to the San Juan and Palo Seco generating plants, PREPA and the Public-Private Partnerships Authority will be conducting a procurement process to evaluate different solutions and choose a feasible, cost effective and timely delivery alternative. The procurement process is expected to be completed during fiscal year 2014, with the goal of completing the infrastructure to receive, store and regasify natural gas by April 2017.

The other principal component of the Commonwealth's fuel diversification strategy is the development of renewable energy generation. In July of 2010, the Commonwealth enacted legislation focused on reducing Puerto Rico's dependence on fossil fuels, particularly oil, through the promotion of diverse renewable-energy technologies. This legislation seeks to lower energy costs, reduce energy-price volatility, and establish environmentally sustainable energy production through a reduction in ecologically harmful emissions. It creates a Renewable Portfolio Standard, recognizing many sources of renewable energy that utilize various technologies, and setting a target of 12% renewable energy production by 2015 and 15% by 2020, and a requirement for retail energy providers to establish a plan to reach 20% renewable energy production by 2035.

The legislation also provides incentives for the construction and use of renewable energy sources, and creates a Green Energy Fund through which the Commonwealth will co-invest \$290 million in renewable energy projects over the next ten years. These initiatives are intended to address energy prices in Puerto Rico and provide a means for attracting investment in the energy sector. The fund will provide reimbursements for the installation of renewable energy generating equipment of up to 40% for residential and small businesses, and up to 50% for medium sized businesses and industries. This funding initiative will also provide access to Renewable Energy Certificates ("RECs") to help finance renewable energy projects at a utility scale level. A REC is a personal asset that is marketable and negotiable. It can be bought, sold, assigned, and transferred between individuals for any lawful purpose, and as a whole, indivisible asset, it is equivalent to one Megawatt-hour of electricity generated by a source of sustainable or alternative renewable energy.

During fiscal years 2012 and 2013, 370 renewable energy projects were approved, of which 90 projects were completed. Between July and September of 2013, 62 projects were completed with Green Energy Fund incentives, representing an investment of more than \$11 million and the creation of approximately 100 professional and technical jobs in the areas of design and construction.

### *Public-Private Partnerships*

The Government recognizes that public-private partnerships (“PPPs”) represent an important tool for economic development.

On June 8, 2009, the Legislative Assembly approved Act No. 29 (“Act 29”), which established the legal framework for the establishment of PPPs in Puerto Rico to further the development and maintenance of infrastructure facilities, improve the services rendered by the Government and foster the creation of jobs. Act 29 created the Public-Private Partnerships Authority (the “PPP Authority”), the entity tasked with implementing the Commonwealth’s public policy regarding PPPs.

As part of the Government’s PPPs initiative, the PPP Authority and the Highways and Transportation Authority completed in 2011 the procurement for a concession of toll roads PR-22 and PR-5 (the “Toll Roads”). They selected Autopistas Metropolitanas de Puerto Rico, LLC (“Metropistas”), a consortium comprised of Goldman Sachs Infrastructure Partners and Abertis Infraestructuras, as the winning proponent based on a bid of \$1.080 billion. As a result of this transaction, the Highways and Transportation Authority received a lump-sum payment of \$1.136 billion and a commitment from Metropistas to invest \$56 million in immediate improvements during the first three years of the concession and \$300 million in capital improvements and construction during the term of the contract, and to comply with world-class operating standards.

To modernize public school facilities throughout the island and improve academic performance, the PPP Authority launched a special program in order to modernize and build a selected number of public schools throughout Puerto Rico. At least one school in each municipality is benefiting from this program. The Government expects this project will impact nearly 50,000 students, 2,000 teachers and various communities and create 14,000 jobs throughout Puerto Rico’s 78 municipalities. The Government has funded this project with the proceeds of Qualified School Construction Bonds (QSCB) issued by PBA in the aggregate principal amount of \$756 million. As of June 2013, the PPP Authority had awarded approximately \$632 million in contracts for a total of 53 schools completed and 28 schools in progress.

In February of 2013, the PPP Authority and the PRPA consummated a lease agreement with Aerostar Airport Holdings, LLC (“Aerostar”), a partnership formed between Grupo Aeroportuario de Sureste S.A.B. de C.V. (“ASUR”) and Highstar Capital IV, to finance, operate, maintain and improve the Luis Muñoz Marín International Airport (“Airport”), the busiest airport in the Caribbean with over 8 million passengers per year. The primary objectives of the PPP Authority and the PRPA were: (i) maximizing the upfront value for the Airport, (ii) improving the Airport’s safety standards, service levels and quality, (iii) maintaining and improving the quality of

service to travelers as well as achieving a higher level of customer satisfaction, and (iv) creating a world-class gateway to Puerto Rico while increasing the Puerto Rico's profile as a destination in the Caribbean, in order to positively impact the development of the tourism industry and overall economic prospects in Puerto Rico. As a result of this transaction, on February 27, 2013, the PRPA received from Aerostar a lump-sum payment of \$615 million and will receive an estimated \$552 million in revenue sharing over the life of the lease. It is estimated that Aerostar will invest \$1.4 billion in the Airport during the life of the lease, including approximately \$267 million in immediate improvements, and will comply with world-class operating standards. Following the successful completion of this transaction, as mentioned above, there has been an increase in air routes with the arrival of Southwest Airlines, a new direct route to Bogotá, Colombia through Avianca Airlines and expanded Caribbean air services via Seabourne, among other routes.

The PPP Authority is currently evaluating projects for the development and construction of new infrastructure facilities. These projects include a rail transportation system from Caguas to San Juan, the extension of the PR-22 Highway from Hatillo to Aguadilla, conversion to natural gas of certain PREPA power plants and correctional facilities, among others.

### *Strategic projects*

The Commonwealth is also targeting strategic/regional projects that are expected to generate investments in various regions of Puerto Rico in order to foster a balanced economic development.

In the northern region, Science City represents a critical effort to move Puerto Rico to the forefront of science, technology and research and development. It seeks to leverage Puerto Rico's competitive advantages in the knowledge-based sectors. Legislation enacted in 2011 expanded the benefits of investing in, and performing, science and technology research and development activities in the newly denominated "Science District", through the inclusion of such activities as eligible for tax exemption under the Economic Incentives Act (as defined below). See "Tax Incentives – Industrial Incentives Program" under THE ECONOMY.

The Science District will include the existing University of Puerto Rico (UPR) Medical Sciences Campus, the UPR Rio Piedras Campus, the new Biomedical Sciences Laboratory, and the soon-to-be-constructed Comprehensive Cancer Center. At the center of the Science District will be new laboratory and commercial space on the site of the former Rio Piedras State Penitentiary ("Oso Blanco").

Over the next several years, the Puerto Rico Science Trust will oversee two major initiatives to realize the full potential of the Science District. Specifically, the Trust will:

- complete preparation of the Oso Blanco site and secure a private "anchor tenant" to begin development of laboratory and commercial space.
- actively market and expand programs to fund Puerto Rican investors and entrepreneurs, such as funding for companies applying for Small Business Innovation Research (SBIR) awards, research grants and in-kind support for

individual researchers and inventors, and tax exemptions for companies that pursue research at local universities.

In the eastern region of Puerto Rico, the Roosevelt Roads project entails the redevelopment of the old Roosevelt Roads navy facility in Ceiba and is a key element in the administration's strategy to create jobs and reignite the economy of Puerto Rico's eastern region, including Ceiba, Naguabo, Vieques, and Culebra. The site of the former Roosevelt Roads Naval Station represents an unparalleled opportunity for the development of an integrated tourism, living, and commercial destination. With 8,720 acres of prime waterfront property, close proximity to attractions such as Vieques, Culebra, El Yunque, and San Juan, and improvements including a major airfield and deep-water port, Roosevelt Roads represents a large-scale development opportunity. Development on the site would also contribute greatly to the economic growth of eastern Puerto Rico by providing construction jobs and attracting more tourists to the wider area.

The Government, through the Roosevelt Roads Local Redevelopment Authority ("LRA"), intends to develop the site by searching for and entering into agreements with a master developer or other private parties. Negotiations are already underway to begin operating the on-site marina, hospital, and recycling plant and the LRA will launch an RFQ / RFP process this fall for the development of the light industrial, academic, eco-tourism, and commercial marina zones.

The LRA anticipates that development of Roosevelt Roads will create at least 1,500 to 2,000 jobs over the next five years, with the potential of up to 25,000 jobs over a longer-term horizon.

In the western region of Puerto Rico, the Commonwealth is focused on the redevelopment of the Aguadilla airport to serve as the second international airport of Puerto Rico and as a regional logistics hub. The PRPA is well on their way to finalize a redevelopment master plan in order to convert the international airport facilities into a regional maintenance, repair and overhaul ("MRO") and cargo hub. To this end, the PRPA completed the process and the Aguadilla airport has been designated as a Free Trade Zone providing huge competitive advantages for companies operating under this structure. Complex negotiations are underway with several MRO companies as well with several freight forwarders. The plan will include the creation of a comprehensive aeronautics/aerospace cluster leveraging the University of Puerto Rico's Mayagüez Campus and major aeronautics firms operating in the west/northwest corridor.

## **Employment and Unemployment**

According to the Household Survey, the number of persons employed in Puerto Rico during fiscal year 2013 averaged 1,029,019, a decrease of 0.6% compared to the previous fiscal year; and the unemployment rate averaged 14.0%. During the first two months of fiscal year 2014, total employment averaged 1,009,800, a 2.3% reduction with respect to the same period of the prior year, and the unemployment rate averaged 14.8% compared to 15.2% for the same period of the prior year.

The following table presents annual statistics of employment and unemployment for fiscal year 2009 through fiscal year 2013. These employment figures are based on the Household

Survey, which includes self-employed individuals and agricultural employment, instead of the non-farm, payroll employment survey (the “Payroll Survey”), which does not. The number of self-employed individuals represents around 15% of civilian employment in Puerto Rico, more than double the level in the United States. On the other hand, agricultural employment in Puerto Rico represented 1.6% of total employment in fiscal year 2013.

**Commonwealth of Puerto Rico  
Employment and Unemployment  
(persons age 16 and over, in thousands)**

<b>Fiscal Years Ended June 30,</b>	<b>Labor Force</b>	<b>Employed</b>	<b>Unemployed</b>	<b>Unemployment Rate<sup>(1)</sup></b>
		<b>(Annual Average)</b>		
2009	1,325	1,144	181	13.7%
2010	1,285	1,075	210	16.3%
2011	1,249	1,047	202	16.2%
2012	1,221	1,035	185	15.2%
2013	1,196	1,029	167	14.0%

Totals may not add due to rounding.

<sup>(1)</sup> Unemployed as percentage of labor force.

*Source:* Department of Labor and Human Resources – Household Survey

These Household Survey figures above are different from the ones published previously, due to the fact that the Department of Labor finally published the revision of this survey which takes into account the new population numbers from the Census of 2010. Every decade, with every population census, employment and unemployment data are revised retroactively to consider population trends. Given that the Census of 2010 reported for the first time a population reduction in Puerto Rico, employment and unemployment data suffered a downward revision. As an example, for fiscal years 2011 and 2012 total employment figures were 30,300 and 49,700 employees below the previously published numbers. Similarly, for the same years, the number of unemployed persons was lower by 1,700 and by 5,400 from the numbers reported earlier. As a result, the unemployment rate has been declining slowly, and simultaneously the levels of total employment and unemployment have decreased.

Another employment measurement comes from the Establishment Survey, which is used to gauge employment across different economic sectors. The Establishment Survey measures only non-farm payroll employment, i.e., does not include self-employed nor agricultural workers. Employment coming from this survey (henceforth, payroll employment) is corrected every year (specifically, every March) with a benchmark revision. From calendar year 2006 to calendar year 2011 the revisions implied additions or subtractions of around 4,400 jobs (the highest addition was in 2008 with 5,300 jobs, and the highest subtraction corresponded to 2009 with 6,500 less jobs). Nevertheless, the latest benchmark revision added 18,400 more jobs, which represented an increase of nearly 2% from what had been previously reported for 2012 (previous changes did not reach the magnitude of 1%). This major revision could be related to the higher economic activity

from public works due to the electoral cycle. This explanation seems to be validated by the increase in jobs in construction and services, which were significant during 2012, according to the benchmark revision. The payroll employment revision had two major effects: it raised the employment base for 2012 and, therefore, it accentuated the employment reductions observed in 2013.

Moreover, the recent changes to the Employees Retirement System resulted in more retirements of state and local employees. Approximately 40% of the total payroll employment reductions experienced from June to August corresponded to decreases in state and local government employment. This recent behavior cannot be explained only by the usual attrition of public employment.

Finally, since total non-farm payroll employment is one of the components of the EAI, the latest benchmark revision implied a major change on the behavior of the index, increasing the level of the index for calendar year 2012 by more than 1%. The increase of the base for 2012 accentuates the reductions observed in 2013.

### **Economic Performance by Sector**

From fiscal year 2008 to fiscal year 2012, the manufacturing and service sectors generated the largest portion of gross domestic product. The manufacturing, service, and government sectors were the three sectors of the economy that provided the most employment in Puerto Rico.

The following table presents annual statistics of gross domestic product by sector and gross national product for fiscal years 2008 to 2012.

**Commonwealth of Puerto Rico**  
**Gross Domestic Product by Sector and Gross National Product**  
**(in millions at current prices)**

	Fiscal Years Ended June 30,

Educational and health	109,992	111,333	114,108	117,550	118,067
Leisure and hospitality	70,933	70,850	71,150	72,633	75,183
Other services	20,117	18,758	17,925	17,558	17,900
Government <sup>(3)</sup>	300,708	276,533	260,033	258,458	256,067
Total non-farm	996,033	942,158	923,042	930,675	924,500

<sup>(1)</sup> The figures presented in this table are based on the Payroll Survey prepared by the Bureau of Labor Statistics of the Puerto Rico Department of Labor and Human Resources. There are numerous conceptual and methodological differences between the Household Survey and the Payroll Survey. The Payroll Survey reflects information collected from payroll records of a sample of business establishments, while the Household Survey is based on responses to a series of questions by persons in a sample of households. The Payroll Survey excludes the self-employed and agricultural employment. Totals may not add due to rounding.

<sup>(2)</sup> Preliminary.

<sup>(3)</sup> Includes state, local, and federal government employees.

Source: Department of Labor and Human Resources, Current Employment Statistics Survey (Establishment Survey – NAICS Codes)

Although the data from the Payroll Survey is revised annually, the calendar year 2012 revision presented major changes not observed during the previous five years. For example, for calendar year 2010 the benchmark revision of the Payroll Survey implied an average reduction of 2,842 employees with respect to previously reported numbers for that year. Furthermore, for calendar year 2011 the annual benchmark revision implied an average increase of 4,067 employees with respect to earlier reports. From calendar years 2006 to 2011 the standard deviation of the revisions was around 4,400 employees, meaning that a revision could add or subtract 4,400 employees, on average. Nevertheless, the benchmark revision of calendar year 2012 implied an addition of 18,433 employees. This average increase affects previous interpretations of the behavior of the labor market, and had effects on other composed variables, like the GDB-EAI.

## *Manufacturing*

Manufacturing is the largest sector of the Puerto Rico economy in terms of gross domestic product. The Planning Board figures show that in fiscal year 2012 manufacturing generated \$46.1 billion, or 45.6%, of gross domestic product. During fiscal year 2013, payroll employment for the manufacturing sector was 77,525, a decrease of 7.1% compared with fiscal year 2012. For the first two months of fiscal year 2014, manufacturing employment averaged 74,600, a reduction of 7.7% (or 6,300 employees) from the same time period of the previous fiscal year. Most of Puerto Rico's manufacturing output is exported to the United States mainland, which is also the principal source of semi-finished manufactured articles on which further manufacturing operations are performed in Puerto Rico. Federal minimum wage laws are applicable in Puerto Rico. For fiscal year 2013, however, the average hourly manufacturing wage rate in Puerto Rico was approximately 66.5% of the average mainland United States rate.

In the last three decades, industrial development in Puerto Rico has been relatively capital intensive and dependent on skilled labor. This gradual shift in emphasis from labor intensive to capital intensive industrial development is best exemplified by large investments over the last two decades in the pharmaceutical and medical-equipment industries in Puerto Rico. Historically, one of the factors that encouraged the development of the manufacturing sector was the tax incentives offered by the federal and Commonwealth governments. Federal legislation enacted in 1996, however, which amended Section 936 of the United States Internal Revenue Code of 1986, as amended (the "U.S. Code"), phased out these federal tax incentives during a ten-year period that ended in 2006. Moreover, Act 154 expanded the scope of the income tax rules as they relate to certain nonresident alien individuals, foreign corporations and foreign partnerships and imposed a new temporary excise tax on persons that purchase products manufactured in Puerto Rico by other persons that are members of the same controlled group. The elimination of the benefits provided by Section 936 of the U.S. Code has had, and Act 154 may have, a long-term impact on local manufacturing activity. See "Tax Incentives—Incentives under the U.S. Code" under THE ECONOMY and "Major Sources of General Fund Revenues—Tax Reform" and "Major Sources of General Fund Revenues—Income Taxes," respectively, under PUERTO RICO TAXES, OTHER REVENUES AND EXPENDITURES.

The following table sets forth gross domestic product by manufacturing sector for fiscal years 2008 to 2012.

**Commonwealth of Puerto Rico**

Total employment in the manufacturing sector decreased by 39,800 from fiscal year 2005 to fiscal year 2013. For fiscal years 2009, 2010, 2011, 2012 and 2013, manufacturing employment decreased by 7.0%, 8.7%, 3.0%, 2.6% and 7.1%, respectively. For the first two months of fiscal year 2014, average employment in the sector declined by 6,300 jobs, or 7.7%, compared to the same period of the previous year. Given that this sector pays, on average, the highest wages in Puerto Rico, its general downturn has represented a major difficulty for restoring growth for the whole economy. There are several reasons that explain this sector's job shrinkage: the end of the phase-out of the tax benefits afforded by Section 936 of the U.S. Code, the net loss of patents on certain pharmaceutical products, the escalation of manufacturing production costs (particularly electricity), the increased use of job outsourcing, and the increase of global competition. Puerto Rico's manufacturing sector continues to face increased international competition. As patents on pharmaceutical products manufactured in Puerto Rico expire and the production of such patented

products is not replaced by new products, there may be additional job losses in this sector and a loss of tax revenues for the Commonwealth.

### *Service Sector*

Puerto Rico has experienced mixed results in the service sector, which, for purposes of the data set forth below, includes wholesale and retail trade, utilities, transportation and warehousing, information, finance and insurance, real estate and rental, and certain services such as professional, scientific, technical, management, administrative, support, educational, health care, social, recreational, accommodation, food and other services. This sector has expanded in terms of income over the past decade, following the general trend of other industrialized economies, but with differences on the magnitudes of those changes. During the period between fiscal years 2007 and 2012, the gross domestic product in this sector, in nominal terms, increased at an average annual rate of 1.2%, while payroll employment in this sector decreased at an average annual rate of 0.4%. In the Puerto Rico labor market, self-employment, which is not accounted for in the Payroll Survey, represents approximately 15.5% of total employment according to the Household Survey. Most of the self-employment is concentrated in the service and construction sectors. The development of the service sector has been positively affected by demand generated by other sectors of the economy, such as manufacturing and construction.

The service sector ranks second to manufacturing in its contribution to gross domestic product. The service sector is also the sector with the greatest amount of employment. In fiscal year 2012, the service sector generated \$43.8 billion, or 43.4%, of gross domestic product. Trade, professional and business support, and education and health, experienced growth, while transportation and warehousing, information, finance, and other services experienced reductions in fiscal year 2012, as measured by gross domestic product at current prices. Service-sector employment decreased from 565,242 in fiscal year 2007 to 558,000 in fiscal year 2013 (representing 60.4% of total, non-farm, payroll employment). The average service-sector employment for fiscal year 2013 represents an increase of 0.8% compared to the prior fiscal year.

Puerto Rico has a developed banking and financial system. As of July 31, 2013, there were eleven commercial banks operating in Puerto Rico. Commercial banks in Puerto Rico are generally regulated by the Federal Deposit Insurance Corporation (the "FDIC") or the Board of Governors of the Federal Reserve System, and by the Office of the Commissioner of Financial Institutions of Puerto Rico (the "OCFI"). The OCFI reports that total assets of commercial banks (including assets of units operating as international banking entities) as of December 31, 2012 were \$68.1 billion, as compared to \$70.8 billion as of December 31, 2011. On April 30, 2010, the OCFI closed three commercial banks and the FDIC was named receiver. On the same date, the FDIC entered into loss share purchase and assumption agreements with three of the other commercial banks with operations in Puerto Rico, providing for the acquisition of most of the assets and liabilities of the closed banks, including the assumption of all of the deposits. Considering the magnitude of the consolidations, the amount of jobs lost to date as a result of these consolidations has not been significant. The Government expects that this consolidation will strengthen the Puerto Rico banking sector.

Broker-dealers in Puerto Rico are regulated by the Financial Industry Regulatory Authority (“FINRA”), the United States Securities and Exchange Commission and the OCFI, and are mainly dedicated to serve investors that are residents of Puerto Rico. According to the OCFI, assets under management by broker-dealers in Puerto Rico totaled \$35.2 billion as of December 31, 2012, as compared to \$33.9 billion on December 31, 2011. Another relevant component of the financial sector in Puerto Rico is the investment company industry. According to the OCFI, local investment companies had recorded assets under management of \$17.3 billion as of December 31, 2012. Assets under management by local investment companies may have decreased significantly as a result of the recent volatility in secondary market prices of bonds of the Commonwealth and its instrumentalities.

Other components of the financial sector in Puerto Rico include international banking entities (“IBEs”) and credit unions (locally known as “cooperativas”). IBEs are licensed financial businesses that conduct offshore banking transactions. As of December 31, 2012, there were 30 IBEs (including units of commercial banks) operating in Puerto Rico, with total assets of \$36.5 billion, a decrease from \$43.9 billion in total assets as of December 31, 2011. Meanwhile, credit unions, which tend to provide basic consumer financial services, reached \$8.2 billion in assets as of December 31, 2012, an increase from \$7.8 billion as of December 31, 2011.

In addition, there are specialized players in the local financial industry that include mortgage-origination companies and auto and personal finance companies.

The following table sets forth gross domestic product for the service sector for fiscal years 2008 to 2012.

**Commonwealth of Puerto Rico**

*Hotels and Related Services—Tourism*

For fiscal year 2012, the number of persons registered in tourist hotels, including residents of Puerto Rico and tourists, was 2,097,100, an increase of 9.4% over the number of persons registered during fiscal year 2011. The average occupancy rate in tourist hotels during fiscal year 2012 was 70.5%, an increase of 2.2% from the prior fiscal year. Also, during fiscal year 2012, the average number of rooms available in tourist hotels increased by 2.5% to 11,786 rooms compared to fiscal year 2011.

During the first ten months of fiscal year 2013, the number of persons registered in tourist hotels, including residents of Puerto Rico and tourists, was 1,793,100, an increase of 5.5% over the number of persons registered during the same period of fiscal year 2012. The average occupancy rate in tourist hotels during the first ten months of fiscal year 2013 was 72.4%, an increase of 3.9% from the prior fiscal year. Also, during the first ten months of fiscal year 2013, the average number of rooms available in tourist hotels increased by 1.8% to 11,951 rooms compared to the same period of fiscal year 2012.

In terms of employment, this sector has shown a behavior that appears not totally consistent with the registration figures presented in the previous paragraphs. According to the Payroll Survey, employment in the leisure and hospitality sector was 72,633 for fiscal year 2012, an increase of 2.1% over employment for fiscal year 2011, a growth rate significantly smaller than the growth rates of tourist hotel registrations for the same time period (9.4%). Moreover, for fiscal year 2013, employment in this sector increased by 3.5% to 75,183 compared to the same period of

the prior fiscal year, which is still a smaller rate than the average growth rate observed for the first ten months on the tourist hotel registrations (5.5%). Similarly, for the first two months of the 2014 fiscal year, the leisure and hospitality sector employment remains stable, averaging 75,750 employees, an increase of 1.7%, compared to the same period for the prior year. These figures could imply a significant improvement on the labor productivity of this sector during fiscal years 2012 and 2013.

San Juan is the largest homeport for cruise ships in the Caribbean and one of the largest homeports for cruise ships in the world. Recent data indicates that cruise arrivals are on the rise with cruise passenger arrivals increasing by 84% in August 2013 versus same period year ago, and scheduled visits for 2014 increasing by 15%.

Sources: Puerto Rico Tourism Company and the Planning Board

The Commonwealth, through the Puerto Rico Convention Center District Authority (“PRCDA”), has developed the largest convention center in the Caribbean, which is the centerpiece of a 100-acre private development that includes hotels, restaurants, office space, and housing. The convention center district is being developed at a total cost of \$1.3 billion in a

public/private partnership effort to improve Puerto Rico's competitive position in the convention and group-travel segments. The convention center opened on November 17, 2005 and, since its inauguration, the facility has hosted more than 1,000 events accounting for more than 1 million attendees. A 500-room hotel located next to the convention center commenced operations in November of 2009.

The PRCDA also owns an 18,500-person capacity multipurpose arena, known as the José Miguel Agrelot Coliseum, located in San Juan, Puerto Rico. The coliseum was inaugurated in 2004 and has hosted more than 2.5 million people attending over 400 world-caliber events. The venue has received numerous awards including "Best International Large Venue of the Year" from Pollstar magazine in 2005.

### *Government*

The government sector of Puerto Rico plays an important role in the economy. It promoted the transformation of Puerto Rico from an agricultural economy to an industrial one during the second half of the 20<sup>th</sup> century, providing the basic infrastructure and services necessary for the modernization of Puerto Rico.

In fiscal year 2012, the government (federal, state and local) accounted for \$8.3 billion, or 8.2%, of Puerto Rico's gross domestic product. The government is also a significant employer, employing 256,100 workers (federal, state and local), or 27.7% of total, non-farm, payroll employment in fiscal year 2013. In fiscal year 2009, state and municipal government employment averaged 285,600. During fiscal year 2010, state and municipal government employment decreased by 25,700 jobs, or 9.0%. According to the Payroll Survey, the distribution of the job reductions during fiscal year 2010 was 20,700 jobs in the state government (including public corporations) and approximately 5,000 jobs in municipal government. During fiscal year 2011, state and municipal government employment decreased further by 14,900 jobs, or 5.7%, compared to fiscal year 2010. According to the Payroll Survey, the decrease was attributable to a reduction of 12,500 jobs in the state government and approximately 2,400 jobs in municipal government. Subsequently, during fiscal year 2012, state and municipal government employment also decreased, but considerably less; by 1,000 jobs, or 0.4%, when compared to fiscal year 2011. The reduction was comprised of a decrease of close to 1,200 jobs in the state government, or a 0.7% decrease, and a concurrent 200 jobs increase, or 0.4%, in municipal government employment. During fiscal year 2013, total government employment (federal, state and local) decreased to 256,100, or by 0.9% when compared to the previous fiscal year total of 258,500. This average reduction of 2,400 jobs consists of an average decrease of 2,400 jobs, or 1.3%, in state government offset by an average increase of 200 jobs, or 0.4%, in municipal government employment and a decrease of 200 jobs, or 1.2%, in federal government, respectively. During the first two months of fiscal year 2014, government employment has decreased further to a total amount of 239,200, or by 6.1% compared to the same period from the previous fiscal year. The reductions have occurred in the state and municipal government employment sectors and are related to the recent changes to the Employees Retirement System which prompted the voluntary departure of employees which qualified for retirement but were still employed. For more information regarding the situation of the Commonwealth retirement systems, see "RETIREMENT SYSTEMS."

## *Transportation*

Thirty-four shipping lines offer regular ocean freight service to eighty United States and foreign ports. San Juan is the island's leading seaport, but there are also seaport facilities at other locations in Puerto Rico including, Arecibo, Culebra, Fajardo, Guayama, Guayanilla, Mayagüez, Ponce, Vieques, and Yabucoa. Puerto Rico's airport facilities are located in Carolina, San Juan, Ponce, Mayagüez, Aguadilla, Arecibo, Ceiba, Vieques, Culebra, Patillas and Humacao.

Luis Muñoz Marín International Airport in the San Juan metropolitan area is currently served by 24 domestic and international airlines. The Airport receives over 8 million passengers per year, making it the busiest airport in the Caribbean. At present, there is daily direct service between San Juan and Atlanta, Baltimore, Boston, Chicago, Dallas, Miami, New York, Orlando, Philadelphia, and numerous other destinations within the United States mainland. San Juan has also become a hub for intra-Caribbean service. While the main hubs in the United States mainland serve as the gateway from San Juan to most international destinations, Latin American destinations are also served through Panama City, Panama, with connections to Central and South America. On February 27, 2013, the PRPA closed a long term lease of the Luis Munoz Marin International Airport with Aerostar Holdings, LLC ("Aerostar") pursuant to a public-private partnership transaction. It is estimated that Aerostar will invest \$1.4 billion in the Airport during the life of the lease, including a commitment to invest approximately \$267 million in immediate improvements and comply with world-class operating standards. For more information regarding the Aerostar transaction, see "Economic Development Program – Public-Private Partnerships" under Fiscal Stabilization and Economic Growth.

Regarding other airports, Rafael Hernández Airport in Aguadilla is served by JetBlue and Spirit and has regularly scheduled service to and from Fort Lauderdale, New York, Newark and Orlando; and Ponce's Mercedita Airport is served by JetBlue and has regularly scheduled service to and from New York and Orlando. Both of these airports also have scheduled service to other Caribbean islands. Smaller regional airports serve intra-island traffic. Cargo operations are served by both Federal Express and United Parcel Service (UPS) at the airports in San Juan and Aguadilla.

Puerto Rico's major cities are connected by a modern highway system, which, as of December 31, 2012, totaled approximately 4,647 miles, and 12,740 miles of local streets and adjacent roads. The highway system comprises 392 miles of primary system highways, which are the most important interregional traffic routes and include PR-52, PR-22, PR-53, PR-66 and PR-20 toll highways, 233 miles of primary urban system highways, 959 miles of secondary system highways serving the needs of intra-regional traffic, and 3,064 miles of tertiary highways and roads serving local, intra-regional traffic. On September 22, 2011, the PPP Authority and the Highways and Transportation Authority completed the procurement for a concession of toll roads PR-22 and PR-5. See "Economic Growth – Public-Private Partnerships" under Fiscal Stabilization and Economic Growth.

The Port of the Americas is a deep draft container terminal under development on the south coast of Puerto Rico in the City of Ponce, the Commonwealth's fourth largest municipality by

population. Managed by the Authority of the Port of Ponce, the terminal can handle containerized import/export and transshipment cargo. The first phase of the port development was completed in 2004 while the second phase, which resulted in container yard with capacity of up to 250,000 Twenty-Foot Equivalent Units per year, was completed during the first quarter of calendar year 2009. A third development phase is still pending. The completion of phase three will result in an annual terminal processing capacity of up to 500,000 Twenty-Foot Equivalent Units as well as the installation of basic infrastructure required to develop an industrial value-added zone on land adjacent to the Port.

### *Construction*

Although the construction industry represents a relatively small segment of the economy compared to other sectors, it can make significant contributions to the growth of economic activity due to its multiplier effect on the whole economy. From its peak in fiscal year 2000 to fiscal year 2012, real construction investment declined at an average annual rate of 5.9%. Construction investment started to decrease significantly in fiscal year 2005, as a consequence of the recessionary economic conditions in Puerto Rico. During the last five fiscal years (from fiscal year 2007 to 2012) real construction investment decreased at an average annual rate of 7.3%. The Planning Board forecasts an increase in construction investment of 1.8% in real terms for fiscal year 2013, and of 4.9% for fiscal year 2014.

Public investment has been an important component of construction investment. During fiscal year 2012, approximately 59.0% of the total investment in construction was related to public projects, which represents an increase in its share of total construction investment compared to 37.9% in fiscal year 2000. Public investment in construction has been negatively affected by the Commonwealth's fiscal difficulties, while private investment in construction is still suffering from the credit conditions that prevailed during the last decade. Public investment was primarily in housing, schools, water projects, and other public infrastructure projects. The end of federal ARRA funds is also expected to negatively affect public investment in construction during fiscal year 2014.

During fiscal year 2010, the number of construction permits decreased 15.2%, while the total value of construction permits dropped by 29.2% compared to fiscal year 2009. During the first ten months of fiscal year 2011 (the most recent data available), the total value of construction permits decreased further by 15.7%. The numbers and values of construction permits have become extremely outdated (the last observation available is April 2011), and the Planning Board has stopped publishing them. Cement sales, on the other hand, declined by 26.3% in fiscal year 2010 and by 5.0% in 2011, reaching levels not seen in almost three decades. In fiscal year 2012 they increased by 7.3%, but during fiscal year 2013, however, cement sales decreased again by 12.0% from the same time period of the previous fiscal year. During the first two months of fiscal year 2014, cement sales have decreased by 14.9% compared to the same period in fiscal year 2013.

Average payroll employment in the construction sector during fiscal year 2013 was 32,908, a reduction of 6.0% from fiscal year 2012. During the first two months of fiscal year 2014, payroll employment in the construction sector averaged 28,150 jobs, a significant decrease of 22.8% compared to the same period in fiscal year 2013.

On September 2, 2010, the Commonwealth enacted Act 132. Act 132 was designed primarily to stimulate the Puerto Rico real estate market, which in recent years has been suffering from lower sales, rising inventories, falling median prices and increased foreclosure rates. Pursuant to Act 132, the Commonwealth provided tax and transaction fee incentives to both purchasers and sellers of new and existing residential properties, as well as commercial properties with sale prices that do not exceed \$3 million. The incentives provided by Act 132 (as subsequently amended) were effective from September 1, 2010 through October 31, 2011. Certain permanent incentives are also available for rental housing. On November 1, 2011, the Commonwealth approved Act 216, which provided incentives similar to the ones available under Act 132 but gradually reduced those incentives without disrupting the functioning of the housing market in Puerto Rico. The incentives provided by Act 216 (as subsequently amended) were effective from November 1, 2011 to June 30, 2013, with certain reductions after December 31, 2011 and June 30, 2012. New incentives were also available for property that constituted the seller's principal residence, as defined in Act 216.

### *Agriculture*

Agriculture production represents less than 1% of Puerto Rico's gross domestic product. During fiscal year 2012, gross income from agriculture was \$784.5 million at current prices, which diminished slightly by 0.7% as compared with fiscal year 2011. In terms of gross domestic product, agriculture generated a level of production of \$817.8 million at current prices in fiscal year 2012, an increase of 2.8% compared to fiscal year 2011. According to the Household Survey, the number of people employed in this sector has remained stable during the past three years, at close to 17,000 employees.

The Commonwealth government supports agricultural activities through incentives, subsidies, and technical and support services, in addition to income tax exemptions for qualified income derived by bona fide farmers. Act No. 225 of 1995 provides a 90% income tax exemption for income derived from agricultural operations, grants for investments in qualified agricultural projects, and a 100% exemption from excise taxes, real and personal property taxes, municipal license taxes and tariff payments. It also provides full income tax exemption for interest income from bonds, notes and other debt instruments issued by financial institutions to provide financing to agricultural businesses.

Policy changes have been implemented to promote employment and income generated by the agricultural sector. The policy initiatives include a restructuring of the Department of Agriculture, an increase in government purchases of local agricultural products, new programs geared towards increasing the production and sales of agricultural products, and a new system of agricultural credits and subsidies for new projects. The Department of Agriculture and related agencies have directed their efforts at increasing and improving local agricultural production, and stimulating the consumption of locally produced agricultural products.

## Higher Education

During the six decades from 1950 to 2010, Puerto Rico made significant advances in the field of education, particularly at the college and graduate-school level. The transformation of Puerto Rico during the 1950s and 1960s from an agricultural economy to an industrial economy brought about an increased demand for educational services at all levels. During the 1970s and 1980s, certain higher-wage, higher-technology industries became more prominent in Puerto Rico. More recently, employment in the service sector has increased significantly. This has resulted in an increased demand for workers having a higher level of education and greater expertise in various technical fields. During the same time period, enrollments in institutions of higher learning rose very rapidly due to growth in the college-age population, and the increasing percentage of college attendance by such population. During the 1990s and into the current decade, college attendance and college attendance as a percentage of the college-age population continued to increase, although the college-age population has declined since 2000.

The following table presents comparative trend data for Puerto Rico and the United States mainland with respect to college-age population and the percentage of such population attending institutions of higher learning.

### Commonwealth of Puerto Rico Trend in College Enrollment

Academic Year	Commonwealth of Puerto Rico			United States Mainland		
	Population 18-24 Years of Age	Higher Education Enrollment	Percent <sup>(1)</sup>	Population 18-24 Years of Age	Higher Education Enrollment	Percent <sup>(1)</sup>
1970	341,448 <sup>(2)</sup>	57,340	16.8%	23,714,000 <sup>(2)</sup>	8,580,887	36.2%
1980	397,839 <sup>(2)</sup>	130,105	32.7%	30,022,000 <sup>(2)</sup>	12,096,895	40.3%
1990	417,636 <sup>(2)</sup>	156,147	37.4%	26,961,000 <sup>(2)</sup>	13,818,637	51.3%

Sources: U.S. Census Bureau (U.S. Mainland Population), U.S. National Center for Education Statistics (NCES), Planning Board (Puerto Rico Population) and Council on Higher Education of Puerto Rico

The University of Puerto Rico, the only public university in Puerto Rico, has eleven campuses located throughout the island. The University's total enrollment for academic year 2010-2011 was approximately 61,722 students. The Commonwealth appropriates annually for the University of Puerto Rico an amount equal to 9.60% of the average annual revenue from internal sources (subject to certain exceptions) for each of the two fiscal years immediately preceding the current fiscal year.

In addition to the University of Puerto Rico, there are 40 public and private institutions of higher education located in Puerto Rico. Such institutions had an enrollment during academic year 2010-2011 of approximately 188,470 students and provide programs of study in liberal arts, education, business, natural sciences, technology, secretarial and computer sciences, nursing, medicine, and law. Degrees are offered by these institutions at the associate, bachelor, master, and doctoral levels.

Institutions providing education in Puerto Rico must satisfy state licensing requirements to operate. Also, the vast majority of educational institutions are accredited by United States Department of Education-recognized accrediting entities.

## **Tax Incentives**

One factor that has promoted and continues to promote the development of the manufacturing and service sector in Puerto Rico is the various local and federal tax incentives available, particularly those under Puerto Rico's Industrial Incentives Program and, until 2006, Sections 30A and 936 of the U.S. Code. Tax and other incentives have also been established to promote the development of the tourism industry. These incentives are summarized below.

### *Industrial Incentives Program*

Since 1948, Puerto Rico has had various incentives laws designed to promote investment and job creation. Under these laws, companies engaged in manufacturing and certain other designated activities were eligible to receive full or partial exemption from income, property, and other local taxes. The most recent of these incentives laws is the Economic Incentives Act, enacted in May 2008 (the "Economic Incentives Act").

The benefits provided by the Economic Incentives Act are available to new companies as well as companies currently conducting tax-exempt operations in Puerto Rico that choose to renegotiate their existing tax exemption grants, expand current operations or commence operating a new eligible business. The activities eligible for tax exemption under the Economic Incentives Act include manufacturing and laboratories for research and development, and originally included certain designated services performed for markets outside Puerto Rico (including the United States), the production of energy from local renewable sources for consumption in Puerto Rico. The Economic Incentives Act expands the definition of eligible business from that included in Act No. 135 of December 2, 1997, as amended (the "1998 Tax Incentives Act"), to include clusters and supply chains.

Companies qualifying under the Economic Incentives Act can benefit from a simplified income tax system: in most cases, an income tax rate of 4% and a withholding tax rate of 12% on royalty payments. Alternatively, the income tax rate can be 8% and a withholding rate of 2% on royalty payments. Special rates apply to projects located in low and mid-development zones (an income tax reduction of 0.5%), certain local projects (an income tax rate as low as 3%), certain small- and medium-sized businesses (an income tax rate as low as 1%) and pioneering activities (an income tax rate of 1%, but for those using intangible property created or developed in Puerto Rico the income tax rate may be 0%). In addition, as with the 1998 Tax Incentives Act, the Economic Incentives Act grants 90% exemption from property taxes, 100% exemption from municipal license taxes during the first three semesters of operations and at least 60% thereafter, and 100% exemption from excise taxes, and sales and use taxes with respect to the acquisition of raw materials and certain machinery and equipment used in the exempt activities.

The Economic Incentives Act is designed to stimulate employment and productivity, research and development, capital investment, reduction in the cost of energy and increased purchase of local products.

Under the Economic Incentives Act, as with the 1998 Tax Incentives Act, companies can repatriate or distribute their profits free of Puerto Rico dividend taxes. In addition, passive income derived by exempted businesses from the investment of eligible funds in Puerto Rico financial institutions, obligations of the Commonwealth, and other designated investments is fully exempt from income and municipal license taxes. Gain from the sale or exchange of shares or substantially all the assets of an exempted business during the exemption period that is otherwise subject to Puerto Rico income tax would be subject to a special Puerto Rico income tax rate of 4%.

The Economic Incentives Act, like the 1998 Tax Incentives Act, also provides investors that acquire an exempted business that is in the process of closing its operations in Puerto Rico a 50% credit in connection with the cash purchase of such corporation's stocks or operational assets.

#### *Individual Investors Act and Export Services Act*

On January 17, 2012, the Legislative Assembly of Puerto Rico approved new legislation to promote the economic development of Puerto Rico: (i) Act No. 22, also known as the Act to Promote the Relocation of Individual Investors to Puerto Rico (the "Individual Investors Act), and (ii) Act No. 20, also known as the Act to Promote the Exportation of Services (the "Export Services Act"), which supersedes the provisions of the Economic Incentives Act that provide benefits to designated services performed for markets outside of Puerto Rico.

The Individual Investors Act seeks to attract new residents to Puerto Rico by providing total exemption from Puerto Rico income taxes on passive income realized or accrued after such individuals become bona fide residents of Puerto Rico. The Individual Investors Act applies to any individual investor that becomes a Puerto Rico resident on or before the taxable year ending on December 31, 2035, provided that such individual was not a resident of Puerto Rico at any time during the 15-year period preceding the effective date of the Individual Investors Act. This relocation is expected to result in new local investments in real estate, services, and other

consumption products, and in capital injections to the Puerto Rico banking sector, all of which would stimulate the economy of Puerto Rico.

The Export Services Act seeks to establish and develop in Puerto Rico an international export services center. This act seeks to encourage local service providers to expand their services to persons outside of Puerto Rico, promote the development of new businesses in Puerto Rico and stimulate the inbound transfer of foreign service providers to Puerto Rico. The Export Services Act also creates a special fund for the continuous development of new tax incentives that will promote export services and the establishment of new businesses in Puerto Rico. The Export Services Act applies with respect to any entity with a bona fide office or establishment located in Puerto Rico that is or may be engaged in an eligible service. Service providers operating under a tax exemption decree issued under the Export Services Act will enjoy various Puerto Rico tax incentives during the term of such decree, such as a 4% flat income tax rate on export services income and 100% tax-exempt dividend distributions.

### *Green Energy Incentives Program*

On July 19, 2010 the Legislative Assembly enacted Act No. 83-2010 (“Act 83”), also known as the “Green Energy Incentives Act”, to encourage the production of renewable energy on a commercial scale. The activities eligible for tax exemption under the Green Energy Incentives Act include businesses engaged in the production and sale of green energy on a commercial scale for consumption in Puerto Rico, a producer of green energy, the assembly and installation of machinery and equipment for the production of green energy, and the leasing of property used for the production of green energy (not including financing leases).

Companies qualifying under the Green Energy Incentives Act can avail themselves of the following tax benefits: a preferential income tax rate of 4% on income derived from eligible activities and a withholding tax rate of 12% on royalty payments, license fees and rental payments to non-Puerto Rico resident companies. In addition, the Green Energy Incentives Act grants a 90% exemption from property taxes, a 100% exemption from municipal license taxes during the first three semesters of operations and at least 60% thereafter, and a 100% exemption from excise taxes, and sale and use taxes with respect to the acquisition of raw materials and certain machinery and equipment used in the exempt activities. In order to enjoy these tax benefits, an eligible business must request and obtain a grant of tax exemption, which is a contract between the Commonwealth and the exempt business, and has a term of 25 years.

Under the Green Energy Incentives Act, companies can repatriate or distribute their earnings and profits derived from the eligible activities free of Puerto Rico income taxes. Gain from the sale or exchange of shares or substantially all the assets of an exempted business during the exemption period that is otherwise subject to Puerto Rico income tax would be subject to a special Puerto Rico income tax rate of 4%.

The Green Energy legislation also provides incentives for the construction and use of renewable energy sources, and creates a Green Energy Fund through which the Commonwealth will co-invest \$290 million in renewable energy projects over the next ten years. These initiatives are intended to address energy prices in Puerto Rico and provide a means for attracting investment

in the energy sector. The fund will provide reimbursements for the installation of renewable energy generating equipment of up to 40% for residential and small businesses, and up to 50% for medium sized businesses and industries. This funding initiative will also provide access to Renewable Energy Certificates (“RECs”) to help finance renewable energy projects at a utility scale level. A REC is a personal asset that is marketable and negotiable. It can be bought, sold, assigned, and transferred between individuals for any lawful purpose, and as a whole, indivisible asset, it is equivalent to one Megawatt-hour of electricity generated by a source of sustainable or alternative renewable energy.

During fiscal years 2012 and 2013, 370 renewable energy projects were approved, of which 90 projects were completed. Between July and September of 2013, 62 projects were completed with Green Energy Fund incentives, representing an investment of more than \$11 million and the creation of approximately 100 professional and technical jobs in the areas of design and construction.

### *Tourism Incentives Program*

For many years, Puerto Rico has enacted incentives laws designed to stimulate investment in hotel operations on the island. The Puerto Rico Tourism Development Act of 2010 (the “Tourism Development Act”) provides partial exemptions from income, property, and municipal license taxes for a period of ten years. The Tourism Development Act also provides certain tax credits for qualifying investments in tourism activities, including hotel and condo-hotel development projects. The Tourism Development Act provides further tourism incentives by granting tax exemption on interest income, fees and other charges received with respect to bonds, notes, or other obligations issued by tourism businesses for the development, construction, rehabilitation, or improvements of tourism projects.

As part of the incentives to promote the tourism industry, in 1993 the Commonwealth established the Puerto Rico Tourism Development Fund (“TDF”) as a subsidiary of GDB with the authority to (i) make investments in or provide financing to entities that contribute to the development of the tourism industry and (ii) provide financial guarantees and direct loans for financing tourism development projects. To date, TDF has provided direct loans and guaranteed loans and bonds in the aggregate amount of approximately \$1.5 billion for 28 tourism projects representing 5,448 new hotel rooms and a total investment of approximately \$2.5 billion.

### *Treatment of Puerto Rico Corporations under the U.S. Code - Controlled Foreign Corporations*

As a result of the modification and phase-out of the federal tax incentives under Section 936 of the U.S. Code, many corporations previously operating thereunder reorganized their operations in Puerto Rico to become controlled foreign corporations (“CFCs”). A CFC is a corporation that is organized outside the United States (including, for these purposes, in Puerto Rico) and is controlled by United States shareholders. In general, a CFC may defer the payment of federal income taxes on its trade or business income until such income is repatriated to the United States in the form of dividends or through investments in certain United States properties. Most of the major pharmaceutical, instrument and electronics manufacturing companies in Puerto Rico have converted part or all of their operations to CFCs.

CFCs operate under transfer pricing rules for intangible income that are different from those applicable to United States corporations operating under Section 936 of the U.S. Code (“Section 936 Corporations”). In many cases, they are allowed to attribute a larger share of this income to their Puerto Rico operation but must make a royalty payment “commensurate with income” to their United States affiliates. Section 936 Corporations were exempted from Puerto Rico withholding taxes on any cost-sharing payments they might have opted to make, but CFCs are subject to a 15% Puerto Rico withholding tax on royalty payments, unless they have a renegotiated Puerto Rico tax grant issued under the Economic Incentives Act, in which case this withholding tax could be lowered to 2% or 12%.

In May 2009, the United States Treasury Department announced proposed changes to the U.S. Code that include, among others, changes to remove incentives for shifting jobs overseas. The Ways and Means Committee of the House of Representatives has also held recent hearings and released a tax policy white paper that puts forth certain proposed changes to the U.S. Code to combat base erosion and profit shifting by U.S. and foreign multinational corporations. While these initiatives are not directed at Puerto Rico, several of them could affect CFCs operating in Puerto Rico. As of this date, no legislation has been approved by either House of Congress of the United States. It is not possible at this time to determine the legislative changes that may be made to the U.S. Code, or their effect on the long-term outlook on the economy of Puerto Rico. The Commonwealth is developing policy responses to the United States government to seek to safeguard Puerto Rico's economic growth and development plans.

## **DEBT**

### **Public Sector Debt**

Public sector debt comprises bonds and notes of the Commonwealth, its municipalities and public corporations (“notes” as used in this section refers to certain types of non-bonded debt regardless of maturity), subject to the exclusions described below.

Section 8 of Article VI of the Commonwealth Constitution provides that public debt of the Commonwealth will constitute a first claim on available Commonwealth resources. For purposes of the Constitution, however, “public debt” includes only general obligation bonds and notes of the Commonwealth to which the full faith, credit and taxing power of the Commonwealth are pledged and, according to opinions rendered by the Attorney General of the Commonwealth, also any payments required to be made by the Commonwealth under its guarantees of bonds and notes issued by its public instrumentalities. It does not include other obligations of the Commonwealth or obligations of public instrumentalities that are not guaranteed by the Commonwealth. As explained below, the portion of the Sales Tax allocated to COFINA is not considered “available Commonwealth resources” under the Constitution.

Section 2 of Article VI of the Constitution of the Commonwealth provides that direct obligations of the Commonwealth evidenced by full faith and credit bonds or notes shall not be issued if the amount of the principal of, and interest on, such bonds and notes and on all such bonds and notes theretofore issued that is payable in any fiscal year, together with any amount paid

by the Commonwealth in the fiscal year preceding the fiscal year of such proposed issuance on account of bonds or notes guaranteed by the Commonwealth, exceed 15% of the average annual revenues raised under the provisions of Commonwealth legislation and deposited into the treasury (hereinafter, “internal revenues”) in the two fiscal years preceding the fiscal year of such proposed issuance. Section 2 of Article VI does not limit the amount of debt that the Commonwealth may guarantee so long as the 15% limitation is not exceeded through payments by the Commonwealth on such guaranteed debt. Internal revenues consist principally of income taxes, property taxes, sales taxes and excise taxes. Certain revenues, such as federal excise taxes on offshore shipments of alcoholic beverages and tobacco products and customs duties, which are collected by the United States Government and returned to the Treasury Department, and motor vehicle fuel taxes, crude oil and derivative products excise taxes and license fees, which are allocated to the Highway and Transportation Authority, are not included as internal revenues for the purpose of calculating the debt limit, although they may be available for the payment of debt service. In addition, the portion of the Sales Tax allocated to COFINA is not included as internal revenues since the legislation that created COFINA transferred ownership of such portion of the Sales Tax to COFINA and provided that such portion was not “available resources” under the Constitutional provisions relating to full faith and credit bonds.

As of June 30, 2013 future maximum annual debt service for the Commonwealth’s outstanding general obligation debt is \$989,231,968 in the fiscal year ending on June 30, 2016 (based on the assumption that variable rate bonds bear interest at the maximum rate of 12% per annum). This amount *plus* the amount paid by the Commonwealth in fiscal year 2013 on account of bonds or notes guaranteed by the Commonwealth (\$17,315,000) totals \$1,006,546,968, which is equal to 12.44% of \$8,089,241,500, which is the average of the adjusted internal revenues for the fiscal years ended June 30, 2012 and 2013. If the interest on the variable rate outstanding bonds described above was calculated using the effective fixed interest rate payable by the Commonwealth after taking into consideration the interest rate exchange agreements entered into in respect thereof, the future maximum annual debt service for the Commonwealth outstanding general obligations debt would be \$948,635,824 in fiscal year 2020 and the percentage referred to in the preceding sentence would be 11.94%. The potential termination payment (which is a full faith and credit obligation of the Commonwealth) payable by the Commonwealth (based on the then applicable mark-to-market value) upon termination of the above mentioned interest rate swap agreements is not included in the calculation of the 15% constitutional debt limitation. For a discussion of the Commonwealth’s obligations under its interest rate exchange agreements, see “Interest Rate Exchange Agreements” below.

Except as set forth below, annual debt service payments on bonds guaranteed by the Commonwealth are not included in the calculation of the 15% debt limitation. In the event any of the public corporations issuers of guaranteed bonds are unable to make any portion of the future debt service payments on its guaranteed bonds, the Commonwealth would be required to make such payments under its guarantee from the General Fund, and such debt service would be included in the calculation of the 15% constitutional debt limitation.

As of June 30, 2013, Port of the Americas Authority (“PAA”) had outstanding bonds guaranteed by the Commonwealth (the “PAA Guaranteed Bonds”), representing a \$250 million GDB financing with an outstanding principal amount of \$220.0 million. The Commonwealth has

begun to make payments of debt service on the PAA Guaranteed Bonds and expects to make all payments on the PAA Guaranteed Bonds under the full faith and credit guarantee of the Commonwealth. During fiscal year 2013, the Commonwealth made payments under its guaranty of the PAA Guaranteed Bonds of \$17.1 million. See “Commonwealth Guaranteed Debt” below.

Debt of municipalities, other than bond anticipation notes, is supported by real and personal property taxes and municipal license taxes. Debt of public corporations, other than bond anticipation notes, is generally supported by the revenues of such corporations from rates charged for services or products. See “Public Corporations.” However, certain debt of public corporations is supported, in whole or in part, directly or indirectly, by Commonwealth appropriations or taxes.

Direct debt of the Commonwealth (other than refunding bonds) is issued pursuant to specific legislation approved in each particular case. Debt of the municipalities is issued pursuant to ordinances adopted by the respective municipal legislatures. Debt of public corporations is issued in accordance with their enabling statutes. GDB, as fiscal agent of the Commonwealth and its municipalities and public corporations, must approve the specific terms of each issuance.

The following table presents a summary of public sector debt as of June 30, 2013. This table includes debt primarily payable from Commonwealth or municipal taxes, Commonwealth appropriations and rates charged by public corporations for services or products, as well as debt payable from other sources, some of which debt is set forth in footnote 6 below. Excluded from the table is debt the inclusion of which would reflect double counting including, but not limited to, \$821.9 million of outstanding bonds (as of June 30, 2013) issued by Municipal Finance Agency to finance its purchase of bonds of Puerto Rico municipalities. The table does not include \$673 million of bonds issued by PREPA on August 15, 2013.

**Commonwealth of Puerto Rico**  
**Public Sector Debt**  
**(in millions)**

	<u><b>June 30, 2013</b></u>
Full faith and credit bonds and notes issued by the Commonwealth	\$10,599
Bonds and notes guaranteed by the Commonwealth's full faith and credit <sup>(1)</sup>	5,634
<b>SUBTOTAL- FULL FAITH AND CREDIT BONDS AND NOTES</b>	<u><b>16,233</b></u>
Debt supported by Puerto Rico appropriations or taxes <sup>(2)</sup>	4,043
Tax and Revenue Anticipation Notes <sup>(3)</sup>	---
<b>SUBTOTAL- DEBT PAYABLE FROM GENERAL FUND</b>	<u><b>\$20,276</b></u>
Bonds and notes payable from sales tax revenues (COFINA)	\$15,224
Debt issued by public corporations and other instrumentalities <sup>(4)</sup>	25,575
Debt issued by municipalities	3,882
Pension Funding Bonds (payable from employer contributions to ERS) <sup>(5)</sup>	2,948
Other limited obligation debt and non-recourse debt <sup>(6)</sup>	2,138
<b>SUBTOTAL- OTHER PUBLIC SECTOR DEBT</b>	<u><b>49,767</b></u>
 <b>TOTAL PUBLIC SECTOR DEBT</b>	 <u><u><b>\$70,043</b></u></u>

Totals may not add due to rounding.

<sup>(1)</sup> Consists of \$651 million of bonds issued by Aqueduct and Sewer Authority, \$470 million of State Revolving Fund Loans incurred under various federal water laws, \$220.4 million of bonds issued by Port of the Americas Authority and \$4,293.5 million of PBA bonds. Excludes \$267 million of GDB bonds payable from available moneys of GDB.

<sup>(2)</sup> Represents bonds and notes payable from the Commonwealth General Fund and Public Improvement Fund. Includes Public Finance Corporation bonds.

<sup>(3)</sup> Does not include approximately \$1.2 billion in Tax and Revenue Anticipation Notes ("TRANS") issued during fiscal year 2014, \$300 million of which are revolver notes placed with the GDB. The TRANS usually have a pledge of, and are payable from, all taxes and revenues received by the General Fund starting on March 31 of the relevant fiscal year through June 30 of such fiscal year, together with any taxes and revenues collected after the issuance of the TRANS and on deposit in the General Fund on April 1 of such fiscal year, after any required transfers from the General Fund to the payment of the general obligation bonds and notes.

<sup>(4)</sup> Excludes \$4.7 billion of notes issued by GDB, the proceeds of which have been principally used to fund loans to the Commonwealth, public corporations, agencies and municipalities. Excludes also \$673.1 million in Power Revenue Bonds issued by PREPA in August 2013. Loans made by GDB to the Commonwealth, public corporations, agencies and municipalities are included in the table.

<sup>(5)</sup> Represents Senior Pension Funding Bonds, Series A, B, and C issued by the Employees Retirement System, which are payable solely from employer contributions made to the Employees Retirement System by the Commonwealth and its instrumentalities after the issuance of the bonds. The Commonwealth does not guarantee such bonds. Employer contributions made to the Employees Retirement System by the central government and its agencies and therefore payable from the General Fund currently represent approximately 59% of such total employer contributions. The balance of these contributions is made by the public corporations and the municipalities.

<sup>(6)</sup> Includes the following: (i) \$1.2 billion of Children's Trust bonds, which are payable solely from the payments to be received pursuant to the tobacco litigation settlement; (ii) \$161.2 million of Housing Finance Authority bonds, which are payable from Puerto Rico Housing Administration's annual allocation of Public Housing Capital Funds from the United States Department of Housing and Urban Development ("HUD"); (iii) \$319.9 million of Capital Fund Modernization Program Subordinate Bonds, Series 2008 issued by the Housing Finance Authority and payable primarily from federal housing assistance payments made available by HUD; (iv) \$145.9 million of Special Facilities Revenue Bonds issued by Highways and Transportation Authority, which are payable from net toll revenues collected from the Teodoro Moscoso Bridge; (v) \$155 million of Special Facilities Bonds issued by PRPA, which are solely payable from the pledge of certain payments made by a private corporation under a special facilities agreement; (vi) \$72.7 million of Educational Facilities Revenue Bonds, 2000 Series A (University Plaza Project) issued by Industrial, Tourist, Educational, Medical and Environmental Control Facilities Financing Authority ("AFICA"), which are payable from rent payments made by the University of Puerto Rico; and (vii) approximately \$39.1 million of bonds issued by AFICA to finance the construction of various government infrastructure projects, which are payable from rent payments made by various government entities.

Source: Government Development Bank for Puerto Rico

No deductions have been made in the table above for deposits on hand in debt service funds and debt service reserve funds. The table above and the amounts shown throughout this section as representing outstanding debt include outstanding capital appreciation bonds at their respective original principal amounts and do not include any accretion thereon.

### **Debt Service Requirements for Commonwealth General Obligation Bonds, Appropriation Bonds and Certain Guaranteed Debt**

The following table presents the debt service requirements for Commonwealth general obligation and appropriation bonds outstanding and PBA bonds guaranteed by the Commonwealth as of June 30, 2013. This table, however, does not include (i) payments made by the Commonwealth on \$220.4 million PAA Guaranteed Bonds, which are paid from General Fund budgetary appropriations determined in consultation with GDB, as holder of the PAA Guaranteed Bonds; (ii) \$651 million of bonds issued by Aqueduct and Sewer Authority which are guaranteed by the Commonwealth; and (iii) \$469 million of State Revolving Fund Loans incurred under various federal water laws. Debt service on items (ii) and (iii) is currently being paid by PRASA and the Commonwealth has not made payments on this debt under its guarantee since 2005. The table also excludes \$267 million of GDB bonds guaranteed by the Commonwealth but payable from available moneys of GDB. The amounts paid by the Commonwealth under the PAA Guaranteed Bonds for the prior fiscal year, however, are taken into account in the determination of the constitutional debt limit.

In addition, in respect of certain variable rate general obligation bonds, as to which the Commonwealth has entered into interest rate exchange agreements, the interest in the table is calculated by using the respective fixed rates of interest that the Commonwealth is paying under said agreements.

Debt service requirements for each fiscal year, as shown in the following table, include principal and interest due on July 1 immediately following the close of such fiscal year.

**Commonwealth Debt Service Requirements**  
(In thousands)

Fiscal Year Ending June 30	General Obligation Bonds		PBA Bonds		Appropriation Bonds <sup>(3)</sup>		Total
	Principal	Interest <sup>(1)</sup>	Principal	Interest <sup>(2)</sup>	Principal	Interest	
2013	\$384,235	\$448,619	\$72,595	\$243,651	-	\$15,758	\$1,164,858
2014	376,453	452,614	76,760	235,371	-	15,758	1,156,955

	<u>\$10,598,985</u>	<u>\$8,334,534</u>	<u>\$4,293,494</u>	<u>\$4,113,102</u>	<u>\$1,090,740</u>	<u>\$735,999</u>	<u>\$29,166,853</u>

Totals may not add due to rounding. Interest payments on certain variable rate general obligation bonds are calculated at their effective fixed rate after giving effect to related interest rate exchange agreements. Table does not include (i) payments made by the Commonwealth on \$220.4 million PAA Guaranteed Bonds, which are paid from General Fund budgetary appropriations determined in consultation with GDB, as holder of the PAA Guaranteed Bonds; (ii) \$651 million of bonds issued by PRASA which are guaranteed by the Commonwealth; (iii) \$469 million of State Revolving Fund Loans incurred under various federal water laws; (iv) \$267 million of GDB bonds guaranteed by the Commonwealth but payable from available moneys of GDB; and (v) short-term notes and other borrowings to be refinanced with long term debt. Debt service on items (ii) and (iii) is currently being paid by PRASA and the Commonwealth has not made payments on this debt under its guarantee since 2005. Debt service on item (iv) is currently being paid by GDB and the Commonwealth has never had to make payments under its guarantee.

<sup>(1)</sup> The figures for interest have been reduced by the interest that was capitalized through the issuance of Commonwealth general obligation bonds in the following amounts: \$97.0 million in fiscal year 2014 and \$73.9 million in fiscal year 2015.

<sup>(2)</sup> The figures for interest have not been reduced by the credit payment of the Qualified Zone Academy Bonds and Qualified School Construction Bonds of Series R and T.

<sup>(3)</sup> Consists of debt issued by the Public Finance Corporation. In contrast to general obligation debt and PBA debt listed herein, this debt is not guaranteed by the full faith credit and taxing power of the Commonwealth.

## Interest Rate Exchange Agreements

*General.* The Commonwealth and various public corporations are parties to various interest rate exchange agreements or swaps. Except for the basis swaps discussed below, the purpose of all of the interest rate exchange agreements currently in place is to hedge the Commonwealth's variable rate debt exposure and the interest rate risks associated therewith. Historically, when the Commonwealth or a public corporation has issued variable rate bonds, it has entered into an interest rate exchange agreement with a counterparty pursuant to which the Commonwealth or the public corporation agrees to pay the counterparty a fixed rate and the counterparty agrees to pay the Commonwealth or public corporation a variable rate intended to match the variable rate payable on the bonds (a "synthetic fixed rate swap"). In theory, the variable rate payments received by the Commonwealth under the swap off-set the variable rate payments on the bonds and, thus, provided the counterparty does not default, the Commonwealth or the public corporation is left with a net fixed rate payment to the counterparty. The purpose of these swaps was to lower the all-in cost of borrowing below what could have been achieved by issuing fixed rate bonds.

*Basis Swaps.* The Commonwealth and PREPA are also parties to agreements ("basis swaps"), entered into in June 2006 and March 2008, respectively, pursuant to which they are making payments on a specified notional amount based on a short-term interest rate index published by the Securities Industry and Financial Markets Association ("SIFMA") and are receiving from their counterparties payments on the same notional amount based on the published three-month London Interbank Offered Rate ("LIBOR") plus a specified fixed rate payment (the "basis annuity"). The basis swaps are the only interest rate exchange agreements that do not hedge specific variable rate debt. For fiscal years 2012 and 2013, the Commonwealth received \$9.8 million and \$7.5 million, respectively, from its counterparties under the basis swap, net of the Commonwealth's payments to the counterparties, and PREPA received \$11.1 million and \$9.1 million, respectively, from its counterparty under the basis swap, net of PREPA's payments to the counterparty. In October 2012, the Commonwealth terminated, at no cost, \$424.6 million of its basis swap. In addition, (i) in January 2012, PREPA received approximately \$265,000 in connection with the unwinding of \$225 million of notional amount of the basis swap; (ii) in May 2012, PREPA assigned \$600 million in notional amount of its basis swap to two highly rated counterparties in order to further diversify its counterparty exposure (PREPA sold to each dealer the right to convert the basis annuity to a straight percentage of three-month LIBOR); and (iii) in April 2013 and June 2013, PREPA terminated \$100 million in notional amount and \$50 million in notional amount, respectively, of the basis swap.

*Risks.* By using derivative financial instruments, the Commonwealth exposes itself, among other risks, to credit risk (based on the counterparty's ability to perform under the terms of the agreement), market risk (based on the changes in the value of the instrument resulting from changes in interest rates and other market factors) and, in the case of basis swaps, basis risk (based on changes to the correlation between different indexes used in connection with a derivative and the variable rate debt they hedge). GDB, as fiscal agent, regularly monitors the exposure of the Commonwealth and the public corporations under the interest rate exchange agreements and

attempts to minimize the risks. To minimize some of the credit risk, the Commonwealth and the public corporations enter into agreements with highly-rated counterparties. The outstanding interest rate exchange agreements are with ten different counterparties, all of which, except one, are rated in one of the three highest rating categories by either Moody's or S&P. In addition, most of the agreements contain requirements of posting collateral by the counterparties based on certain valuation thresholds and credit ratings.

During fiscal years 2009 through 2013, in order to reduce the risks associated with the swap portfolio, the Commonwealth and the public corporations terminated approximately \$4.9 billion of swaps. The aggregate notional amount of the swaps for the Commonwealth and the public corporations has decreased from \$9.2 billion as of June 30, 2008, to \$4.1 billion as of June 30, 2013, an aggregate decrease of 55%.

*Notional Amounts.* The table below shows the aggregate notional amount, as of June 30, 2013, of synthetic fixed rate swaps and basis swaps of the Commonwealth and the public corporations.

**Swap Portfolio Breakdown**  
**Notional Amount**  
(as of June 30, 2013)

	<u>Synthetic Fixed</u>	<u>Basis Swaps</u>	<u>Total</u>
Commonwealth (General Obligation)	\$587,565,000	\$1,273,777,500	\$1,861,342,500
Electric Power Authority	411,825,000	1,000,000,000	1,411,825,000
Highways and Transportation Authority	647,025,000	—	647,025,000
Sales Tax Financing Corporation	136,000,000	—	136,000,000
Total	<u>\$1,782,415,000</u>	<u>\$2,273,777,500</u>	<u>\$4,056,192,500</u>

*Market Value.* Generally, the interest rate exchange agreements may be terminated by the Commonwealth or the public corporations at any time at their then current market values. The agreements may also be terminated upon the occurrence of certain credit events. If a termination occurs due to a credit event, the Commonwealth or the public corporations may be obligated to pay to the applicable swap counterparty an amount based on the terminating swap's market value, which may be substantial, or vice versa, with other termination costs being paid by the defaulting party. The mark-to-market value of the swaps fluctuates with interest rates and other market conditions. The Commonwealth's obligations under the interest rate exchange agreements are secured by the full faith, credit and taxing power of the Commonwealth but do not constitute "public debt" under the Commonwealth Constitution which has a first claim on available Commonwealth resources.

The following table shows, as of June 30, 2013, the net mark-to-market value of all outstanding interest rate exchange agreements. The mark-to-market value of all swaps of the Commonwealth and the public corporations was negative as of June 30, 2013. Thus, the Commonwealth or the public corporations, as applicable, would owe money to the counterparties if any of the agreements with a negative mark-to-market had been terminated as of that date.

**Swap Portfolio Mark-to-Market Valuation**  
(as of June 30, 2013)

	<u>Synthetic Fixed</u>	<u>Basis Swaps</u>	<u>Total</u>
Commonwealth (General Obligation)	\$(92,840,070)	\$(22,480,767)	\$(115,320,837)
Electric Power Authority	(70,970,521)	(7,611,687)	(78,582,208)
Highways and Transportation Authority	(142,417,740)	—	(142,417,740)
Sales Tax Financing Corporation	(55,711,062)	—	(55,711,062)
Total	<u>\$(361,939,393)</u>	<u>\$(30,092,454)</u>	<u>\$(392,031,847)</u>

*Collateral Requirements.* Under the majority of the interest rate exchange agreements, the Commonwealth and the public corporations are required to deliver collateral to the counterparties to guarantee their performance under the agreements based on the credit ratings of the Commonwealth and the public corporations and certain contractual mark-to-market value thresholds. In accordance with these requirements, the Highways and Transportation Authority had posted collateral of \$41.5 million to its swap counterparties as of June 30, 2013, and PREPA was required to post collateral of \$31.1 million as of the same date. If the mark-to-market value of the swap portfolio deteriorates or the credit ratings of the Commonwealth or the public corporations are lowered, the collateral posting obligations contained in the agreements may require further deliveries of collateral. As of September 30, 2013, a one-notch downgrade of current credit ratings for the Commonwealth general obligations, PREPA and PRHTA, would have required delivery of additional collateral of approximately \$75.9 million, \$39.2 million and \$124.8 million, respectively. In the case of the Commonwealth general obligations, if the downgrade continues for 90 days, two of the swaps for a total of approximately \$34.2 million may be terminated. Further downgrades could trigger termination events under the interest rate exchange agreements.

**Variable Rate Bonds and Mandatory Tender Bonds**

*Variable Rate Bonds.* The Commonwealth and various public corporations have outstanding variable rate bonds, consisting of (i) variable rate demand bonds which are subject to mandatory tender for purchase prior to their maturity on certain interest rate reset dates and upon expiration of an associated credit or liquidity facility (“VRDO Bonds”), (ii) variable rate bonds and notes that have been purchased directly from the Commonwealth by certain financial institutions which provide for periodic interest rate changes based on the LIBOR or SIFMA index and which are subject to mandatory tender on certain dates prior to their maturities (“Mandatory Tender FRNs”), and (iii) other bonds and notes which provide for periodic interest rate changes based on the LIBOR rate or a particular index, but which are not subject to tender prior to their maturity. The Commonwealth and the public corporations have hedged substantially all of their variable rate debt exposure by entering into interest rate exchange agreements with certain swap providers. Pursuant to these agreements, the Commonwealth and the public corporations receive a variable rate payment expected to approximate the interest cost of the variable rate bonds, and pay a fixed rate. See “Interest Rate Exchange Agreements.”

The following table shows the breakdown of variable rate debt of the Commonwealth and the public corporations as of June 30, 2013.

**Variable Rate Debt Breakdown**  
(as of June 30, 2013)

	<u>VRDO Bonds</u>	<u>Mandatory Tender FRNs</u>	<u>Other Variable Rate Debt</u>	<u>Total</u>
Commonwealth (General Obligation)	\$203,625,000	\$257,215,000	\$126,725,000	\$587,565,000
Electric Power Authority	—	—	411,825,000	411,825,000
Highways and Transportation Authority	200,000,000	—	447,025,000	647,025,000
Sales Tax Financing Corporation	—	—	136,000,000	136,000,000
Total	<u>\$403,625,000</u>	<u>\$257,215,000</u>	<u>\$1,121,575,000</u>	<u>\$1,782,415,000</u>

*VRDO Bonds.* The VRDO Bonds bear a floating interest rate adjusted at specified intervals, such as daily or weekly (each, a “remarketing date”) and provide investors the option to tender or put the bonds at par on each remarketing date. The tendered bonds are then resold by a remarketing agent in the secondary market to other investors. The VRDO Bonds are secured by letters of credit or other liquidity or credit facilities (“credit/liquidity facilities”) that provide for the payment of the purchase price payable upon the tender of the bonds. The credit/liquidity facilities expire prior to the final maturity of the bonds. If, upon the expiration or termination of any credit/liquidity facility with respect to a series of VRDO Bonds, the Commonwealth or the applicable public corporation is unable to renew or replace such facility with an alternate credit/liquidity facility, the VRDO Bonds of such series are subject to mandatory tender for purchase by the credit/liquidity facility provider and generally become subject to higher interest rates and accelerated amortization schedules pursuant to the terms of each expiring credit/liquidity facility.

The United States financial market crisis that begun in 2008 has resulted in a significant reduction in the availability of credit and liquidity facilities to support VRDO Bonds, and a related increase in the price of these facilities when they can be obtained. Thus, if the Commonwealth and the public corporations are not able to renew or rollover the expiring credit/liquidity facilities with respect to VRDO Bonds, or are not able to do so at an acceptable price, the Commonwealth and the public corporations would have to refinance the VRDO Bonds or otherwise obtain financing for such bonds in order to avoid the higher interest rates and accelerated amortization schedules set forth in the expiring credit/liquidity facility.

In addition, since there are interest rate exchange agreements with respect to all VRDO Bonds, if the Commonwealth or the applicable public corporation cannot renew or replace a credit/liquidity facility upon its expiration or remarket the related series of bonds successfully upon their mandatory tender as variable rate bonds, the Commonwealth or the applicable public corporation may have to terminate the interest rate exchange agreements associated with such series of VRDO Bonds. Termination of the applicable interest rate exchange agreement may result, depending on then current interest rate levels and market conditions, in the payment of a termination amount, which may be substantial, by the Commonwealth or the applicable public corporation to compensate the counterparty for its economic losses. As of June 30, 2013, the mark-to-market value of all the interest rate exchange agreements with respect to VRDO Bonds was negative \$35.2 million for the Commonwealth and negative \$38.6 million for the public corporations. See “Interest Rate Exchange Agreements – Market Value.”

The following table shows, by fiscal year, the amount of VRDO Bonds subject to mandatory tender upon expiration of the applicable credit/liquidity facilities.

**VRDO Bonds Rollover**  
(by Fiscal Year)

	<b>2014</b>
Commonwealth (General Obligation)	\$203,625,000
Highways and Transportation Authority	\$200,000,000
Total	\$403,625,000

*Mandatory Tender FRNs and Mandatory Tender Fixed Rate Bonds.* As of June 30, 2013, the Commonwealth had outstanding \$257.2 million of Mandatory Tender FRNs and PBA had \$129.2 million of fixed rate bonds guaranteed by the Commonwealth that were subject to mandatory tender for purchase prior to maturity (collectively, the “Mandatory Tender Bonds”). The Commonwealth and the public corporations have not provided any liquidity facility for the payment of the purchase price payable upon the mandatory tender, which purchase price is expected to be obtained from the remarketing of the bonds. If the Commonwealth or the applicable public corporation cannot remarket the Mandatory Tender Bonds, they would have to obtain other funds in order to provide for the purchase price of these bonds or, in some cases, the bonds would become subject to higher interest rates and an accelerated amortization schedule.

The following table shows, as of June 30, 2013, the breakdown of the Mandatory Tender Bonds of the Commonwealth and the public corporations and the respective dates when such bonds are subject to mandatory tender for purchase.

**Mandatory Tender Bonds Breakdown**  
(as of June 30, 2013)

	<u>Mandatory Tender Bonds</u>	<u>Type</u>	<u>Mandatory Tender Date</u>
Commonwealth (General Obligation)	\$ 44,905,000	Variable	May 1, 2014
	14,925,000	Variable	June 1, 2014
	197,385,000	Variable	June 1, 2014
Public Buildings Authority	129,225,000	Fixed	July 1, 2017
Total	<u>\$386,440,000</u>		

As discussed previously, the Commonwealth has entered into interest rate exchange agreements with respect to all Mandatory Tender FRNs. In the event the Commonwealth cannot remarket these bonds on their mandatory tender dates as variable rate bonds, the Commonwealth may have to terminate the associated interest rate exchange agreements. As of June 30, 2013, the mark-to-market value of all interest rate exchange agreements with respect to the Mandatory Tender FRNs was negative \$47.6 million.

**Ratings of Commonwealth General Obligation Bonds**

The Commonwealth's general obligation and appropriation debt is currently rated "Baa3" with a negative outlook by Moody's, "BBB-" with a negative outlook by Fitch, and "BBB-" with a negative outlook by S&P. These ratings and outlooks reflect only the opinions of such rating agencies and an explanation of the significance of such ratings may be obtained only from the relevant rating agency.

**Commonwealth Guaranteed Debt**

As of June 30, 2013, \$4.293 billion of Commonwealth guaranteed bonds of PBA were outstanding (not including accretion of interest from the respective issuance dates on capital appreciation bonds). Maximum annual debt service on these bonds is \$961 million in fiscal year 2028, assuming the receipt of the issuer subsidy from the federal government on the \$756,449,000 Government Facilities Revenue Bonds, Series R (Qualified School Construction Bonds – Issuer Subsidy) and the \$121,528,000 Government Facilities Revenue Bonds, Series T (Qualified Zone Academy Bonds – Direct Payment), and \$1.0 billion in fiscal year 2028 without taking into consideration said subsidy, with their final maturity being July 1, 2042. No payments under the Commonwealth guaranty have been required to date for these bonds.

As of June 30, 2013, \$267 million of Commonwealth guaranteed bonds of GDB were outstanding. No payments under the Commonwealth guaranty have been required for these bonds.

As of June 30, 2013, GDB held approximately \$220.4 million of the Port of the Americas Authority's outstanding bonds, which are guaranteed by the Commonwealth. The proceeds from these bonds have been used to continue the development of the Port of the Americas. As of August 1, 2013, payments of \$95.1 million under the Commonwealth guaranty have been required to pay interest and principal on these bonds. While the responsibility for the development and operation

of the Port of the Americas was transferred from the Port of the Americas Authority to the Authority of the Port of Ponce in December 2011, the Port of the Americas Authority retained the liability for the outstanding bonds, which are expected to be paid by the Commonwealth under the guarantee. See “Other Public Corporations—Port of the Americas Authority” under “Public Corporations” below.

As of June 30, 2013, the aggregate outstanding principal amount of obligations of PRASA guaranteed by the Commonwealth was \$1.119 billion. This amount consisted of \$284.8 million in revenue bonds sold to the public, \$365.8 million in bonds issued to the United States Department of Agriculture, Rural Development, and \$468.6 million of loans by the State Revolving (Clean Water and Safe Drinking Water Act) Funds for the benefit of PRASA. From January 1997 through fiscal year 2005, the Commonwealth made debt service payments under its guaranty. Beginning with the debt service payment due January 1, 2006, the Commonwealth stopped making guarantee payments on these obligations and PRASA resumed making payment on this debt. In the event PRASA is unable to make any portion of the future debt service payments on its guaranteed obligations, the Commonwealth would be required once more to make such payments from the General Fund under its guarantee. See “Other Public Corporations—Puerto Rico Aqueduct and Sewer Authority” under “Public Corporations” below.

During fiscal years 2011 and 2012, the Commonwealth made subsidy payments to PRASA for its operational expenses in the amounts of \$105 million and \$70.2 million, respectively. After the 2012 Series Bonds issuance by PRASA, which established a budgetary reserve fund of \$180 million, the Commonwealth does not anticipate having to appropriate additional funds to PRASA for its operational expenses.

### **Trends of Public Sector Debt**

The following table shows the growth rate of short-term and long-term public sector debt and the growth rate of gross national product (in current dollars) for the five fiscal years ended June 30, 2013 (except for the gross national product numbers for fiscal year 2013 that are not yet available). As of June 30, 2013, outstanding short-term debt, relative to total debt, was 7.0%. Total public sector debt for fiscal year 2012 shown the table below represented 93.2% of gross national product for fiscal year 2012.

**Commonwealth of Puerto Rico**  
**Public Sector Debt and Gross National Product**  
(dollars in millions)

June 30,	Public Sector					Gross National Product <sup>(1)</sup>	
	Long Term <sup>(2)</sup>	Short Term <sup>(3)</sup>	Total	Short Term as % of Total	Rate of Increase	Amount	Rate of Increase
2009	\$48,332	\$4,648 <sup>(4)</sup>	\$52,980	8.8%	13.0%	\$63,618	1.5%
2010	53,351	3,472	56,823	6.1	7.3	64,295	1.1
2011	54,804	4,380	59,184	7.4	4.2	65,567	2.0
2012	60,780	3,981	64,760	6.2	9.5	69,462	5.9
2013	60,115	4,843	64,957	7.0	0.3	-	-

Totals may not add due to rounding.

<sup>(1)</sup> In current dollars.

<sup>(2)</sup> Does not include debt totaling \$5.1 billion consisting of (i) Senior Pension Funding Bonds, Series A, B, and C issued by the Employees Retirement System, which are payable solely from employer contributions made to the Employees Retirement System by the Commonwealth, its municipalities and participating public corporations after the issuance of the bonds, identified in footnote 4, and (ii) bonds identified in footnote 6, of the table above entitled "Commonwealth of Puerto Rico—Public Sector Debt," which would have been issued and outstanding at the time, all of which would be considered long-term debt.

<sup>(3)</sup> Obligations (other than bonds) issued with an original maturity of three years or less and lines of credit with a remaining maturity of three years or less are considered short-term debt.

Source: Government Development Bank

The following table shows the trend of public sector debt by major category for the five fiscal years ended June 30, 2013.

**Commonwealth of Puerto Rico**  
**Public Sector Debt by Major Category**  
(dollars in millions)

June 30	Commonwealth <sup>(1)</sup>			Municipalities			Public Corporation <sup>(2)</sup>			Total

Totals may not add due to rounding.

<sup>(1)</sup> Does not include the Senior Pension Funding bonds, Series A, B, and C issued by the Employees Retirement System, which are payable solely from employer contributions made to the Employees Retirement System by the Commonwealth, its municipalities and participating public corporations after the issuance of the bonds, identified in footnote 4 of the table above entitled "Commonwealth of Puerto Rico – Public Sector Debt."

<sup>(2)</sup> Includes Commonwealth guaranteed debt; does not include the bonds identified in footnote 6 of the table above entitled "Commonwealth of Puerto Rico – Public Sector Debt."

<sup>(3)</sup> Obligations (other than bonds) issued with an original maturity of three years or less and lines of credit with a remaining maturity of three years or less are considered short-term debt.

Source: Government Development Bank

The following table sets forth the total debt service (principal and interest) of the Commonwealth and all its public corporations and instrumentalities (excluding GDB) for the next five fiscal years (as of August 31, 2013):

**Comonwealth of Puerto Rico and its Instrumentailities  
Five Year Debt Service Schedule**

<u>Fiscal year</u> <u>Ended June 30,</u>	<u>Total debt service</u> <u>(In millions)</u>
2014	\$3,442
2015	\$3,615
2016	\$3,817
2017	\$3,778
2018	<u>\$3,695</u>
Total	\$18,348

**PUBLIC CORPORATIONS**

In Puerto Rico, many governmental and quasi-governmental functions are performed by public corporations created by the Legislative Assembly with varying degrees of independence from the central government to perform generally a single function or a limited number of related functions. Most public corporations obtain revenues from rates charged for services or products, but many are subsidized to some extent by the central government. Most public corporations are governed by boards whose members are appointed by the Governor with the advice and consent of the Senate, but some public corporations are attached to departments of the central government. Capital improvements of most of the larger public corporations are financed by revenue bonds issued under trust agreements or bond resolutions, or by notes issued under loan agreements. The following table presents the outstanding bonds and notes of certain of the public corporations as of June 30, 2013 (“notes” as used in this section refers primarily to certain types of non-bonded debt regardless of maturity). Debt of certain other public corporations is excluded from this table because such debt is payable primarily from funds or grants provided by the federal government, is payable from sources other than Commonwealth appropriations or taxes or revenues of public corporations, or is payable from revenues derived from private sector services or products, such as industrial development bonds. Also excluded from this table is debt of certain public corporations the inclusion of which would reflect double counting. No deductions have been made in the table for debt service funds and debt service reserve funds. More detailed information about the major public corporations is presented in the following sections.

<sup>(1)</sup> Excludes \$145.9 million of Special Facilities Revenue Bonds issued by the Highway and Transportation Authority, which are payable from net toll revenues collected from the Teodoro Moscoso Bridge.

<sup>(2)</sup> Excludes the \$161.2 million of Housing Finance Authority bonds, which are payable solely from Puerto Rico Public Housing Administration's annual allocation of Public Housing Capital Funds from HUD; and \$319.9 million of Housing Finance Authority Capital Fund Modernization Program Subordinate Bonds, Series 2008 issued by the Housing Finance Authority and payable primarily from federal housing assistance payments made available by HUD.

<sup>(3)</sup> Includes \$37.8 million of Mental Health Infrastructure Revenue Bonds, 2007 Series A (MEPSI Campus Project), which bonds are limited obligations of the Infrastructure Financing Authority payable solely from the pledge of certain payments made by a governmental entity under a lease agreement. Also includes \$329.2 million of Revenue Bonds (Ports Authority Project), Series 2011, which are limited obligations of the Infrastructure Financing Authority payable solely from loan payments made by the PRPA.

<sup>(4)</sup> Excludes \$155.4 million of Special Facilities Revenues Bonds issued by the PRPA, which bonds are payable solely from the pledge of certain payments made by a private corporation under a special facilities agreement.

<sup>(5)</sup> Payable primarily from Commonwealth appropriations.

<sup>(6)</sup> Excludes \$72.7 million of Educational Facilities Revenue Bonds, 2000 Series A (University Plaza Project) issued by AFICA, which bonds are payable from rent payments made by the University of Puerto Rico.

<sup>(7)</sup> Includes lines of credit with GDB.

<sup>(8)</sup> Excludes accretion of interest from the respective issuance dates on capital appreciation bonds. Also excludes \$1.2 billion original principal amount of Children's Trust Tobacco Settlement Asset-Backed Bonds, Series 2002, 2005 and 2008 which bonds will be repaid from payments made by certain tobacco companies under a master settlement agreement. See "Children's Trust" under "Other Public Corporations" below. Excludes also (i) \$673,145,000 in Power Revenue Bonds issued by the Electric Power Authority on August 21, 2013, and (ii) \$400 million in Bond Anticipation Notes issued by the Highway and Transportation Authority in July 2013.

Source: Government Development Bank

## **Government Development Bank for Puerto Rico**

The principal functions of GDB are to act as financial advisor to, and fiscal agent for, the Commonwealth, its municipalities and public corporations in connection with the issuance of bonds and notes, to make loans and advances to public corporations and municipalities, and to promote the economic development of Puerto Rico. As part of its role as fiscal agent, during fiscal years 2009, 2010 and 2011, GDB entered into fiscal oversight agreements with PRASA, PREPA, the Highway and Transportation Authority, the PRPA, the Health Insurance Administration and the Medical Services Administration, the Metropolitan Bus Authority and the Maritime Transportation Authority. As part of these agreements, GDB imposed certain conditions on the extension of credit to these entities and continually monitors their finances, among other things.

As of September 30, 2013, GDB (excluding its blended component units) had total assets of \$12.4 billion and total liabilities of \$10.2 billion.

On December 13, 2012, Moody's lowered GDB's rating to "Baa3" with a negative outlook. On March 14, 2013, S&P lowered GDB's rating to "BBB-" with a negative outlook. These ratings and outlooks reflect only the opinions of such rating agencies and an explanation of the significance of such ratings may be obtained only from the relevant rating agency.

As of September 30, 2013, \$5.0 billion of bonds and notes of GDB (excluding its subsidiaries) were outstanding, consisting of \$267 million in Commonwealth guaranteed bonds and \$4.7 billion of medium term senior notes. Act No. 12 of May 9, 1975, as amended, provides that the payment of principal of, and interest on, specified notes and other obligations of GDB, not exceeding \$550 million, may be guaranteed by the Commonwealth, of which \$267 million were outstanding as of September 30, 2013.

Under Act No. 271 of November 21, 2002, GDB made a required special capital contribution to the Special Communities Perpetual Trust (the "Perpetual Trust") of \$500 million and provided the Perpetual Trust with a \$500 million, non-revolving line of credit. The amounts transferred to the Perpetual Trust were deposited in two investment accounts held by GDB for the benefit of the Perpetual Trust. As of June 30, 2013, the Perpetual Trust had repaid \$139.6 million of its line of credit and had an outstanding balance of \$360.4 million and an interest balance of \$210,235. The line of credit is payable from legislative appropriations.

As part of its role as lender and promoter of the economic development of Puerto Rico, GDB provides financing to the Commonwealth, its public corporations and municipalities. This financing includes interim loans to finance the capital expenditures of the Commonwealth in anticipation of the issuance of bonds and notes, and loans to cover operational deficits of those government entities. GDB generally does not provide financing to any governmental entity of the Commonwealth unless GDB reasonably believes that the borrower governmental entity will have sufficient resources, including the ability to issue bonds or notes or otherwise borrow funds, to repay such loan. GDB, however, has provided financing in the past and may continue to provide financing to governmental entities that do not have sufficient independent resources to cover their operating expenses, to the extent permitted by law. A material increase in the amount of loans to the public sector, coupled with continued deterioration of the public sector's fiscal situation and

financial condition may have an adverse effect on GDB's financial condition and liquidity. A material reduction on the GDB's ability to act as lender and promoter of economic growth would have a material effect on the Commonwealth, its public corporations and municipalities.

As of September 30, 2013, GDB had outstanding loans to the Commonwealth in the aggregate principal amount of \$2.7 billion, outstanding loans to, and bonds of, the public corporations in the aggregate principal amount of \$4.2 billion (of which loans to PRHTA represented \$1.7 billion), and outstanding loans to the municipalities in the aggregate principal amount of \$2.0 billion.

As of September 30, 2013, the approximate market value of GDB's investment portfolio was approximately \$2.4 billion.

GDB has several subsidiaries that perform various functions. The principal subsidiaries and their functions are listed below:

*Puerto Rico Housing Finance Authority.* Puerto Rico Housing Finance Authority (formerly known as Housing Finance Corporation) provides financing for rental housing units, stimulates the construction industry under federally subsidized programs and provides interim financing for low-income housing projects and single-family homeownership programs. It is also engaged in insuring and servicing mortgages originated by the former Housing Bank and Finance Agency, which was dissolved in 2002 and its powers transferred to the Housing Finance Authority. As of June 30, 2013, the Housing Finance Authority's total outstanding principal balance of loans to the private sector for development of housing projects targeted to low and moderate income families was \$187.1 million. The Housing Finance Authority's mortgage loans to low and moderate income homeowners represented an additional outstanding principal balance of \$178.1 million as of the same date.

The Housing Finance Authority has outstanding tax-exempt revenue bonds the proceeds of which were loaned to the Puerto Rico Public Housing Administration to finance improvements to various housing projects in the Commonwealth. Such bonds are limited obligations of the Housing Finance Authority payable solely from revenues collected from such housing units, with certain exceptions. As of June 30, 2013, \$788 million of these bonds were outstanding.

As of June 30, 2013, the Housing Finance Authority had total notes and bonds outstanding of \$491.6 million (including \$153.4 million of debt outstanding under GDB lines of credit and \$338.2 million in bonds issued to fund certain payments under its mortgage subsidy programs for low and moderate income families). As of June 30, 2013, the Housing Finance Authority had total unrestricted net assets of \$275.3 million.

*Puerto Rico Tourism Development Fund.* Puerto Rico Tourism Development Fund ("TDF") was created in September 1993 to facilitate the development of Puerto Rico's hotel industry by working with private-sector financial institutions in structuring financings for new hotel projects. TDF can provide guarantees to interim and permanent financings. In certain transactions, TDF can act as direct lender and provide preferred equity capital. As of June 30, 2013, TDF had \$557 million in guarantees and \$187.6 million in loans, net of loan loss reserves of

\$188.7 million. It also had \$23.2 million in cash and \$153.0 million in marketable securities. TDF estimates that as of June 30, 2013, it had a significant equity deficiency.

*Government Development Bank for Puerto Rico Capital Fund.* Government Development Bank for Puerto Rico Capital Fund (the “Capital Fund”) was created in November 1992 for the purpose of investing and trading in debt obligations and publicly traded shares of domestic and foreign corporations separate from GDB’s general investment operations. On June 30, 2010, the Capital Fund transferred to TDF, on behalf of GDB, \$72.1 million representing all the investments in the Capital Fund portfolio. As of June 30, 2013, the Capital Fund had assets of \$201,000, consisting principally of money market investments.

*Puerto Rico Development Fund.* Puerto Rico Development Fund (the “Development Fund”) was established in April 1977 to provide an alternate source of financing to private enterprises. The Development Fund is also authorized to guarantee obligations of those enterprises and invest in their equity securities. As of June 30, 2013, the Development Fund had assets of \$20.6 million, including \$10.6 million in loans to private entities, \$6.4 million in interest bearing accounts, and \$3.6 million in preferred shares of various private entities.

*Puerto Rico Public Finance Corporation.* Puerto Rico Public Finance Corporation (“PFC”) was established in November 1984 to provide agencies and instrumentalities of the Commonwealth with alternate means of meeting their financing requirements. The bond trustees of certain limited obligation bonds issued by the PFC currently hold notes payable by the Commonwealth, the Maritime Shipping Authority, the Office for the Improvement of Public Schools and the Department of Health and PRASA, among others. All such PFC bonds are limited, non-recourse obligations of PFC payable solely from Commonwealth appropriations made to pay debt service on the notes held by the bond trustees. As of June 30, 2013, PFC had \$1.1 billion aggregate principal amount of limited obligation bonds outstanding.

A description of certain other affiliates of GDB is provided in “Other Public Corporations” below.

### **Other Public Corporations**

*Aqueduct and Sewer Authority.* The Puerto Rico Aqueduct and Sewer Authority (“PRASA”) owns and operates Puerto Rico’s public water supply and wastewater systems. Such systems provide water and wastewater services to 97% and 58% of the Commonwealth’s population, respectively.

PRASA reported an operating loss of \$136.8 million for fiscal year 2012, compared to operating losses of \$39.6 million and \$58.3 million for fiscal years 2011 and 2010, respectively. In order to improve its financial condition, PRASA adopted a comprehensive plan to increase its revenues and reduce its expenses.

On July 3, 2013 PRASA’s Board of Directors approved a rate adjustment which became effective on July 15, 2013. The rate increase is projected to increase operating revenues for fiscal year 2014 by approximately \$344 million, or 44%, over fiscal year 2013. For fiscal year 2015 and

beyond, the increase in operating revenues is projected at \$444 million (as compared to fiscal year 2013), as the rate adjustment will cover an entire fiscal year. The rate adjustment is expected to be sufficient to cover all expenses and debt service of the corporation until at least fiscal year 2017.

As of June 30, 2013, PRASA's total debt was \$4.6 billion, including approximately \$89.8 million of outstanding indebtedness with GDB. On December 13, 2012, Moody's lowered the rating on PRASA's senior debt to "Ba1". On March 26, 2013, S&P lowered its rating on PRASA's senior debt to "BB+." On April 18, 2013, Fitch lowered its rating on such debt to "BBB-."

The Commonwealth guarantees the principal and interest payments on the outstanding revenue refunding bonds, 2008 Series A and 2008 Series B, any bonds issued on or before June 30, 2015 to the Rural Utilities Service of the United States Department of Agriculture, and the loans granted on or before June 30, 2015 by the Puerto Rico Water Pollution Control Revolving Fund and the Puerto Rico Safe Drinking Water Revolving Fund to PRASA. In the event that PRASA is unable to make all or any portion of the future debt service payments on these guaranteed debts, the Commonwealth will be responsible for covering such payments.

On April 28, 2006, PRASA entered into a consent decree with the United States Environmental Protection Agency ("EPA") that requires PRASA to implement system wide remedial measures at all of the wastewater treatment plants operated by PRASA. The EPA consent decree establishes deadlines for compliance with the conditions set forth therein and stipulates penalties for violation of any of those deadlines.

On December 15, 2006, a settlement agreement was signed between PRASA and the Department of Health of the Commonwealth ("DOH") relating to violations of the Safe Drinking Water Act. The settlement agreement was preliminarily approved by the supervising court on March 15, 2007, and was amended and finally approved by that court on June 20, 2008. PRASA agreed to implement a work plan to remediate the violations, establish preventive and mitigation measures, and execute a preventive maintenance program for the purpose of meeting the requirements of the Safe Drinking Water Act.

PRASA needs to make a substantial investment in infrastructure and a major overhaul of its operations to maintain the viability of the systems it owns and operates, to finance its expansion for new users and to implement remedial measures required by the consent decree between PRASA and the EPA and the settlement agreement with the DOH. Funds for this investment will be provided through a combination of revenues from PRASA, financing transactions, federal grants and other sources. PRASA has established a 15-year capital improvement program with a total investment of \$2.2 billion in order to comply with the consent decree and the settlement agreement. PRASA has committed an investment of \$1.2 billion to comply with the EPA consent decree and \$1.0 billion to comply with the DOH settlement agreement.

*Children's Trust.* The Children's Trust is a not-for-profit corporate entity created in 1999 as a public instrumentality of the Commonwealth. The Commonwealth has transferred to the Children's Trust all of its rights, title and interests under the tobacco litigation Master Settlement Agreement, including the Commonwealth's right to receive initial, annual and strategic

contribution payments to be made by the participating cigarette manufacturers under such Master Settlement Agreement.

As of June 30, 2013, the Children's Trust had outstanding senior and subordinate Tobacco Settlement Asset backed Bonds in the principal amount of \$1.2 billion, which were issued in 2002, 2005 and 2008 to pay certain capital expenditures, to make grants to third parties, to pay certain expenses of the Commonwealth, to fund a Liquidity Reserve account and to pay costs of issuance. These bonds and any other additional senior bonds issued by the Children's Trust are payable solely from, and secured by a statutory pledge of, the payments made and to be made by the participating cigarette manufacturers under the Master Settlement Agreement. To date, all principal and interest payments required to be made by the Children's Trust on its outstanding bonds have been made on a timely basis from contribution payments made by the participating cigarette manufacturers under the Master Settlement Agreement.

*Convention Center District Authority.* The Convention Center District Authority was created to own, develop, finance, plan, design, build, operate, maintain, administrate and promote the Dr. Pedro Rosselló González Convention Center, and designated private parcels located within the Convention Center District in San Juan. The convention center opened in November 17, 2005. The Convention Center District Authority also owns a multipurpose coliseum in San Juan, known as the José Miguel Agrelot Coliseum. As of June 30, 2013, the Convention Center District Authority's debt was \$428.7 million in outstanding bonds issued in March 2006 to finance the Convention Center and payable from a portion of a hotel room tax. As of June 30, 2013, the Convention Center District Authority also had outstanding indebtedness to GDB of approximately \$148 million related to the financing of the Coliseum.

*Electric Power Authority.* The Puerto Rico Electric Power Authority ("PREPA") owns and operates Puerto Rico's electric power system.

PREPA reported a reduction in net assets of \$346.2 million and \$272.4 million during fiscal years 2012 and 2011, respectively. The total debt of PREPA was \$8.8 billion as of June 30, 2013. This debt includes outstanding bonds of \$8.0 billion and interim financing for operations of \$761 million. PREPA's senior debt is rated Baa3, BBB and BBB- by Moody's, S&P and Fitch, respectively.

On August 21, 2013, PREPA issued \$673,145,000 Power Revenue Bonds, Series 2013A which proceeds will be used to finance PREPA's capital improvements program.

In order to reduce its dependency on fuel oil, reduce the cost of electricity, and comply with Mercury and Air Toxic Standards, PREPA is pursuing a fuel diversification strategy. PREPA has entered into long-term power purchase agreements with private operators of two co-generation plants that use fuels other than oil. PREPA has also signed power purchase agreements for sixty-three renewable energy projects. Four of the renewable energy projects are already in commercial operation and the rest of the projects are in various stages of development, most still being subject to obtaining financing and permitting. Approximately 32% of PREPA's current energy generation is purchased from these privately owned plants.

The principal component of PREPA's fuel diversification strategy is the conversion of most of PREPA's existing oil-fired generating units to dual fuel units that can burn either fuel oil (Bunker C) or natural gas and the development of the necessary natural gas transportation and delivery infrastructure. PREPA has already completed the conversion of the largest generating units of the Costa Sur power plant, representing approximately 14% of PREPA's total dependable generating capacity. PREPA is able to receive natural gas at Costa Sur power plant through an existing pipeline from EcoElectrica LNG terminal and pursuant to a Sale and Purchase Agreement with Gas Natural Electricidad SDG, S. A.

PREPA's capital improvement program for fiscal years 2014 through 2018 includes an estimated cost of \$80.2 million, which with the previous years' investment would be enough to complete the conversion to dual fuel of several of its generating units. PREPA commenced burning natural gas at its Costa Sur power plant in April 2012. In order to be able to burn natural gas at other facilities, however, PREPA has to develop the associated natural gas delivery infrastructure. PREPA plans to start burning natural gas at its Aguirre power plant and its northern generating plants by April 2015 and April 2017, respectively.

On July 1, 2013, the Commonwealth enacted Act 50 ("Act 50"). Act 50 establishes a preferential "all in" rate for the sale of electricity to PRASA. The preferential rate, however, is capped at 750 million kilowatt hours per fiscal year. In addition, Act 50 grants PREPA the power to revoke or modify the preferential rate if deemed necessary and prudent, following the processes provided in the applicable laws and the public policy established in Act 50, or when determined necessary to meet its obligations under the trust indenture for its bonds.

*Health Insurance Administration.* The Health Insurance Administration ("PRHIA") was created in 1993 to negotiate and contract for the provision of comprehensive health insurance coverage for qualifying (generally low income) Puerto Rico residents. Under this system, the Commonwealth selected, through a bidding process, different private health insurance companies for the eight designated regions of the island and paid such insurance company the insurance premium for each eligible beneficiary within such region. The health insurance system covered the entire island. On October 1, 2010, the Commonwealth implemented "Mi Salud," which is the health program that replaced the prior Health Reform program. The principal differences between "Mi Salud" and the Health Reform are the use of a preferred-provider network organization rather than independent practice associations, an increase of benefits and services and an expansion of eligible participants. Approximately 1.6 million persons were covered by the system during fiscal year 2013.

On July 2013, the Executive Director of the PRHIA announced the cancellation of Humana's contract effective on September 30, 2013. Humana administered three regions, with approximately 515,000 insured, of the "Mi Salud" program. On July 1, 2013, the PRHIA and Triple-S Salud, Inc. ("Triple-S") entered into an agreement pursuant to which Triple-S will administer the provision of healthcare services to the insured in the eight regions previously administered by MCS HMO (five regions) and Humana (remaining three regions). Pursuant to the agreement, Triple-S will act as a third party administrator and will be compensated based on a per member per month administrative fee. In contrast to the agreements with MCS HMO and Humana,

the Commonwealth has been financially responsible and bears the risk for the provision of services to the insured persons in the eight regions administered by Triple-S.

The total cost of the health insurance program was \$2.335 billion for fiscal year 2013, \$2.182 billion for fiscal year 2012, \$2.017 billion for fiscal year 2011, and \$1.962 billion for fiscal year 2010. During fiscal year 2013, the General Fund covered \$882 million of the total cost of the health insurance program. The remaining \$1.360 billion were paid from federal, municipal, internal and other sources. As of June 30, 2013, the PRHIA had outstanding indebtedness to GDB and private financial institutions of \$183.3 million, consisting of loans used to pay amounts owed to suppliers, including premiums owed to certain insurance companies for services rendered under the Health Reform program.

The Commonwealth budget for "Mi Salud" totals \$2.383 billion for this current fiscal year 2014. The approved budget includes an appropriation of \$885 million from General Fund, an increase of \$2.9 million over the prior year, while the remaining \$1.49 billion will be paid from federal funds, municipal, and other sources. Currently, the PRHIA projects a shortfall of \$110 million when comparing the budgeted amount with the latest expense projections. While PRHIA is a public corporation whose programs are funded by multiple sources which include fee income, municipal contributions, federal funding, and Commonwealth contributions, past funding shortfalls have required credit facilities payable from General Fund appropriations. Cost-saving measures under consideration include improved oversight of third-party administrators; fraud prevention; changes to federal poverty limits; migration within sub-groups of beneficiaries (for example, from Medicaid to Medicare or from Commonwealth-funded to Medicaid-funded); and other expense control measures. The federal funds portion of the health insurance program is being partially covered by non-recurring American Affordable Care Act ("ACA") funds, as well as with the capped recurring Medicaid Commonwealth allocation. The federal funds contribution to the health insurance program for fiscal year 2014 is projected at \$1.136 billion, while the Commonwealth cap for Medicaid is approximately \$300 million. Additional federal funds for Mi Salud available for the federal CHIP (Children's Health Insurance Program) for fiscal year 2014 are projected at \$160 million. Upon exhaustion of ACA funds, currently estimated sometime in early 2019 if the current utilization rate persists, federal contributions may revert to the recurring capped Medicaid Commonwealth allocation, resulting in higher requirements of Commonwealth funding, changes in the health program risk model, reductions in number of beneficiaries or scope of services provided, or other revenue-enhancing or cost reduction measures.

On September 30, 2013, the Governor of Puerto Rico notified the Secretary of the United States Department of Health and Human Services ("HHS") that the Commonwealth had elected to not implement a Health Insurance Exchange pursuant to the provisions of the ACA. In lieu thereof, the Commonwealth notified HHS of its decision to implement a new affordable health care plan for individuals who do not qualify for the existing Mi Salud public health insurance program. The new program will allow individuals with income levels of \$10,000 to \$25,000 per year to qualify for a new subsidized health insurance plan (the "UAP"). The newly eligible beneficiaries would receive Essential Health Benefits as defined by ACA, at the Bronze level. While the monthly fee for the UAP would be fully covered by funds from the PRHIA, the beneficiary would contribute approximately 40% of the cost of coverage through deductibles, copayments and other cost-limiting or sharing mechanisms. PRHIA estimates that the per-member

cost of the new plan, due to differences in coverage and cost sharing-arrangements, would be approximately 55% lower than for beneficiaries of Mi Salud.

The funding for the UAP would be obtained by raising the Medicaid poverty income eligibility level from \$400 per month to \$550 per month. This would cause approximately 76,000 current beneficiaries of Mi Salud that are currently covered 100% with PRHIA funds, to become eligible for Medicaid federal reimbursement.

Additionally, the Commonwealth has entered into contracts with seven Medicare Advantage organizations for the provision of health coverage to approximately 275,000 dual eligible beneficiaries. Pursuant to these agreements, the Commonwealth pays each Medicare Advantage organization a premium difference to cover services not included in their contracts with the Center for Medicaid and Medicare Services.

*Highways and Transportation Authority.* The Puerto Rico Highways and Transportation Authority (“PRHTA”) is responsible for highway construction in Puerto Rico. Such construction is financed by debt (interim notes and revenue bonds), revenues of PRHTA and federal and Commonwealth grants.

PRHTA reported a net operating loss of \$517.2 million for fiscal year 2012, compared to a net operating loss of \$530.8 million for fiscal year 2011 and \$445.3 million for fiscal year 2010. As of June 30, 2013, PRHTA’s total debt was \$7.1 billion, consisting of \$5 billion of bonds and \$2.0 billion of GDB financings.

Debt service on PRHTA’s revenue bonds constitutes a first lien on its gross revenues, which consist currently of all the proceeds of the tax on gasoline, one-half of the proceeds of the tax on gas oil and diesel oil, all the proceeds of the excise taxes on crude oil, unfinished oil and derivative products, up to \$120 million per fiscal year, highway toll revenues and the gross receipts of \$15.00 per vehicle per year from certain motor vehicle license fees. Such revenues (except for toll revenues) may be applied first to the payment of debt service on general obligation bonds and notes of the Commonwealth and to payments required to be made by the Commonwealth under its guarantees of bonds and notes, to the extent that no other revenues are available for such purpose. The Commonwealth has never applied such revenues for such payment.

On June 25, 2013, the Commonwealth enacted Acts 30 and 31 to provide additional revenues to PRHTA. Pursuant to these laws, (i) PRHTA will receive the motor vehicle license fee revenues previously received by the Commonwealth Treasury Department which currently amount to approximately \$62.5 million in additional annual revenue, (ii) the tax on petroleum products was increased from \$3.00 per barrel to \$9.25 per barrel which is currently estimated to result in approximately \$189 million in additional annual revenue, and (iii) PRHTA will receive the first \$20 million in annual cigarette excise tax revenues collected by the Commonwealth Treasury Department.

On August 29, 2013, PRHTA issued \$400,000,000 in bond anticipation notes, which proceeds were used to repay amounts owed under various GDB lines of credit.

PRHTA's Highway Revenue Bonds are rated Baa2 and BBB+ by Moody's and S&P, respectively, and the Senior Transportation Revenues Bonds are rated Baa3 and BBB by Moody's and S&P, respectively.

PRHTA has a mass transit system, known as Tren Urbano, serving a portion of metropolitan San Juan. It was constructed under several design/build contracts and is being privately operated. The cost of the project was \$2.4 billion, which cost was financed by federal Transit Administration grants, other federal funding sources and PRHTA's own resources, including revenue bonds. Tren Urbano commenced operations in June 2005. The current annual operation and maintenance cost of the Tren Urbano is approximately \$55 million.

PRHTA is a party to a concession agreement under which a private company designed, constructed and currently is operating a toll bridge spanning the San José Lagoon. The toll bridge was financed with special facility revenue bonds of PRHTA, payable by the private operator of the bridge principally from toll revenues. The concession is for a term of 35 years, subject to earlier termination or extension. The bridge opened for traffic in February 1994. In certain circumstances described in the concession agreement, including where toll revenues are insufficient to generate certain rates of return to the private operator, the private operator may require PRHTA, among other things, to assume the operator's obligations with respect to the special facility revenue bonds. Some of those circumstances, including lower than projected toll revenues, exist at this time, but PRHTA does not currently anticipate that the operator will exercise its remedy against PRHTA.

On September 22, 2011, PRHTA and the PPP Authority awarded to Metropistas a concession for the operation of toll roads PR-22 and PR-5. In connection with the establishment of the concession, PRHTA defeased, redeemed or purchased approximately \$873.1 million aggregate principal amount of its bonds. See "Public-Private Partnerships – Fiscal Stabilization and Economic Growth" under THE ECONOMY.

*Industrial Development Company.* The Puerto Rico Industrial Development Company ("PRIDCO") participates in the Commonwealth-sponsored economic development program by providing physical facilities, general assistance, and special incentive grants to manufacturers. PRIDCO reported consolidated change in net assets of \$13.1 million for fiscal year 2012, compared to consolidated change in net assets of \$7.0 million for fiscal year 2011. Rentals derived from the leasing of specified facilities of PRIDCO are pledged to the payment of PRIDCO's revenue bonds. As of June 30, 2013, PRIDCO's total debt was \$361.8 million, including approximately \$87.3 million from GDB financings and the outstanding debt of Puerto Rico Industrial Investment Corporation, a subsidiary of PRIDCO. PRIDCO's general purpose revenue bonds are rated Baal (stable) and BBB- by Moody's and S&P, respectively.

*Industrial, Tourist, Educational, Medical and Environmental Control Facilities Financing Authority.* Puerto Rico Industrial, Tourist, Educational, Medical and Environmental Control Facilities Financing Authority ("AFICA") was created to finance (through the issuance of its revenue bonds) industrial, tourist, educational, medical, and environmental control facilities in Puerto Rico for the use of private companies, non-profit entities, or government agencies. The

bonds are payable solely from payments to be made to AFICA by such private companies, non-profit entities, or government agencies, and do not constitute a debt of the Commonwealth or any of its other public corporations or municipalities. As of June 30, 2013, approximately \$1.04 billion of AFICA bonds were outstanding.

*Infrastructure Financing Authority.* The Puerto Rico Infrastructure Financing Authority (“PRIFA”) was created to provide financial, administrative, consulting, technical, advisory, and other types of assistance to other public corporations, governmental instrumentalities, political subdivisions and municipalities authorized to develop infrastructure facilities and to establish alternate means for financing those facilities. PRIFA is authorized to issue bonds and provide loans, grants and other financial assistance for the construction, acquisition, repair, maintenance and reconstruction of infrastructure projects by such entities.

As of June 30, 2013, PRIFA’s total debt was \$2.1 billion. This debt includes bonds outstanding of \$2.1 billion and interim financing for capital improvements of \$43.2 million. PRIFA’s outstanding bonds include \$329.2 million of limited obligations bonds, the proceeds of which were loaned to the PRPA and are payable solely from loan payments to be made by the PRPA. PRIFA’s Special Tax Revenue Bonds are rated Baa3 and BBB+ by Moody’s and S&P, respectively.

PRIFA oversees the Puerto Rico Infrastructure Fund, which is being funded annually through fiscal year 2052 with the first \$117 million of proceeds of federal excise taxes imposed on rum and other articles produced in Puerto Rico and sold in the United States that are transferred to Puerto Rico pursuant to the U.S. Code. See “Major Sources of General Fund Revenues – Revenues from Non-Commonwealth Sources” under PUERTO RICO TAXES, OTHER REVENUES AND EXPENDITURES. Rum is the only article currently produced in Puerto Rico subject to federal excise taxes, the proceeds of which are required to be returned to the Treasury Department. PRIFA is using these funds to pay debt service of bonds issued to finance various infrastructure projects.

PRIFA also has custody and control of the Infrastructure Development Fund and its Corpus Account, a perpetual account established under Act No. 92 of June 24, 1998 that was funded with \$1.2 billion of the proceeds of the sale of the Puerto Rico Telephone Company. The interest earned on the securities held in the Corpus Account was being used by PRIFA to pay debt service on its \$1.1 billion Series 2000 A and B Bonds. Act No. 3, approved by the Legislative Assembly of the Commonwealth on January 14, 2009 (“Act 3”), authorized the sale of the securities held in the Corpus Account. PRIFA sold the securities in January 2009 and used the proceeds to: (i) make a deposit into an escrow account in an amount sufficient to retire the Series 2000 A and B Bonds on October 1, 2010, (ii) make a deposit to the General Fund which was applied to cover a portion of the Commonwealth’s budget deficit, (iii) make a transfer to GDB as a capital contribution, and (iv) make a deposit to the Corpus Account to be invested in a long-term investment agreement with GDB.

As part of the Commonwealth’s actions to address in part the financial condition of the Employees Retirement System, the Commonwealth enacted Act 96. On June 23, 2011, in accordance with Act 96, \$162.5 million of funds on deposit in the Corpus Account were

contributed to the Employees Retirement System and invested in capital appreciation bonds issued by COFINA maturing annually on August 1, 2043 through 2048 and accreting interest at a rate of 7%. PRIFA also invested \$165.0 million of funds on deposit in the Corpus Account in capital appreciation bonds of COFINA maturing annually on August 1, 2045 through 2050 and accreting interest at 7%.

Pursuant to Act No. 8 of March 9, 2009, PRIFA is responsible for implementing in the Commonwealth the applicable provisions of ARRA. One of its main responsibilities regarding ARRA is to maximize the flow of funds from the Federal Government for the appropriate investment in qualified projects and activities. PRIFA also is responsible for the receipt, administration and disbursement of such funds and monitoring those governmental agencies and entities that receive ARRA funds.

*Municipal Finance Agency.* The Puerto Rico Municipal Finance Agency (“MFA”) is authorized to issue bonds to purchase general obligation bonds and notes of Puerto Rico municipalities and to fund a debt service reserve. Debt service on MFA’s bonds is payable from debt service payments on municipal bonds and notes held by MFA and from the debt service reserve, including investment income thereon. The Commonwealth has agreed to pay such amounts to the debt service reserve as may be necessary to maintain it at its required level, subject to appropriation by the Legislative Assembly, which appropriation is authorized but not legally required to be made. To date, no such payments have been required. As of June 30, 2013, MFA had \$821.9 million of bonds outstanding.

*Port of the Americas Authority.* Up to the approval of Act 240 of December 12, 2011, the Ports of the Americas Authority (“PAA”) was responsible for the development and operation of the Port of the Americas, a deep draft port on the south coast of Puerto Rico. With the approval of said Act 240, the Authority of the Port of Ponce was created with the exclusive jurisdiction of the Port of the Americas.

PAA was authorized to issue bonds guaranteed by the Commonwealth, in a maximum aggregate principal amount of \$250 million, for the development of the Port of the Americas. GDB was authorized by law to purchase said bonds of PAA. As of June 30, 2013, GDB held approximately \$220.4 million of PAA’s outstanding guaranteed bonds. While the responsibility for the development and operation of the Port of the Americas was transferred from PAA to the Authority of the Port of Ponce, PAA retained the liability for the outstanding bonds, which are expected to be paid by the Commonwealth under the guarantee.

*PRPA.* The PRPA owns the major airport and seaport facilities in Puerto Rico. Until February 27, 2013, the PRPA also operated all these facilities. On that date, the PRPA transferred the operation of the Commonwealth’s principal airport to a private consortium consisting of Grupo Aeroportuario del Sureste and Highstar Capital pursuant to a 40-year lease agreement. As a result of the transaction, the PRPA received a \$615 million upfront payment, of which it used \$176.7 million to repay the PRIFA limited obligation bonds described above under “Infrastructure Financing Authority.” The PRPA derives revenues from a variety of sources, including charges on airplane fuel sales, wharfage, dockage and harbor fees, and rentals for the lease of property and seaport equipment. The PRPA had operating losses of \$26.5 million and \$18.4 million during

fiscal years 2012 and 2011, respectively. As of June 30, 2013, after giving effect to the redemption of the PRIFA bonds referred to above, the PRPA had outstanding indebtedness of \$329.2 million.

*Public Buildings Authority.* PBA is authorized to construct, purchase or lease office, school, health, correctional and other facilities for lease to departments, public corporations, and instrumentalities of the Commonwealth. Bonds that have been issued by PBA to finance such facilities (through retirement of interim notes or otherwise) are payable from lease payments, which are largely derived from legislative appropriations and are secured by the Commonwealth's guaranty. PBA is authorized by law to have outstanding at any one time up to \$4.7 billion of bonds guaranteed by the Commonwealth. On June 21, 2012, PBA issued \$582,345,000 principal amount of its Government Facilities Revenue Bonds, Series U. The proceeds of such bonds were used to refund outstanding bonds and to repay advances made by GDB under a line of credit. As of June 30, 2013, PBA had \$4.293 billion principal amount of bonds outstanding (not including accretion of interest on capital appreciation bonds) and \$336.1 million outstanding under its line of credit with GDB. PBA debt is rated Baa3 by Moody's, BBB- by S&P, and BBB- by Fitch.

*Sales Tax Financing Corporation.* COFINA was originally created in 2006 for the purpose of financing the payment of certain appropriation-backed debt outstanding as of June 30, 2006, payable to GDB and PFC. In 2009, the Legislative Assembly of the Commonwealth expanded the purposes for which COFINA was created and increased from 1% to 2.75% (one-half of the tax rate of 5.5%) the portion of the Commonwealth sales and use tax that is transferred to COFINA. COFINA was then authorized to issue bonds for the following additional purposes: (i) to pay, in whole or in part, the debt of the Secretary of the Treasury with GDB in the amount of \$1 billion, the proceeds of which were used to cover the budgetary deficit for fiscal year 2009, (ii) to pay, in whole or in part, certain financing granted to the Secretary of the Treasury by GDB payable from future Commonwealth general obligation bonds, and any debt of the Commonwealth outstanding as of December 31, 2008 that did not have a source of repayment or was payable from budgetary appropriations, (iii) to pay, in whole or in part, the accounts payable to suppliers of the Commonwealth, (iv) to pay or finance operational expenses of the Commonwealth for fiscal years 2009, 2010, and 2011, (v) to pay or finance operational expenses of the Commonwealth for fiscal year 2012, which would have to be included in the annual budget of the Commonwealth, (vi) to fund the Puerto Rico Economic Stimulus Fund, (vii) to fund the Commonwealth Emergency Fund in order to cover expenses resulting from catastrophic events such as hurricanes or floods, and (viii) to generate moneys to fund the Economic Cooperation and Public Employees Alternatives Fund. As of June 30, 2013, COFINA had approximately \$15.2 billion outstanding of its Sales Tax Revenue Bonds (excluding all accretion on capital appreciation bonds).

On October 9, 2013, an amendment to the COFINA legislation was signed into law which increases from 2.75% to 3.50% the portion of the Commonwealth sales and use tax transferred to COFINA and expands the permitted uses of COFINA bond proceeds to include, among others, the refinancing of BANs and the financing of the Commonwealth's deficit for fiscal years 2013, 2014 and 2015.

COFINA's Sales Tax Revenue Bonds are rated A2, AA- and AA- by Moody's, S&P and Fitch, respectively, and its Sales Tax Revenue Bonds, First Subordinate Series, are rated A3, A+ and A+ by Moody's, S&P and Fitch, respectively.

On April 30, 2013, COFINA issued \$333,300,000 in Bond Anticipation Notes ("BANs") in order to complete the funding for the Commonwealth's operating budget for fiscal year 2013. The BANs, which mature on September 30, 2014, will be repaid from new financings.

*Special Communities Perpetual Trust.* The Perpetual Trust is a public corporation created by law to be an irrevocable and permanent trust. The Perpetual Trust's principal purpose is to fund development projects that address the infrastructure and housing needs of underprivileged communities. GDB made a special capital contribution to the Perpetual Trust of \$500 million and provided the Perpetual Trust with a \$500 million, non-revolving, line of credit. As of June 30, 2013, the Perpetual Trust had disbursed most of its funds and its line of credit with GDB had an outstanding balance of \$360.4 million. The line of credit is payable from legislative appropriations.

*University of Puerto Rico.* The University of Puerto Rico (the "University"), with approximately 57,475 students at the beginning of academic year 2012-2013, is the largest institution of higher education in Puerto Rico. Government appropriations are the principal source of University revenues, but additional revenues are derived from tuition, student fees, auxiliary enterprises, interest income, federal grants, and other sources. University capital improvements have been financed mainly by revenue bonds. As of June 30, 2013, the University's total debt was \$575.9 million (excluding \$16.3 million owed by the University's Medical Services), consisting of \$488.9 million of bonds and \$87 million of loans. The University's debt is rated Ba1 and BBB- (negative outlook) by Moody's and S&P, respectively.

In 2000, AFICA issued its \$86,735,000 Educational Facilities Revenue Bonds, 2000 Series A (University Plaza Project) for the purpose of financing the construction of additional student housing and parking and office space for the University. The project was built, is being operated by Desarrollos Universitarios, Inc., a Puerto Rico not-for-profit corporation, and is leased to the University for a term equal to the term of the bonds, with University lease payments being sufficient to pay debt service on said bonds as they become due. These bonds (of which \$72.7 million were outstanding as of June 30, 2013) are not included in the University's total debt or outstanding revenue bonds set forth in the prior paragraph.

In June 2010, the Board of Trustees of the University approved a \$400 stabilization fee to be charged each semester to all students in addition to tuition charges and other fees already in place at the University. This stabilization fee was imposed to address the University's fiscal difficulties and was expected to increase annual revenues by approximately \$40 million. The imposition of the stabilization fee resulted in student-led strikes that lasted approximately two months, which in turn caused the Middle States Commission on Higher Education (the "Commission"), the regional accreditation entity of the eleven units that comprise the University system, to place on probation ten of the University's units. The ten affected units remained fully accredited while on probation. After a Monitoring Report submitted by the ten affected units in September 2010 and subsequent evaluation visits, in June 2011 the Commission lifted probation and reaffirmed accreditation of seven of the ten affected units and in November 2011 lifted

probation and reaffirmed accreditation of the three remaining units. In January 2013, the Board of Trustees of the University announced that if the exclusion pursuant to Act 7 of certain revenue sources from the basis upon which the UPR appropriation formula is calculated was eliminated, the stabilization fee would not be necessary. Due to the restoration of the original UPR formula basis, the Board of Trustees has approved elimination of the stabilization fee.

*Other public corporations.* Public corporations not described above have outstanding debt in the aggregate amount of \$1.9 billion as of June 30, 2013. Debt service on \$1.2 billion of such outstanding debt is being paid from legislative appropriations. The Commonwealth is not, however, obligated to make any such appropriations. Additional legislative appropriations are made to enable certain of such corporations to pay their operating expenses.

## **INSURANCE MATTERS**

Government-owned property is insured through policies obtained by the Secretary of the Treasury and through self-insurance, except for property owned by PREPA and PRASA, whose properties are insured through arrangements and policies obtained by the respective entities. Personal injury awards against the Commonwealth are limited by law to \$150,000 per occurrence.

## **RETIREMENT SYSTEMS**

*General.* Substantially all of the public employees of the Commonwealth and its instrumentalities are covered by five retirement systems: the Employees Retirement System, the Teachers Retirement System, the Judiciary Retirement System, the Retirement System of the University of Puerto Rico (the “University Retirement System”) and the Employees Retirement System of Puerto Rico Electric Power Authority (the “Electric Power Authority Retirement System”). The Employees Retirement System and the Teachers Retirement System are the largest plans, both in number of active members and retirees and in the amount of their actuarial accrued liabilities.

The University Retirement System and the Electric Power Authority Retirement System cover employees of the University and PREPA, respectively, and are funded by those public corporations from their revenues. Although the Commonwealth is not required to contribute directly to those two systems, a large portion of the University’s revenues is derived from legally mandated legislative appropriations. The discussion that follows only covers the Employees Retirement System, the Teachers Retirement System and the Judiciary Retirement System (each a “Retirement System” and, collectively, the “Retirement Systems”).

The Employees Retirement System is a trust created by Act No. 447 of May 15, 1951, as amended (“Act 447”). Prior to the recent amendments made by Act 3 (discussed below), the Employees Retirement System was a hybrid defined benefit plan consisting of different benefit structures. Members who had entered the Employees Retirement System before January 1, 2000 participated in a defined benefit program. Members who began to participate prior to April 1, 1990 (“Act 447 Participants”) were entitled to the highest benefits structure, while those who began to participate on or after April 1, 1990 (“Act 1 Participants”) were subject to a longer

vesting period and a reduced level of benefits, as provided by Act No. 1 of February 16, 1990 (“Act 1 of 1990”).

In 1999, Act 447 was amended to close the defined benefit program for new participants and, prospectively, establish a new benefit structure similar to a cash balance plan (this new benefit structure is referred to as “System 2000”). Members who entered the Employees Retirement System on or after January 1, 2000 (“System 2000 Participants”) participate solely in System 2000. Prior to the amendment made by Act 3, under the System 2000 benefits structure, a participant was entitled to receive a lump-sum payment, which could be received in full or used to purchase an annuity from a third party, based solely on the amounts contributed in cash by such participant. Act 3 amended the law to eliminate the lump sum distribution and substitute it for a life term annuity payable to the System 2000 Participant. This amendment was intended to alleviate the cash flow needs of the Employees Retirement System. System 2000 Participants receive periodic account statements similar to those of defined contribution plans showing their accrued balances. System 2000 Participants do not benefit from any employer contributions. Instead, employer contributions for System 2000 Participants are used to reduce the accumulated unfunded pension benefit obligation of the Employees Retirement System.

System 2000 is not a separate plan as there are no separate accounts for System 2000 Participants. Contributions received from System 2000 Participants are pooled and invested by the Employees Retirement System together with the assets corresponding to the defined benefit structure. Thus, future benefit payments under the defined benefit structure of Act 447 and Act 1 of 1990 and the defined contribution structure of System 2000, as amended by Act 3, will be paid from the same pool of assets of the Employees Retirement System. To the extent the assets of the Employees Retirement System are insufficient to cover all retirement benefits due to retired employees, the employees contributions made by the System 2000 Participants might not be available to be paid as retirement benefits to such participants.

The Teachers Retirement System is a trust created by Act No. 91 of March 29, 2004 (“Act 91 of 2004”), which superseded Act No. 218 of May 6, 1951, and is a defined benefit pension plan. The Judiciary Retirement System is a trust created by Act No. 12 of October 19, 1954 and is also a defined benefit pension plan.

The Retirement Systems are funded principally by contributions made by employers (the Commonwealth, public corporations and municipalities) and employees, as well as investment income.

As previously mentioned, Act 3 constitutes a comprehensive reform of the Employees Retirement System. This reform was necessary to address the growing funding shortfalls which threatened the long term solvency of the Employees Retirement System. See “Efforts to Address Cash Flow Shortfall and Improve Funding Ratio” below. The provisions of Act 3 and its projected impact on the funding shortfalls are discussed below.

*Governance.* Governance of the Employees Retirement System and the Judiciary Retirement System is vested in a Board of Trustees, which sets policy and oversees the operations consistent with applicable laws. There are eleven members of the Board, as follows: the Puerto

Rico Secretary of the Treasury (or her appointee), the President of GDB (or his appointee), the Commissioner of Municipal Affairs (or his appointee) and the Director of the Office of Human Resources of the Commonwealth (or his appointee), as *ex officio* members; three members appointed to three-year terms by the Governor of the Commonwealth, two of whom must be members of the Employees Retirement System or the Judiciary Retirement System, with at least ten years of credited service; and a member who is a pensioner of the Employees Retirement System or the Judiciary Retirement System. The other two members will be the President of the Federation of Mayors and the President of the Association of Mayors. The Board is also responsible for appointing the Administrator of the Employees Retirement System and the Judiciary Retirement System.

Governance of the Teachers Retirement System is also vested in a Board of Trustees. There are nine members of the Board, as follows: the Puerto Rico Secretary of the Treasury (or her appointee), the President of GDB (or his appointee) and the Puerto Rico Secretary of Education (or his appointee), as *ex officio* members; one member who is the President of a teacher's organization, or his representative designated by the Governor of the Commonwealth, with the advice and consent of the Senate, for a term of four years; three teachers of the Teachers Retirement System, one of which shall represent active teachers and two of which shall represent retired teachers, each appointed by the Governor of the Commonwealth, with the advice and consent of the Senate, for a term of four years; one member who is the President of the collective bargaining unit for teachers pursuant to Puerto Rico law (or his appointee); and a member who represents the public interest, appointed by the Governor of the Commonwealth, with the advice and consent of the Senate, for a term of four years. The Board is also responsible for appointing an Executive Director of the Teachers Retirement System.

*Covered Employees.* The Employees Retirement System covers substantially all employees of the departments and agencies of the Commonwealth, all members and regular employees of the Legislative Branch, and all employees of the public corporations (other than the University and PREPA) and municipalities, except for those employees that are covered by the other two Retirement Systems. The Judiciary Retirement System only covers judges.

The Teachers Retirement System covers public school teachers and certain private school teachers, as well as teachers working in administrative positions. Act 91 of 2004 establishes that: (i) the Teachers Retirement System's active employees as of March 29, 2004 (not public school teachers or other Department of Education employees) have the option to participate in the Teachers Retirement System or in the Employees Retirement System; (ii) persons hired by the Teachers Retirement System after the approval of the new law may only become members of the Teachers Retirement System, (iii) active teacher employees of the Department of Education are members of the Teachers Retirement System, and (iv) licensed teachers working in private schools or other educational organizations may elect to become members of the Teachers Retirement System as long as the required employer and employee contributions are satisfied.

The following table shows the number of active members, retired members, disabled members and beneficiaries and terminated vested members for each of the Retirement Systems as of June 30, 2013.

**Participant Data  
(as of June 30, 2013)**

	Active Members <sup>(1)</sup>	Retired Members	Disabled Members	Beneficiaries	Terminated Vested Members <sup>(2)</sup>	Total
<b>Employees Retirement System</b>						
Act 447 Participants	24,067	79,098	13,703	13,613	7,219	137,700
Act 1 Participants	44,460	7,823	2,231		3,439	57,953
System 2000 Participants	64,807	-	37	-	-	64,844
<b>Total</b>	<b>133,334</b>	<b>86,921</b>	<b>15,971</b>	<b>13,613</b>	<b>10,658</b>	<b>260,497</b>
<b>Teachers Retirement System</b>	41,973	32,626	2,239	3,131	738	80,707
<b>Judiciary Retirement System</b>	364	348	0	59	47	818

<sup>(1)</sup> The data for active members of the Employees Retirement System is as of March 31, 2013.

<sup>(2)</sup> Represents generally members who ceased employment without the right to a retirement annuity and are due a refund of member contributions and, if applicable, employer contributions, plus interest thereon.

The Commonwealth central government (consisting of departments and agencies) is not the only employer participating in the Employees Retirement System. The municipalities and most public corporations participate as employers as well with respect to their employees. The assets contributed by the Commonwealth central government and all other employers, however, are invested together and not otherwise segregated. As of March 31, 2013, the central government was responsible for making contributions with respect to 79,302 active members of the Employees Retirement System, or 59.5% of total active members (consisting of 15,220 Act 447 Participants, 29,151 Act 1 Participants and 34,931 System 2000 Participants). Municipalities were responsible for 31,728, or 23.8%, active members (consisting of 4,373 Act 447 Participants, 9,110 Act 1 Participants and 18,245 System 2000 Participants). Public corporations were responsible for 22,297, or 16.7%, active members (consisting of 4,474 Act 447 Participants, 6,199 Act 1 Participants and 11,624 System 2000 Participants).

*Funding Requirements.* The Commonwealth central government is responsible for approximately 59% of total employer contributions to the Employees Retirement System, and the other 41% is the responsibility of public corporations and municipalities. The Commonwealth central government is also responsible for 100% of total employer contributions to the Judiciary and Teachers Retirement Systems. Retirement and related benefits provided by the Retirement Systems, and required contributions to the Retirement Systems by employers and employees, are determined by law rather than by actuarial requirements. The Commonwealth is ultimately responsible for any funding deficiency with respect to central government employees in the three Retirement Systems.

As of July 1, 2011, after the adoption of Act 116 of July 6, 2011 (“Act 116”), the statutory employer contribution for the Employees Retirement System increased from a minimum of 9.275% to a minimum of 10.275% of covered payroll, and will continue to increase annually until fiscal year 2021. The employer contribution rate for fiscal year 2014 is 12.275%. See “Efforts to Address Cash Flow Shortfall and Improve Funding Ratio” below. Covered payroll is the compensation regularly paid to active employees on which contributions to the Retirement Systems are computed and is generally equivalent to their annual salary. Act 447 requires that employer contributions cover the difference between (i) the benefits provided by the Retirement

System, plus administrative costs, and (ii) the contributions that employees are required to make to the Retirement System. This requirement, however, has not been adhered to and the level of employer contributions has been limited to the minimum statutory rate.

Required employee contributions for the Employees Retirement System vary according to how the individual employee's retirement benefits are coordinated with social security benefits. Act 3 increased the employee contribution from 8.275% to 10% of covered payroll.

As of July 1, 2011, after the adoption of Act 114 of July 5, 2011 ("Act 114"), the statutory employer contribution for the Teachers Retirement System increased from 8.5% to 9.5% of covered payroll, and will continue to increase annually until fiscal year 2021. See "Efforts to Address Cash Flow Shortfall and Improve Funding Ratio" below. The statutory employee contribution for the Teachers Retirement System is 9.0% of covered payroll. For the Judiciary Retirement System, the employer contribution is 30.34% of covered payroll and the employee contribution is 8% of covered payroll.

The Constitution of the Commonwealth provides that, in the event the Commonwealth has insufficient funds to pay all approved appropriations, the available resources of the Commonwealth shall be used to pay public debt before being used for other purposes. Public debt of the Commonwealth includes general obligation bonds and notes of the Commonwealth to which the full faith, credit and taxing power of the Commonwealth are pledged and, according to opinions rendered by the Attorney General of the Commonwealth, any payments required to be made by the Commonwealth under its guarantees of bonds and notes issued by its public instrumentalities. See DEBT. Furthermore, Puerto Rico law provides "priority norms" for the disbursement of public funds that apply during any fiscal year in which the resources available to the Commonwealth are insufficient to cover the appropriations approved for such year, as follows: first, the payment of the interest on, and amortization requirements for, public debt (Commonwealth general obligation and guaranteed debt); second, the fulfillment of obligations arising out of legally binding contracts, court decisions on eminent domain and certain commitments to protect the name, credit and good faith of the Commonwealth government; third, current expenditures in the areas of health, protection of persons and property, education, welfare and retirement systems; and fourth, all other purposes. Thus, according to these priority norms, contributions by the Commonwealth to the Retirement Systems expressly fall within the third priority. These priority norms do not apply to employer contributions made by public corporations and municipalities, because the funds of public corporations and municipalities are not "available resources" of the Commonwealth.

*Benefits and Special Benefits.* Each Retirement System provides basic benefits principally consisting of a retirement annuity and death and disability benefits (collectively referred to herein as "Basic System Pension Benefits"). Each Retirement System also administers benefits granted under various special laws that have provided additional benefits for the retirees and beneficiaries (collectively referred to herein as "System Administered Pension Benefits"). The System Administered Pension Benefits include, among others, additional minimum pension, death and disability benefits, ad-hoc cost-of-living adjustments and summer and Christmas bonuses. See Note 20 to the Commonwealth's audited financial statements for fiscal year 2012 included in the CAFR for a summary of the benefits provided by each of the Retirement Systems. Act 3 amended

the various laws providing some of these System Administered Pension Benefits to reduce some of the amounts payable to existing retirees while eliminating the benefits for all future retirees (those retiring after June 30, 2013).

The System Administered Pension Benefits are funded on a pay-as-you-go basis by the Commonwealth from the General Fund or by the participating public corporation and municipalities. These benefits are not an obligation of the respective Retirement Systems. Except for the System Administered Pension Benefits corresponding to former employees of municipalities and public corporations, which are obligations of the municipalities and public corporations, most of the funds used to cover these benefits are required to be paid by the Commonwealth through annual appropriations from the General Fund. Historically, however, the Retirement Systems have made current payments of System Administered Pension Benefits to participants but the costs of these pension benefits have not been recovered by the Retirement Systems in full and on a timely basis from the Commonwealth and the participating public corporations and municipalities.

Through June 30, 2004, the Teachers Retirement System had paid \$119.6 million from its resources to cover System Administered Pension Benefits that should have been received from the Commonwealth through annual appropriations. On May 31, 2004, the Teachers Retirement System made a claim to OMB to collect this amount. OMB disputed the Teachers Retirement System's interpretation of certain System Administered Pension Benefit laws to the effect that the Commonwealth is required to reimburse the Teachers Retirement System for such benefits paid. During 2009, the Department of Education paid \$12.2 million that was part of the amounts claimed to OMB. On April 23, 2010, OMB and the Teachers Retirement System settled the remaining claim for \$53.8 million, to be paid in five equal installments of \$10.8 million during the next five fiscal years, starting in fiscal year 2011. As of July 2013, the Teacher's Retirement System has received four installments. The final installment should be received in July 2014.

*Composition and Market Value of Investment Portfolios.* As of June 30, 2013, the market value of the Employees Retirement System's investment portfolio was \$3.853 billion, compared to \$4.192 billion as of June 30, 2012. As of June 30, 2013 the investment portfolio was comprised of approximately 22% of equity investments, 40% of fixed income securities, 20% of internally managed mortgage and personal loans portfolio, 16% of short-term cash equivalents (excluding receivables), and 2% of other investments. The decrease in value of the investment portfolio since June 30, 2012 principally reflects the continued use of investment portfolio assets and the sale of a portion of the personal loan portfolio to pay current benefits as discussed below. Total assets as of June 30, 2013 and June 30, 2012 were \$4.046 billion and \$4.480 billion, respectively, and the total net assets for such periods were \$711 million and \$1.237 billion, respectively. See the Statements of Plan Net Assets and Changes in Plan Net Assets below.

As of June 30, 2013 the market value of the Teachers Retirement System's investment portfolio was \$1.875 billion, compared to \$2.048 billion as of June 30, 2012. As of June 30, 2013, the investment portfolio was comprised of approximately 28% of equity investments, 49% of fixed income securities, 22% of internally managed mortgage and personal loans portfolio, and 1% of other investments. The decrease in value of the investment portfolio since June 30, 2012 principally reflects the continued use of investment portfolio assets to pay current benefits as

discussed below. Total assets as of June 30, 2013 and June 30, 2012 were \$1.978 billion and \$2.297 billion, respectively, and total net assets for such periods were \$1.908 billion and \$2.099 billion, respectively. See Statements of Plan Net Assets and Changes in Plan Net Assets below.

As of June 30, 2013, the market value of the Judiciary Retirement System's investment portfolio was \$63.3 million, compared to \$62.6 million as of June 30, 2012. As of June 30, 2013, the investment portfolio was comprised of approximately 57% of equity investments, 35% of fixed income securities, 1% of internally managed mortgage and personal loans portfolio, and 7% of short-term cash equivalents (excluding receivables). The increase in value of the investment portfolio since June 30, 2012 reflects the increased proportion invested in equity assets, which have had a superior performance in the stated period. Total assets as of June 30, 2013 and June 30, 2012 were \$63.6 million and \$62.9 million, respectively, and total net assets for such periods were \$59 million and \$58 million, respectively. See Statements of Plan Net Assets and Changes in Plan Net Assets below

All the figures provided above for the fiscal year 2013 are preliminary and unaudited.

*Actuarial Valuations of the Retirement Systems.* Historically, each of the Retirement Systems has conducted an actuarial valuation as of the end of every two fiscal years. However, due to the deterioration of the funding status of the Retirement Systems, as discussed below, each of the Retirement Systems began conducting annual actuarial valuations effective June 30, 2009. The latest actuarial valuations were conducted by Milliman Inc., a firm of independent consulting actuaries, as of June 30, 2012.

Informational copies of the actuarial valuation reports of the Employees Retirement System and the Judiciary Retirement System, as well as other financial information, are available on the website of the Administration of the Retirement Systems at [www.retiro.pr.gov](http://www.retiro.pr.gov). Informational copies of the actuarial valuation report of the Teachers Retirement System, as well as other financial information, are available at the website of the Teachers Retirement System at [www.srm.pr.gov](http://www.srm.pr.gov). No information contained on these websites is deemed incorporated herein by reference.

The purpose of an actuarial valuation is to calculate the actuarial accrued liability of each of the Retirement Systems, which estimates on the basis of demographic and economic assumptions the present value of the benefits that each of the Retirement Systems will pay to its retired members and active members upon retirement. The actuarial valuations are performed in accordance with generally recognized and accepted actuarial principles and practices. The actuarial valuation compares the actuarial accrued liability with the actuarial value of assets and any excess of that liability over the assets represents an unfunded actuarial accrued liability ("UAAL") of the applicable Retirement System. In the case of the actuarial valuations of the Retirement Systems, the actuarial value of assets is equal to the market value of assets (net of liabilities). An actuarial valuation will also express the percentage that a Retirement System is funded through a "Funded Ratio" which represents the quotient obtained by dividing the actuarial value of assets of the Retirement System by the actuarial accrued liability of the Retirement System. An actuarial valuation will also state an actuarially recommended contribution rate, which is a recommended rate of covered payroll that consists of two components: (1) normal cost, which

generally represents the portion of the present value of retirement benefits that are allocable to active members' current year service, and (2) an amortized portion of the UAAL. The amount that the Commonwealth and other participating entities actually contribute to the Retirement Systems is determined by statute and does not follow the recommendations of the actuaries, as discussed above. If additional employer contributions were to be made, they would have to be included in the Governor's budget request and approved by the Legislative Assembly.

To calculate the actuarial accrued liability of each of the Retirement Systems, the actuarial valuations use several actuarial assumptions. Some examples of these assumptions include an expected rate of return of assets, age of retirement of active members, future pay increases for current employees, assumed rates of disability and post-employment life expectancies of retirees and beneficiaries. If the experience of the Retirement Systems is different from these assumptions, the UAAL of the Retirement Systems may increase or decrease to the extent of any variances. As discussed below, the actual return of assets of each of the Retirement Systems during fiscal years 2009 and 2012 was lower than the assumed investment return utilized to prepare the actuarial accrued liability. The actual return of assets of the Retirement Systems for fiscal years 2010 and 2011, however, was higher than the assumed investment return used to prepare the actuarial valuations.

The actual rate of return on assets of the Retirement Systems depends on the performance of their respective investment portfolios, which can vary materially from the expected rates of return assumed in the actuarial valuations. The investment portfolios of the respective Retirement Systems can be volatile. The value of the securities in the investment portfolios can dramatically change from one fiscal year to the next, which could, in turn, cause substantial increases or decreases in the net assets of the Retirement Systems, which directly impacts the UAAL. For fiscal year 2009, the annual rates of return of the assets of the Employees Retirement System, the Teachers Retirement System and the Judiciary Retirement System was negative 9.8%, negative 15.9% and negative 18.0%, respectively, contributing to the increase in the UAAL of the Retirement Systems between fiscal year 2007 and fiscal year 2009. For fiscal year 2010, the year-end return of the assets of the Employees Retirement System, the Teachers Retirement System and the Judiciary Retirement System was 8.7%, 12.5% and 12.7%, respectively. For fiscal year 2011, the year-end return of the assets of the Employees Retirement System, the Teachers Retirement System and the Judiciary Retirement System was 16.0%, 21.5% and 20.5%, respectively. For fiscal year 2012, the year-end return of the assets of the Employees Retirement System, the Teachers Retirement System and the Judiciary Retirement System was 5.1%, 2.0% and 2.5%, respectively.

The June 30, 2012 actuarial valuations of the Employees Retirement System and Judiciary Retirement System were completed in accordance with the "projected unit credit" method, with an assumed investment return of 6% per year, in the case of the Employees Retirement System, and 6.1% per year, in the case of the Judiciary Retirement System, and yearly salary increases of 3% per year. The actuarial valuations of the Employees Retirement System and the Judiciary Retirement System as of June 30, 2011 had assumed investment returns per year of 6.4% and 6.6%, respectively. Under the "projected unit credit" method, a projected benefit is determined at each active participant's assumed retirement age assuming future compensation increases, and the projected benefit is attributed to each year of service using straight proration based on projected

service to each assumed retirement age. The plan's normal cost is the sum of the present value of the portion of each active participant's projected benefit attributable to the current year of service.

The June 30, 2012 actuarial valuation of the Teachers Retirement System was completed in accordance with the "entry age normal" method and assumed an investment return of 5.95% per year and yearly salary increases of 3.5%. The actuarial valuation of the Teachers Retirement System as of June 30, 2011 had assumed investment returns of 6.4% per year. Under the "entry age normal" method, a projected benefit is determined at each active participant's assumed retirement age assuming future compensation increases. The plan's normal cost is the sum of each active participant's annual cost for the current year of service determined such that, if it were calculated as a level percentage of his compensation each year, it would accumulate (at the valuation interest rate over his total prior and future years of service to the participant's assumed retirement date) into an amount sufficient to fund the participant's projected benefits.

Any amounts receivable from the Commonwealth with respect to benefits under System Administered Pension Benefits laws (discussed above) are considered in the actuarial valuation process to determine the unfunded pension benefit obligation of the Retirement Systems to the extent receivables are recognized as such by the Retirement Systems.

In performing the actuarial valuations, the actuaries rely on data provided by the Retirement Systems. Although the actuaries review the data for reasonableness and consistency, they do not audit or verify the data. If the data were inaccurate or incomplete, the results of the actuarial valuations may also be inaccurate or incomplete, and such defects may be material.

The following tables set forth, according to the actuarial valuations of the Retirement Systems, the actuarial value of assets, actuarial accrued liability, UAAL, funded ratio, covered payroll and UAAL as a percentage of covered payroll. The ratio of the UAAL to covered payroll is a measure of the significance of the UAAL relative to the capacity to pay it. The trend in the ratio provides information as to whether the financial strength of a pension plan is improving or deteriorating over time. As shown in the "Historical Funding Status" table, the steady increase in the UAAL to covered payroll for each of the Retirement Systems shows a significant deterioration in their financial strength.

<sup>(1)</sup> The actuarial value of assets of each of the Retirement Systems is set forth in the actuarial valuation relating to each Retirement System and is equal to the full market value of the assets held by the Retirement Systems, including expected receivable contributions from the Commonwealth, municipalities and participating public corporations, less bonds payable and other liabilities.

<sup>(2)</sup> The actuarial accrued liability of each of the Retirement Systems is set forth in the actuarial valuation relating to each Retirement System and is an estimate based on demographic and economic assumptions of the present value of benefits that the Retirement System will pay during the assumed life expectancies of the applicable retired members and active members after they retire.

<sup>(3)</sup> The UAAL of each of the Retirement Systems is set forth in the actuarial valuation relating to each Retirement System and reflects the amount of the excess of the actuarial accrued liability of a Retirement System over its actuarial value of assets. The indicated amounts reflect the UAAL as calculated pursuant to the requirements of the Government Accounting Standards Board ("GASB") for purposes of presentation in the CAFR.

<sup>(4)</sup> The Funded Ratio of each of the Retirement Systems is presented in the actuarial valuation relating to each Retirement System and reflects the quotient obtained by dividing the actuarial value of assets of the Retirement System by the actuarial accrued liability of the Retirement System. The indicated percentages reflect the Funded Ratio as calculated pursuant to the requirements of GASB for purposes of presentation in the CAFR.

<sup>(5)</sup> The covered payroll of each of the Retirement Systems is presented in the actuarial valuation relating to each Retirement System and is equal to the annual salaries paid to active employees on which contributions to the Retirement System are made.

<sup>(6)</sup> The UAAL as a percentage of covered payroll is presented in the actuarial valuation relating to each Retirement System and reflects the quotient obtained by dividing the UAAL of the Retirement System by the covered payroll of the Retirement System. Totals may not add due to rounding.

2013	2,969	838	2,131	28.2

<sup>(1)</sup> The actuarially recommended contributions are based on the information contained in the actuarial valuations for the Retirement Systems as of June 30, 2012.

<sup>(2)</sup> The actual employer contributions for fiscal year 2013 are based on the statutory employer contribution plus the expected pay-as-you-go contributions for System Administered Pension Benefits, as set forth in the actuarial valuations as of June 30, 2012.

<sup>(3)</sup> Represents the difference between the actuarially recommended pension contribution and the actual contribution from the participating employers. Source: Information regarding the actuarially recommended contributions was derived from the June 30, 2012 actuarial valuation reports for the Retirement Systems. Information regarding the actual contributions for the Retirement Systems was provided by the Retirement Systems.

The Commonwealth recognized that, based on the then current funding requirements of the Retirement Systems, the UAAL of the Retirement Systems was expected to continue to increase indefinitely into the future instead of being amortized, and that future scheduled contributions at the then current funding rates would not be sufficient to make future benefit payments when due. It recognized that additional funding from the Commonwealth would ultimately be necessary to cover such unfunded obligation. It was estimated that the Commonwealth would be responsible for approximately 62% of any such funding deficiency of the Employees Retirement System and approximately 74% of the combined funding deficiency of the three Retirement Systems, with the balance being the responsibility of the municipalities and participating public corporations.

*Funding Shortfalls and Issuance of Pension Obligation Bonds.* For several fiscal years, actual employer and employee contributions to each of the Retirement Systems have been lower than annual Basic System Pension Benefits payments and administrative expenses. These

shortfalls in contributions over the amounts required to pay Basic System Pension Benefits and expenses are referred to herein as “funding shortfalls.” The funding shortfalls, however, do not reflect the actual cash flow position of the Retirement Systems, which is affected, among other things, by their investment and financing activities. One type of investment that has particularly contributed to the deterioration of the Retirement Systems’ actual cash position has been the increase in personal loans to their members, as discussed below under “*Factors That Have Contributed to Deterioration in Financial Solvency of the Employees Retirement System.*”

The Retirement Systems have been forced to cover the funding shortfalls with investment income, loans from financial institutions and various non-recurring sources of funds. In some fiscal years, the funding shortfall has also exceeded the investment income of the Retirement Systems, causing the Systems’ assets to decline and adversely affecting the funded status.

Besides using investment income to cover benefit payments, the Employees Retirement System has covered some of its historical funding shortfalls with the sale of investment portfolio assets and proceeds of loans from the Treasury Department or other financial institutions, some of which have been collateralized with the Retirement System’s assets.

During 2008, the Employees Retirement System issued approximately \$2.9 billion of Senior Pension Funding Bonds (the “Pension Bonds”), with interest rates ranging from 5.85% to 6.55%, for which repayment the Employees Retirement System pledged all employer contributions made after the issuance of the bonds. The Pension Bonds are limited, non-recourse obligations of the Employees Retirement System payable solely from, and secured solely by, the employer contributions. The maturity of the Pension Bonds is not subject to acceleration for any reason including non-payment of debt service on the bonds. As of June 30, 2013, approximately \$2.9 billion of the Pension Bonds remain outstanding. The purpose of this offering was to increase the assets of the System available to invest and pay benefits.

The table below shows the funding shortfalls for each of the last four fiscal years and the projected funding shortfall for the following five fiscal years for each of the Retirement Systems. The funding shortfalls for fiscal years 2010, 2011 and 2012 are based on the audited financial statements for the Retirement Systems for those years and the funding shortfalls for fiscal years 2013 through 2018 are based on the actuarial valuation report as of June 30, 2012. The projected funding shortfalls for the Employees Retirement System for fiscal year 2014 thru 2018 reflect the impact of the amendments made by Act 3.

**Funding Shortfalls

2016	14	(25)	(11)
2017	14	(26)	(12)
2018	15	(27)	(12)

<sup>(1)</sup> Represents the statutory employer and member contributions and does not include amounts received from employers on account of System Administered Pension Benefits, except as described under footnote 4 below. For fiscal years 2012 through 2016, estimated payroll is assumed to grow 3% annually and employer contributions include the rate increases provided for by Act 114 and Act 116.

<sup>(2)</sup> Excludes \$162.5 million contributed to the Employees Retirement System on June 23, 2011 and invested in COFINA bonds pursuant to Act 96.

<sup>(3)</sup> Includes, in the case of the Employees Retirement System, principal and interest paid on the Pension Bonds for fiscal years 2010 and 2011 in the amounts of \$188 million and \$189 million, respectively, and for fiscal years 2012 through 2018, debt service of \$167 million per year.

<sup>(4)</sup> Includes \$140 million additional annual contribution and savings generated by the System from the difference between receiving the \$2,000 per retiree contribution as required under Act 3 and paying \$1,500 per retirees to cover certain System Administered Pension Benefits.

<sup>(5)</sup> Does not include interest income from asset investment. Totals may not add due to rounding.

Source: Information obtained from each of the Retirement Systems, Employees Retirement System projections made by Milliman, and the June 30, 2012 actuarial valuation reports.

The Employees Retirement System anticipates that its future cash flow needs for disbursement of benefits to participants, administrative expenses and debt service are likely to continue to exceed the sum of the employer and employee contributions received and its investment and other recurring income for a period of time, even after taking into account the increases in employer contributions provided for by Act 116, as described below and the amendments made by Act 3. After the enactment of Act 3, the Employees Retirement System

expects to have a decreasing annual funding shortfall (after payment of debt service on the Pension Bonds) and this positive trend is expected to continue, as shown in the table above. Based on the Employees Retirement System's funding and disbursement projections made prior to the enactment of Act 3 (which reflected continued funding shortfalls) and other assumptions, the actuarial valuation as of June 30, 2011 stated that the Employees Retirement System was being rapidly defunded and projected that its net assets (total assets minus the Pension Bonds and other liabilities) would be depleted by fiscal year 2014 and its gross assets would be depleted by fiscal year 2019. This meant that during the period from fiscal year 2014 through fiscal year 2019, benefits were expected to be paid from the proceeds of the Pension Bonds, and that after depletion of the gross assets, there would be no funds remaining to pay pension benefits or debt service on the pension obligation bonds. With the enactment of Act 3 and the incremental annual contributions from the General Fund required by Act 32 beginning in fiscal year 2014 and up to fiscal year 2033, it is projected that the gross assets will no longer be depleted. This incremental contribution will be determined on an annual basis based on actuarial studies to be performed by the System's actuaries.

The Teachers Retirement System has also covered funding shortfalls during the last decade through the sale of investment portfolio assets. For fiscal year 2014, the Teachers Retirement System expects to have a funding shortfall of approximately \$331 million, even after taking into account the increases in employer contributions provided for by Act 114, as described below. Based on the Teachers Retirement System's current funding and disbursement projections (which reflect continued funding shortfalls) and other assumptions, the actuarial valuation as of June 30, 2012 states that the Teachers Retirement System is being gradually defunded and projects that its net and gross assets will be depleted by fiscal year 2021.

The Judiciary Retirement System has also experienced funding shortfalls during the last five fiscal years and has used investment income to cover some of these shortfalls. For fiscal year 2013, the Judiciary Retirement System expects to have a funding shortfall of approximately \$9 million, and this negative trend is expected to continue. Based on the Judiciary Retirement System's current funding and disbursement projections (which reflect continued funding shortfalls) and other assumptions, the actuarial valuation as of June 30, 2012 states that the Judiciary Retirement System is being defunded and projects that its net and gross assets will be depleted by fiscal year 2019.

In the case of the Teachers Retirement Systems and the Judiciary Retirement Systems, if the level of contributions to those systems and the level of benefits were to remain unchanged, the funding deficiencies are expected to continue to be covered with the investment income from, and the sale of, assets of such systems, thus continuing to deplete such assets. Based on the actuarial valuation reports, for the period from fiscal year 2014 to fiscal year 2021, the average annual funding deficiency is projected to be approximately \$323 million for the Teachers Retirement System and approximately \$12 million for the Judiciary Retirement System. Once the assets of those systems are depleted, the funding deficiency would have to be covered by the employers. As indicated above, it is estimated that the Commonwealth would have to cover substantially all of the funding deficiency of the Teachers Retirement System and the Judiciary Retirement System.

The estimated years for depletion of the assets stated above could vary depending on how actual results differ from the assumptions used in the actuarial valuations (including the assumed investment rate of return), as well as based on any future changes to the contribution and benefits structures of the Retirement Systems.

The consulting actuaries have recommended that the funding requirements of the Retirement Systems be significantly increased in light of (i) the expected negative net cash flows and exhaustion of plan assets, (ii) the forecasted decrease in funded status, and (iii) the actuarially recommended contributions which significantly exceed actual employer contributions. Act 3 was enacted in response to these recommendations with respect to the Employees Retirement System.

*Factors That Contributed to Deterioration in Financial Solvency of the Employees Retirement System.* Among the factors that have contributed most significantly to the deterioration of the Employees Retirement System are the following: (i) the inadequacy of the historical funding levels for the Retirement Systems; (ii) the enactment of special laws increasing pension benefits without providing the required funding source; (iii) the adoption of early retirement programs that were not adequately funded and that reduced the amount of contributions to the Retirement Systems; (iv) the increase in life expectancy in Puerto Rico; (v) the increase in the maximum amount of permitted personal loans to members; and (vi) the issuances of Pension Obligation Bonds by the Employee Retirement System.

Since their inception, the Retirement Systems have been inadequately funded by the government and the participating employees. On several occasions during the past decades, the Government has increased benefits without raising employer and employee contributions and failing to provide alternate methods to fund these increased benefits.

The Government has also approved several “Special Laws” granting additional benefits on top of those provided under Act 447 and Act 1. These benefits include: (i) a summer bonus; (ii) a medication bonus; (iii) a Christmas bonus; (iv) contributions to medical plans; (v) merit pensions; and (vi) cost of living adjustments (COLAs), among others. Although most of the benefits granted under the Special Laws are supposed to be funded by the General Fund or the other participating government employers, in fact these benefits are often not adequately funded.

The Government has also adopted various early retirement programs since 1994 to reduce the Government workforce. Although these measures reduced payroll expenses, which are a substantial portion of General Fund expenses, early retirement programs also reduced the Retirement Systems’ revenues because they caused a decrease in employer and employee contributions. These programs were generally not accompanied by up-front funding of the associated retirement costs and had a negative cash flow impact on the Employees Retirement System as the same funded early retirement benefits without timely reimbursement from the Commonwealth or sponsoring public corporation or municipality.

Another factor that contributed to the deterioration of the Retirement Systems was the increase in the average life expectancy in Puerto Rico and the United States from 59.5 years for men and 62.4 years for women in 1950 to 78 in 2008. This has caused retired employees to receive benefits for more years than originally expected.

Another cause for the current situation of the Employees Retirement Systems is its personal loan program. The Employees Retirement System offers and manages a program that offers personal loans, mortgage loans and loans for cultural travels for retirement plan participants. Participants may obtain up to \$5,000 in personal loans for any use. In 2007, the System increased this amount to \$15,000, which reduced the cash in the System by approximately \$600 million between 2007 and 2010. This deficit has been covered by funds from the System itself and has required the liquidation of assets that would have otherwise been available to make pension payments. Due to the amount of personal loans originated during recent years, the System's loan portfolio now has a significant amount of illiquid assets. In an effort to improve the situation, in 2011, the Board of Trustees of the Employees Retirement System lowered the maximum loan amount back to \$5,000 and, in 2012, it approved the sale of approximately \$315 million in loans. With a balance of \$539 million as of June 30, 2013, personal loans are equivalent to approximately 76% of the Employees Retirement System's net assets.

Finally, in 2008, the Employees Retirement System issued \$2.9 billion in pension obligation bonds ("POBs"). The purpose of this offering was to increase the assets of the System available to invest and pay benefits. Unlike some other U.S. jurisdictions that have used this strategy, POBs are obligations of the Employees Retirement System itself and government employer contributions constitute the repayment source for the bonds.

*Impact of Funding Shortfall on the Commonwealth.* The Commonwealth and other participating employers are ultimately responsible for any funding deficiency in the Retirement Systems. The depletion of the assets available to cover retirement benefits would require the Commonwealth and other participating employers to cover such funding deficiency. Due to its multi-year fiscal imbalances previously mentioned, however, the Commonwealth has been unable to make the actuarially recommended contributions to the Retirement Systems. If the measures taken or expected to be taken by the current Commonwealth administration fail to address the Retirement Systems' funding deficiency, the continued use of investment assets to pay benefits as a result of funding shortfalls and the resulting depletion of assets could adversely affect the ability of the Retirement Systems to meet the rates of return assumed in the actuarial valuations, which could in turn result in an earlier depletion of the Retirement Systems' assets and a significant increase in the unfunded actuarial accrued liability. Ultimately, since the Commonwealth's General Fund is required to cover a significant amount of the funding deficiency, the Commonwealth could have difficulty funding the annual required contributions if the measures taken or expected to be taken to reform the retirement systems do not have the expected effect. There may also be limitations on the Commonwealth's ability to change certain pension rights afforded to participants in the Retirement Systems.

*Efforts to Address Cash Flow Shortfall and Improve Funding Ratio.* In recent years the Retirement Systems have been evaluating measures to improve their financial solvency. In order to maintain their long-term fiscal integrity and their ability to pay required benefits to their members, the Retirement Systems recognized that a combination of some or all of the following were necessary: (i) a substantial increase in contributions by the Commonwealth and the participating employers, and (ii) actions resulting in changes to liabilities of the Retirement

Systems. Because of the multi-year fiscal imbalances mentioned above, the Commonwealth was unable to make the actuarially recommended contributions to the Retirement Systems.

As a result of the work of various commissions and task forces established by the Commonwealth, in recent years several bills were submitted to, and evaluated by, the Legislative Assembly to address in part the Retirement Systems' financial condition. One of such bills was enacted as Act 96. On June 23, 2011, in accordance with Act 96, \$162.5 million of funds on deposit in the Corpus Account of the Puerto Rico Infrastructure Development Fund were contributed to the Employees Retirement System and invested in capital appreciation bonds issued by COFINA maturing annually on August 1, 2043 through 2048 and accreting interest at a rate of 7%. The principal amount of the COFINA bonds will grow to an aggregate amount of approximately \$1.65 billion at their maturity dates.

The Commonwealth also enacted Act 114 and Act 116. These Acts provide an increase in employer contributions to the Employees Retirement System and the Teachers Retirement System of 1% of covered payroll in each of the next five fiscal years and by 1.25% of covered payroll in each of the following five fiscal years. As a result of these increases, the Employees Retirement System and the Teachers Retirement System would receive approximately \$110 million and \$40 million, respectively, in additional employer contributions during fiscal year 2014, and the additional employer contributions are projected to increase gradually each fiscal year (by an average aggregate increase of \$76 million per fiscal year) to approximately \$489 million and \$192 million, respectively, by fiscal year 2021. The additional employer contributions for fiscal year 2014 were included in the approved budget for such fiscal year. With respect to the increases in the employer contributions corresponding to the municipalities, Act 116 provided that the increases for fiscal years 2012, 2013 and 2014 would be paid for by the Commonwealth from the General Fund budget, representing approximately \$20.3 million, \$45 million and \$72.5 million in fiscal years 2012, 2013 and 2014, respectively.

The tables below show the projected additional contributions to the Employees Retirement System and the Teachers Retirement System as a result of Act 114 and Act 116, based on the expected payroll assumptions used in the actuarial reports as of June 30, 2012.

A fourth bill with respect to the Employees Retirement System was enacted as Act No. 196 of September 18, 2011, which authorized the Employees Retirement System to sell or pledge personal and mortgage loans in its portfolio. This bill also set up a loan program for members of the Employees Retirement System through certain financial institutions, while also limiting the amount of employee contributions that a member can pledge as collateral for a loan.

In addition to these measures, on August 8, 2011, the Board of Trustees of the Employees Retirement System adopted a new regulation regarding the rules relating to the concession of personal loans to its members, which, among other changes, lowered the maximum amount of those loans from \$15,000 to \$5,000. This change is expected to improve gradually the Employees Retirement System's liquidity.

On July 2, 2010, the Commonwealth enacted Act 70 (“Act 70”), which is designed to reduce government expenditures by providing a voluntary early retirement window for central government employees. At the same time, Act 70 is expected to have a positive actuarial impact on the UAAL of the Employees Retirement System and the Teachers Retirement System. Under Act 70, central government employees meeting certain years of service criteria who opted for early retirement by December 31, 2012 receive a higher pension benefit rate than they would otherwise be entitled to receive based on their current years of service, but such pension rate is lower than what they would have been entitled to if they had waited to meet the full vesting requirements. Pursuant to Act 70, the Commonwealth, as employer, will continue making the applicable employer contributions to the Employees Retirement System and the Teachers Retirement System, as well as make payments to cover the annuity payments to the employees opting for the early retirement window, until both the years of service and age requirements for full vesting would have occurred, at which time the applicable Retirement System will continue making the annuity payments. As of June 30, 2013, approximately 5,846 employees participated of the benefits provided by these provisions of Act 70.

*Act 3.* Notwithstanding all of the above legislative and administrative measures directed at addressing the funding shortfall of the Retirement Systems, the funding situation of the Employees Retirement System presented a serious long term challenge that required more urgent and sweeping changes to improve the financial health and long term solvency of the Employees Retirement System. With that objective in mind, on April 4, 2013, the new administration of Governor Alejandro Garcia Padilla succeeded in enacting Act 3.

The most important aspects of the changes effected by Act 3 are the following:

1. In the case of active employees who are Act 447 Participants and Act 1 Participants, all retirement benefits accrued through June 30, 2013 will be frozen, and thereafter all future benefits will accrue under a defined contribution formula which will be paid at retirement through a lifetime annuity.
2. The retirement age for Act 447 Participants will be gradually increased from age 58 to age 61.
3. The retirement age for current System 2000 Participants is gradually increased from age 60 to age 65.
4. The retirement age for new employees is increased to age 67, except for new state and municipal police officers, firefighters, and custody officers, which will be age 58.
5. The employee contribution will be increased from 8.275% to 10%.
6. In the case of System 2000 Participants, the retirement benefits will no longer be paid as a lump sum payment and instead will be paid in the form of a lifetime annuity.

7. With respect to post-employment benefits, the Christmas bonus payable to current retirees is reduced from \$600 to \$200 (and is eliminated for future retirees) and the summer bonus is eliminated. Future retirees will not receive any post-employment benefits.

8. Disability benefits will be eliminated and substituted by a mandatory disability insurance policy.

9. Survivor benefits will be modified.

*Statements of Plan Net Assets and Changes in Plan Net Assets.* The following tables present the Statement of Plan Net Assets and Statement of Changes in Plan Net Assets of each of the Retirement Systems for fiscal years 2010, 2011, 2012 and 2013.

## **POST-EMPLOYMENT BENEFITS OTHER THAN PENSIONS**

The Commonwealth also provides non-pension post-employment benefits that include a medical insurance plan contribution. These benefits, which in the case of the Employees Retirement System amounted to \$250 million for fiscal year 2012 (of which \$95 million are attributed to a medical insurance plan) and \$257 million for fiscal year 2013 (of which \$101 million are attributed to a medical insurance plan), are funded by each employer on a pay-as-you-go basis from the General Fund, which means that the Commonwealth does not pre-fund or otherwise establish a reserve or other pool of assets against these post-employment expenses. These post-employment benefits are valued using actuarial principles similar to the way that pension benefits are calculated. Based on the latest actuarial valuations, as of June 30, 2012, the aggregate unfunded actuarial accrued liability of these benefits for the three retirement systems was \$2.9 billion.

Act 3 eliminated all the non-pension post-employment system benefits to future retirees of the Employees Retirement System and reduced some of the benefits paid to current retirees of the Employees Retirement System. Act 3 did not change the medical insurance plan contribution for current retirees which amounts to up to \$100 per month to the eligible medical insurance plan selected by the retiree or disabled member.

In accordance with the provisions of GASB Statement No. 45, the Commonwealth is required to quantify and disclose its obligations to pay non-pension post-employment benefits to current and future retirees. The following table sets forth, according to the actuarial valuations, the actuarial accrued liability, UAAL, covered payroll and UAAL as a percentage of covered payroll for the non-pension post-employment benefits of the active and retired members of each of the Retirement Systems. Since these benefits are not pre-funded, as discussed above, the UAAL is equal to the actuarial accrued liability.

**Post-Employment Benefits Other Than Pensions**  
**Actuarial Valuations as of the Indicated Fiscal Years**  
(in millions)

Fiscal Year Ending June 30,	Actuarial Value of Assets	Actuarial Accrued Liability <sup>(1)</sup>	Unfunded Actuarial Accrued Liability	Funded Ratio	Covered Payroll	UAAL as a Percentage of Covered Payroll
<b>Employees Retirement System</b>

2011	0.5	0.3	0.2	58.6
2012	0.6	0.3	0.3	56.3
2013	0.6	0.3	0.3	50.2
<b>Total</b>				
2009	150.4	115.3	35.1	76.7
2010	170.5	113.3	57.2	66.5
2011	169.5	126.3	43.2	74.5
2012	175.6	132.3	43.3	75.3
2013	201.6	148.3	53.3	73.6

<sup>(1)</sup> The actuarially recommended contributions are based on the information contained in the actuarial valuations for the Retirement Systems as of June 30, 2012.

<sup>(2)</sup> The actual employer contributions for fiscal year 2013 are based on the expected pay-as-you-go amounts for the post-employment benefits, other than pensions, as set forth in the actuarial valuations as of June 30, 2012.

<sup>(3)</sup> Represents the difference between the actuarially recommended pension contribution and the actual contribution from the participating employers.

## COMMONWEALTH AUDITED FINANCIAL STATEMENTS

### General

For fiscal year 2012, the basic financial statements of the Commonwealth were audited by Deloitte & Touche LLP. Deloitte & Touche LLP did not audit the financial statements of certain activities, funds, and component units identified separately in its report dated September 16, 2013 (which report expresses an unqualified opinion and includes emphasis of matter paragraphs regarding the Pension Trust Funds' unfunded actuarial accrued liability and funded ratio as of June 30, 2012). Those financial statements were audited by other independent auditors whose reports were furnished to Deloitte & Touche LLP, and its opinion on the basic financial statements, insofar as it relates to the amounts included in the basic financial statements pertaining to such activities, funds and component units, is based solely on the reports of the other auditors.

The CAFR for fiscal year 2012, which includes the basic financial statements of the Commonwealth for fiscal year 2012, was filed by the Commonwealth with the Municipal Securities Rulemaking Board through its Electronic Municipal Markets Access System ("EMMA") on September 16, 2013, which is after the Commonwealth's May 1 deadline, established in its continuing disclosure undertakings pursuant to Rule 15c2-12 of the Securities and Exchange Commission. The Commonwealth was unable to finalize its audited financial statements for fiscal year 2012 on time due to (i) delays in the audit of such financial statements as a result of the government transition process, (ii) the adoption of new government accounting pronouncements, (iii) the restatement of the financial statements of the PRPA, a discretely presented component unit of the Commonwealth, and (iv) the failure of the University of Puerto Rico, a discretely presented component unit of the Commonwealth, to finalize its audited financial statements. These discretely presented component units of the Commonwealth are generally separate legal entities that are part of the Commonwealth's financial reporting entity under government accounting standards. The Commonwealth is evaluating the implementation of measures to ensure future timely filings of its audited financial statements.

### Prior Non-Compliance with Continuing Disclosure Obligations

The Commonwealth has entered into several continuing disclosure undertakings in accordance with SEC Rule 15c2-12 in connection with its bond issuances. Although the Commonwealth has filed all the reports and financial statements required to be filed, some of these filings have been made after the Commonwealth's filing deadline, which is normally May 1.

The Commonwealth's audited financial statements for the fiscal years ended June 30, 2006, 2007 and 2008 were filed after the Commonwealth's filing deadline, because various governmental agencies did not submit their audited financial statements to the central government's external auditors on time, thereby delaying submission of the Commonwealth's audited financial statements. The Commonwealth's audited financial statements for the fiscal year ended June 30, 2009 were also filed after the Commonwealth's filing deadline due to delays in the engagement and transition of new external auditors, the implementation of new government accounting pronouncements, and the restatement of the financial statements of certain discretely presented component units of the Commonwealth.

The Commonwealth Reports for the fiscal years ended June 30, 2008 and June 30, 2012, were filed after the Commonwealth's filing deadline.

In 2011 and 2012, the Commonwealth complied with its continuing disclosure undertaking relating to fiscal years 2010 and 2011.

The Commonwealth had recently established certain policies and procedures that it believed would ensure full and timely compliance with its continuing disclosure obligations. Such policies and procedures included: (i) the assignment of additional resources from local and international audit firms to those component units whose financial statements have not been timely provided to the Commonwealth; (ii) the assignment of dedicated external and internal resources to (a) assist the Central Accounting Division at the Treasury Department in the preparation of complex financial information that has historically delayed the audit and (b) provide periodic and consistent follow up on component unit financial statement deliverables and deadlines; (iii) the execution of a memorandum of understanding between the Treasury Department, OMB and GDB for the coordination of all financial statement related tasks and the designation of GDB, in its role as fiscal agent of the Commonwealth, to review and monitor the progress of certain component units; and (iv) the establishment of an Audit Oversight Committee comprised of Treasury Department and GDB personnel in order to continuously monitor the status of the audit and the Commonwealth's financial statements.

In light of the Commonwealth's continuing difficulties in the timely filing of the CAFR and the Commonwealth Report notwithstanding the establishment of the policies and procedures described above, the Commonwealth is reviewing how to improve such policies and procedures to ensure timely compliance in the future with its continuing disclosure obligations.

## **PUERTO RICO TAXES, OTHER REVENUES, AND EXPENDITURES**

The Secretary of the Treasury has custody of the funds of the central government and is responsible for the accounting, disbursement and investment of such funds. Central government funds are grouped into three major categories or "types" of funds, as follows: (i) Governmental Fund Types, which include the General, Special Revenue, Debt Service (also referred to herein as Redemption), and Capital Project Funds; (ii) Proprietary Fund Types, which include the Enterprise and Internal Service Funds; and (iii) Fiduciary Fund Types, which include the Trust and Agency Funds. These funds do not include funds of the municipalities, because the municipalities are governmental entities with independent treasuries. The Special Revenue Fund is incorporated into the General Fund for financial reporting purposes (but not for budgetary purposes).

The General Fund is the primary operating fund of the Commonwealth. General Fund revenues are broadly based and include revenues raised internally as well as those from non-Puerto Rico sources. Internal revenues consist principally of income, excise and sales and use taxes. Revenues from non-Puerto Rico sources are derived from federal excise taxes and customs duties returned to the Commonwealth. The primary expenditures of the Commonwealth through the General Fund are for grants and subsidies, and personal and other services.

## Summary and Management's Discussion of General Fund Results

The following table presents the actual revenues and expenditures of the General Fund on a cash basis for fiscal years 2009, 2010, 2011, 2012 and 2013.

The amounts shown in the following table as expenditures may be different than those reflected in the budget or in the Commonwealth's financial statements because the table shows only cash disbursements, while the budget includes all authorized expenditures, regardless of when the related cash is actually disbursed. In addition, transfers to the Redemption Fund (used to pay debt service on the Commonwealth's bonds), which are included in the budget under "debt service," are shown as a deduction from total revenues in calculating "adjusted revenues" in the table and are not included under "expenditures." Finally, certain expenditures incurred in excess of budgeted amounts may not be reflected in the table as expenditures to the extent they are paid from reserve funds, such as moneys in the Budgetary Fund. A discussion of the budget for fiscal year 2014 appears below under "Budget of the Commonwealth of Puerto Rico."

Amounts listed under "Other Income" represent recurring General Fund revenues not appropriately attributable to other revenue line items, such as repayment of General Fund advances to municipalities and government agencies and funds. "Other Expenditures" represent recurring General Fund expenditures not appropriately attributable to other expenditures line items, such as advances to government agencies and municipalities, which advances are to be reimbursed to the General Fund by law. Amounts listed under "Capital Outlays and Other Debt Service" represent debt service on obligations and capital expenditures for which the Legislative Assembly has by resolution agreed to appropriate funds. General Fund revenues, expenditures, and transfers as presented in the table differ from the General Fund revenues, expenditures, and transfers as presented in the financial statements of the Commonwealth, as the financial statements reflect an expanded General Fund entity in accordance with generally accepted accounting principles.

- (1) Excludes transfers to the Conservation Trust Fund and amounts deposited into a separate account for the promotion of Puerto Rico runs in foreign markets.
- (2) Consists of transfers of rental payments to PBA, net revenues from the General Fund's non-budgetary funds plus a reserve for future tax refunds reduced by estimated tax refunds.
- (3) Consists of amounts to pay principal of, and interest on, general obligation bonds and notes of the Commonwealth. Does not include amounts deposited directly into the Redemption Fund from non-General Fund revenues.
- (4) Consists of proceeds of borrowings from GDB and a syndicate of commercial banks, and proceeds from Commonwealth's Tax and Revenue Anticipation Notes.
- (5) Consists of repayments of borrowings from GDB and a syndicate of commercial banks, and repayments of Commonwealth's Tax and Revenue Anticipation Notes.
- (6) Includes proceeds of \$432.6 million generated by the issuance of the Commonwealth's Public Improvement Refunding Bonds, Series 2011 A, 2011 B and 2012 A, which were privately placed.
- (7) Includes approximately \$233 million for payment of Public Improvement Refunding Bonds Series 2011 C and 2011 D paid with transfers from COFINA.
- (8) Includes \$201 million transferred to the Commonwealth from the sale of securities in PRIFA's Corpus Account.
- (9) Represents the COFINA bond proceeds deposited in the Stabilization Fund.
- (10) Includes payment of refunded bonds of \$394.5 million.
- (11) Does not include amounts deposited directly into the Redemption Fund from non-General Fund revenues.
- (12) Includes \$240 million transferred from the Redemption Fund to the General Fund, for excess of derivative instruments collaterals not required in accordance with the derivative instruments agreements
- (13) Preliminary, unaudited and subject to change.

### *General Fund Preliminary Revenues for Fiscal Year 2013 Compared to Fiscal Year 2012*

Preliminary General Fund total revenues are expected to be approximately \$8.697 billion. This total includes (i) \$8.502 billion in General Fund revenues (consisting of \$8.198 billion of operating revenues, \$63.2 million of revenues from the electronic and traditional lotteries that are available to the General Fund, and \$240 million transferred from the Redemption Fund), (ii) \$117 million of revenues from property taxes that are available to pay general obligation bonds, and (iii) \$78 million of excess funds transferred from COFINA.

The \$8.697 billion in General Fund total revenues for fiscal year 2013 represents a decrease of \$86 million, or 0.9%, from fiscal year 2012 General Fund total revenues. The major changes from fiscal year 2012 were: (i) decreases in income taxes from corporations of \$173.8 million, or 12%, (ii) an increase of \$92.1 million in taxes withheld from non-residents, (iii) a decrease of \$198.5 million from the excise tax imposed on entities that purchase products manufactured in Puerto Rico by their affiliates under the provisions of Act 154, and (iv) an increase of \$257.6 million in miscellaneous non tax revenues, mostly related to the transfer of approximately \$240 million in excess funds in the Redemption Fund to the General Fund.

General Fund total expenses (on a cash basis) for fiscal year 2013 amounted to \$9.987 billion, consisting of \$8,723 million of operational expenses, \$383 million in rent payments to PBA and \$880.8 million of other financing uses (mostly debt service payments).

### *General Fund Revenues for Fiscal Year 2012 Compared to Fiscal Year 2011*

General Fund total revenues for fiscal year 2012 were \$8.783 billion. This total includes (i) \$8.668 billion in General Fund revenues (consisting of \$8.573 billion of operating revenues and \$94.0 million of revenues from the electronic and traditional lotteries that are available to the General Fund) and (ii) \$116 million of revenues from property taxes that are available to pay general obligation bonds.

The \$8.783 billion in General Fund total revenues for fiscal year 2012 represents an increase of \$440 million, or 5.3%, from fiscal year 2011 revenues. The major changes from fiscal year 2011 were: (i) decreases in income taxes from corporations of \$216.9 million, or 12.9%, (ii) a decrease of \$109.7 million in taxes withheld from non-residents, (iii) a decrease of \$202.1 million in the temporary special property tax, (iv) a decrease of \$113.6 million in non-tax revenues, and (iv) an additional \$1.198 billion from the excise tax imposed on entities that purchase products manufactured in Puerto Rico by their affiliates under the provisions of Act 154.

General Fund total expenses for fiscal year 2012 amounted to \$11.158 billion, consisting of \$9.911 billion of operating expenditures, \$331 million in rent payments to the PBA, and \$915.9 million of other financing uses (mostly debt service). These expenses were \$1.014 billion or 10% higher than the total expenses for fiscal year 2011.

### *General Fund Revenues for Fiscal Year 2011 Compared to Fiscal Year 2010*

General Fund total revenues for fiscal year 2011 were \$8.343 billion. This total includes (i) \$8.158 billion in General Fund revenues (consisting of \$7.994 billion of operating revenues and \$ 101.9 million of revenues from the electronic and traditional lotteries that are available to the General Fund), (ii) \$122.2 million of revenues from property taxes that are available to pay general obligation bonds, and (iii) \$125.3 million of excess funds transferred from COFINA.

The \$8.343 billion in total General Fund revenues for fiscal year 2011 represents an increase of \$311 million, or 3.9%, from fiscal year 2010 revenues. The major changes from fiscal year 2010 were: (i) decreases in income taxes from individuals of \$406.5 million or 15.7%, resulting from the implementation of the tax reform, (ii) an increase of \$170.1 million in taxes withheld from non-residents, and (iii) an additional \$677.6 million from the excise tax imposed on entities that purchase products manufactured in Puerto Rico by their affiliates under the provisions of Act 154.

General Fund total expenses (on a cash basis) for fiscal year 2011 were \$10.144 billion, consisting of \$9.075 billion of operating expenditures, \$267 million in PBA rental payments and \$801.8 million of other financing uses (principally debt service payments).

### *General Fund Revenues for Fiscal Year 2010 Compared to Fiscal Year 2009*

General Fund total revenues for fiscal year 2010 were \$8.032 billion. This total includes (i) \$7.716 billion in General Fund revenues (consisting of \$7.593 billion of operating revenues and \$122.8 million of revenues from the electronic and traditional lotteries that are available to the General Fund), (ii) \$114.7 million of revenues from property taxes that are available to pay general obligation bonds, and (iii) \$201.0 million from the sale of securities of the Puerto Rico Infrastructure Authority corpus account.

The \$8.032 billion in total General Fund revenues for fiscal year 2010 represents an increase in revenues of \$207 million, or 2.6%, from fiscal year 2009. The principal changes in sources of revenues from fiscal year 2009 included a decrease in the sales and use tax received by the General Fund of \$256.8 million due to the assignment to COFINA of an additional 1.75% of the 5.5% Commonwealth sales and use tax. This decrease in the amount of sales and use taxes allocated to the General Fund was fully offset, however, by increases in property taxes and excise taxes on cigarettes and alcoholic beverages of approximately \$227.8 million and \$60.5 million, respectively, as a result of the revenue raising measures implemented as part of the Commonwealth's fiscal stabilization measures. Revenues from income taxes for fiscal year 2010 were approximately the same as in fiscal year 2009.

Total expenditures for fiscal year 2010 were \$10.756 billion (which included \$173 million of expenditures related to a Commonwealth stimulus program); consisting of (i) \$9.640 billion of operating expenditures, (ii) \$250.7 million in PBA rental payments and (ii) \$865.3 million of other financing uses (principally debt service payments).

## Major Sources of General Fund Revenues

Various laws were recently enacted as part of the new administration's fiscal plan to obtain the necessary revenues to correct the Commonwealth's fiscal imbalance. The discussion below includes the effect of these new laws in the various tax revenue sources.

### *Income Taxes*

The historical revenue data presented in this Report is based on collections realized or accrued under the provisions of the Puerto Rico Internal Revenue Code of 1994, as amended (the "PR Code"), which applied to taxable years beginning after June 30, 1995 and ending before January 1, 2011. The PR Code was replaced by the Puerto Rico Internal Revenue Code of 2011, enacted as Act 1 of 2011 (as amended, the "2011 Code"), which applies to taxable years commencing after December 31, 2010. See "2011 Tax Reform" below. The 2011 Code was recently amended by various laws intended to increase revenues. Many of the provisions of the 2011 Code are identical to the equivalent provisions of the PR Code. Thus, unless otherwise noted, the discussion below refers to the provisions of both the PR Code and the 2011 Code.

*Individuals.* Resident individuals are subject to tax on their taxable income from all sources. The PR Code had four tax brackets for individuals, with tax rates of 7%, 14%, 25%, and 33%. The highest income tax bracket applicable to individuals under the PR Code was \$50,000. Under the 2011 Code, the highest income tax bracket gradually increases every year from taxable year 2011 through taxable year 2015 from \$60,000 to \$67,250 and then increases to \$121,500 for taxable years commencing with taxable year 2016. For taxable years starting before January 1, 2016, the income tax rates applicable to individuals remain unaltered under the 2011 Code. After January 1, 2016, the top individual rate is lowered to 30%. However, certain requirements must be satisfied in order for tax benefits under the 2011 Code to enter into effect for taxable years starting after December 31, 2013. See "2011 Tax Reform" below. Dividend income from Puerto Rico corporations and certain qualifying foreign corporations is taxed at an income tax rate of 10%.

Gains realized from the sale or exchange of a capital asset by resident individuals, if held for more than six months, is taxed at a rate of 10%.

Interest income in excess of \$2,000 on deposit with Puerto Rico financial institutions is taxed at a rate of 10%; the first \$2,000 of interest income from such institutions is exempt from taxation. Interest income on certain qualifying debt obligations issued by Puerto Rico corporations and certain qualifying foreign corporations and paid to resident individuals, trusts, estates, corporations and partnerships qualifies for a tax rate of 10%.

With respect to income taxes for individuals, the recently enacted Act 40 of June 30, 2013 ("Act 40") included the following measures:

- (i) self-employed individuals with gross income in excess of \$200,000 are subject to a 2% surtax on their gross income from self-employment.
- (ii) individuals with income subject to alternate basic tax in excess of \$500,000, will have their alternative basic tax rate increased from 20% to 24% ;

- (iii) the total deduction for mortgage interest on residential property is now limited to the lower of the amount of interest paid, 30% of the individual's adjusted gross income, or \$35,000.

*Corporations.* Puerto Rico corporations are subject to tax on income from all sources; foreign corporations that are engaged in a trade or business in Puerto Rico are subject to tax on their income from Puerto Rico sources and on income from sources outside Puerto Rico that is effectively connected with the conduct of their trade or business in Puerto Rico. Unless a corporation qualifies for partial exemption from corporate income and other taxes under the tax incentives programs (see "Tax Incentives" under "The Economy" above), it is subject to tax at graduated rates.

In general, the 2011 Code originally provided that for taxable years commencing after December 31, 2010, the highest corporate income tax rate would be lowered to 30% for net taxable income in excess of \$2,500,000 (which could be lowered to 25% for taxable years starting after December 31, 2013, subject to certain conditions) instead of the 39% top rate for net taxable income in excess of \$300,000 provided under the PR Code. Pursuant to Act 40, the maximum corporate income tax rate is reset at 39% for net taxable income in excess of \$300,000. Pursuant also to Act 40, the alternative minimum tax is set to the greater of (i) the amount produced by applying a minimum rate of 30% to the alternative minimum net income plus a special additional tax on gross receipts ranging from .20% to .85% for corporations with gross income in excess of \$1,000,000, or (ii) subject to certain exceptions, the amount produced by applying a 2% excise tax on the purchases from related parties of tangible personal property to be used in a Puerto Rico trade or business applicable to persons with gross sales of \$10 million or more during any of three preceding taxable years, plus 20% of expenses paid to related parties that are not subject to Puerto Rico income tax, plus the special tax on gross receipts ranging from .20% to .85%. In the case of financial businesses, this special tax on gross receipts is 1% and represents an additional tax instead of a component of the alternative minimum tax computation.

Gains realized from the sale or exchange of a capital asset, if held for more than six months, remains taxed at a maximum regular income tax rate of 15%. Dividends received by Puerto Rico corporations and partnerships from foreign corporations engaged in trade or business in Puerto Rico are subject to general income tax rates. A dividends received credit may be available when the corporation or partnership making the distribution is organized in Puerto Rico. Interest income on certain qualifying debt obligations issued by Puerto Rico corporations and certain qualifying foreign corporations, and paid to corporations and partnerships, qualifies for a special tax rate of 10%.

Resident foreign corporations whose gross income qualifies as income effectively connected with a Puerto Rico trade or business are generally subject to a branch profits tax. The branch profits tax is 10% of an annual dividend equivalent amount, and it applies without regard to the Puerto Rico source of income rules.

In general, corporations, and the partners of partnerships operating under a new grant of tax exemption issued under the Economic Incentives Act, are subject to a maximum income tax rate of 4% during their basic exemption period. Corporations, and the partners of partnerships operating under a new grant of tax exemption issued under the Tourism Development Act of 2010, are subject to a maximum tax rate of 39% on their taxable income, after applying the 90%

exemption granted under the Tourism Development Act of 2010, which results in a maximum effective tax rate of 3.9% on their net tourism development income.

Interest from Puerto Rico sources paid by Puerto Rico resident borrowers to non-resident non-affiliated corporate recipients is not subject to any income or withholding tax. Interest paid by Puerto Rico resident borrowers to certain related non-resident recipients is subject to a withholding tax of 29%. Dividends paid to non-resident corporate recipients are subject to a withholding tax of 10%. Dividends distributed by corporations operating under new grants of tax exemption issued under the Economic Incentives Act and the Green Energy Incentives Act are not subject to Puerto Rico income tax. However, royalty payments made by corporations covered under the Economic Incentives Act to non-resident recipients are subject to an income tax withholding of 2% or 12%, depending on certain elections made by the grantee, and in the case of corporations covered by the Green Energy Incentives Act, royalty payments to non-residents are subject to an income tax withholding of 12%.

Subject to certain exceptions, payments in excess of \$1,500 during a calendar year, made by the Commonwealth and persons engaged in a trade or business in Puerto Rico in consideration of the receipt of services rendered in Puerto Rico are subject to a 7% income tax withholding. In addition, Act 48 of June 30, 2013 (“Act 48”) provides for a special contribution of 1.5% on payments received from the Commonwealth, its municipalities, instrumentalities and agencies pursuant to contracts for professional services commencing on July 1, 2013.

In sum, with respect to income taxes for corporations, the recently enacted Act 40 of 2013 included the following measures:

- (i) corporations will have their surtax exemption reduced from \$750,000 to \$25,000 and the surtax exemption must be allocated among members of a controlled group of corporations.
- (ii) corporations will have their surtax rates reinstated to pre 2011 levels ranging from 5% to 19% for a maximum corporate income tax rate of 39% on net income in excess of \$300,000.
- (iii) the carryover for net operating losses is extended from 10 years to 12 years for losses incurred in taxable years commencing after December 31, 2004 and before January 1, 2013. The carryover for net operating losses incurred after December 31, 2012 will remain at 10 years but the deduction for such losses is limited to 90% of the net income of the year in which the deduction is claimed regardless of the year in which the loss is incurred.
- (iv) 51% of the payments or transfers to related parties not engaged in trade or business in Puerto Rico or to the payor’s home office that are not subject to tax in Puerto Rico, such as payments for services rendered outside of Puerto Rico, will be disallowed as deductions unless the payments are subject to tax in Puerto Rico.
- (v) corporations with gross income in excess of \$1,000,000 will be subject to a special additional tax on gross receipts as part of their alternative minimum tax (“AMT”) computation ranging from .20% to .85%. Corporations with grants

under various tax exemption statutes, agricultural businesses and non-profit entities, are exempt from this special tax.

- (vi) Financial businesses are subject to the special additional tax on gross receipts of 1% in addition to the regular income tax. However, a credit of .5% may be claimed in subsequent years.

Act 40 also made substantial changes in the method of computing the net income subject to AMT in the case of corporations, such as (a) providing that the AMT will be the highest of the regular tax or several alternative computations, (b) increasing the AMT book income adjustment from 50% to 60%, and (c) decreasing the net operating loss deduction for AMT purposes from 90% to 80% of the alternative minimum tax income.

With respect to pass-through entities, Act 40 provides that payments to nonresident partners, shareholders or members owning 50% or more of interest in such pass-through entities will also be disallowed as deductions if payments are not subject to tax in Puerto Rico. These disallowances will not apply to entities with tax exemption grants under the various Commonwealth tax incentives laws. Also, the Secretary of Treasury has the authority to waive the disallowances for other taxpayers. In addition, pass-through entities will be required also to pay the special additional tax on gross receipts at the entity level and report the amount also to the partners, stockholders or members so that they can include their distributable share of this special additional tax on their AMT calculations.

### *2011 Tax Reform*

The 2011 tax reform focused on reducing taxes, promoting economic development and job creation, simplifying the tax system and reducing tax evasion. The tax reform was originally projected to provide taxpayers aggregate annual savings of \$1.2 billion for each of the next six fiscal years, commencing on taxable year 2011.

The reduction in income tax revenues resulting from the implementation of the tax reform was expected to be offset by the additional revenues produced by (i) an expanded income tax source rule and a new excise tax imposed on entities that purchase products manufactured in Puerto Rico by their affiliates under the provisions of Act 154, discussed below, (ii) enhanced enforcement efforts, including the statutorily required reporting of certain client information by financial institutions to the Treasury Department, and (iii) increased economic activity produced by the tax relief measures. The combined effect of the tax reform measures and the revenue and enforcement measures was expected to be revenue positive but there was no assurance that sufficient revenues would be collected to partially offset the reduction in income tax revenues expected from the implementation of the tax reform. As a result, the 2011 Code conditioned the implementation of the tax reductions applicable to individuals for taxable years commencing after December 31, 2013 on the Commonwealth's ability to continue its path towards fiscal stability. Specifically, the tax relief provisions for individuals for taxable years 2014 through 2016 will only be implemented if (i) OMB certifies that the expense control target has been met, (ii) the Treasury Department certifies that the General Fund revenue target has been met and (iii) the Planning Board certifies a year-over-year target increase in gross domestic product.

## *Act 154*

Act 154 was enacted, among other things, to balance the tax burden among the taxpayers and increase the tax revenues of the Commonwealth. Act 154 modified the income taxation of certain nonresident alien individuals, foreign corporations and foreign partnerships by expanding the circumstances in which such persons would be subject to Puerto Rico income taxation, and imposed an excise tax on the acquisition of certain personal property manufactured or produced in whole or in part in Puerto Rico and on the acquisition of certain manufacturing services carried out in Puerto Rico. Act 154 applies to income realized and acquisitions occurring after December 31, 2010. The Commonwealth estimates that this excise tax affects mostly foreign corporations or partnerships that are principally engaged in the manufacturing of pharmaceuticals and electronics.

Act 154 provides that, in certain circumstances, taxpayers will be deemed to be engaged in trade or business in Puerto Rico, and taxable in Puerto Rico with respect to a portion of the taxpayer's income, where the taxpayers engage in significant transactions with other persons that are members of the same controlled group. Where a person engages in significant transactions with a member of the same controlled group that has gross receipts of \$75 million or more in any of the preceding three taxable years, and that manufactures or produces goods in Puerto Rico, or provides services in connection with the manufacture or production of goods in Puerto Rico, the person will not be subject to income tax, and will instead be subject to the excise tax in lieu of any income tax. The excise tax is based on the value of the personal property or services acquired. The excise tax was originally scheduled to apply for a period of six years and was set at 4% for calendar year 2011, declining every year until reaching 1% in 2016. For the reasons explained below, on February 28, 2013, the Commonwealth amended Act 154 to set the excise tax at a fixed 4% and extend its application until 2017.

On December 29, 2010, the Treasury Department adopted regulations that provide certain tax credits against the temporary excise tax that lessen its impact on affected taxpayers subject to the temporary excise tax. These regulations became effective on January 1, 2011. The regulations address implementation and interpretation issues and include provisions regarding certain applicable credits against the tax subject to maintaining a baseline employment and other conditions.

At the time of adoption of Act 154, the Commonwealth expected to raise approximately \$1.4 billion from the excise tax during the first year of implementation and \$5.6 billion for the six year period that the excise tax was originally intended to be in place. Although the amounts collected under Act 154 have met the initial projections, such revenue has not been sufficient to fully offset the reduction in tax revenues from other sources. As a result, on February 28, 2013 the Commonwealth amended Act 154 to extend the period of the excise tax until December 31, 2017 and reset the excise tax rate to a fixed 4% commencing on July 1, 2013

While the Commonwealth expects that certain taxpayers subject to the excise tax will be able to credit all or a portion of the excise tax paid against their United States federal income tax liabilities, it is uncertain how this tax will affect each individual taxpayer. The long-term effects of the excise tax on the manufacturing sector of the Puerto Rico economy are also uncertain.

In connection with the expansion of the taxation of foreign persons by Act 154, the Commonwealth obtained a legal opinion regarding the creditability of the excise tax for United

States federal income tax purposes. The opinion concludes that the aforementioned excise tax should be creditable against United States federal income tax. That conclusion was based in part upon a determination that the expansion of the taxation of foreign persons and the imposition of the excise tax will more likely than not satisfy the constitutional requirements of due process and the Commerce Clause of the United States Constitution, for reasons discussed therein.

On March 30, 2011, the United States Internal Revenue Service (“IRS”) issued Notice 2011-29 addressing the creditability of the excise tax imposed by Act 154. Notice 2011-29 provides that the provisions of the excise tax are novel and the determination of its creditability requires the resolution of a number of legal and factual issues. Pending the resolution of those issues, the IRS will not challenge a taxpayer’s position that the excise tax is a tax in lieu of an income tax under Section 903 of the United States Internal Revenue Code of 1986, as amended. The IRS also provided that any change in the foregoing tax credit treatment of the excise tax after resolution of the pending issues will be prospective and will apply to excise tax paid or accrued after the date that further guidance is issued.

Act 154 has not been challenged in court; consequently, no court has passed on the constitutionality of Act 154. There can be no assurance that its constitutionality will not be challenged and that, if challenged, the courts will uphold Act 154. To the extent a court determines that the imposition of the excise tax or the expansion of the income tax or both are unconstitutional, the Commonwealth’s revenues may be materially adversely affected.

### *Sales and Use Taxes*

Act No. 117 of July 4, 2006 (“Act 117”) amended the PR Code to provide, among other things, for a general sales and use tax of 5.5% to be imposed by the central government (the “Commonwealth Sales Tax”). Act 117 also authorized each municipal government to impose a municipal sales and use tax of 1.5% (the “Municipal Sales Tax” and, together with the Commonwealth Sales Tax, the “Sales Tax”). In general, the Municipal Sales Tax has the same tax base, exemptions (except for unprocessed foods) and limitations as those provided for the Commonwealth Sales Tax. Act 117 also provided certain income tax reductions to address the regressive effect of the Sales Tax on taxpayers in lower income tax brackets. The Sales Tax is imposed on the sale, use, consumption and storage of taxable items, which include tangible personal property, taxable services, admission rights and certain other types of transactions covering separable and identifiable taxable items which are sold for a single price, subject to certain exceptions and limitations. The Sales Tax does not apply to, among other things: (i) motor vehicles, (ii) non-prepared food, (iii) healthcare services and prescription drugs, (iv) certain bakery goods, (v) crude oil and its derivatives, including gasoline, (vi) hotel room charges, (vii) financial services, (viii) services provided by the Commonwealth, including electricity and water, and (ix) local sales of goods to be used as raw material in a manufactured good, whether or not bound for export. Act 117 also contained various exemptions from the Sales Tax for certain specific items and for certain kinds of transactions such as business to business services and sales.

Act 117 also repealed the 5% general excise tax imposed on imported goods and the 3.6% general excise tax imposed on goods manufactured in Puerto Rico. Other items, such as fuel, crude oil and petroleum products, and vehicles, however, remain subject to the excise tax previously applicable to such items, and are not subject to the Sales Tax.

The Sales Tax became effective on November 15, 2006 and the effective date of the repeal of the 5% general excise tax was October 16, 2006. Municipalities were authorized to implement the Municipal Sales Tax starting on July 1, 2006. The revenues derived from the Sales Tax are distributed as follows: 5.5% goes to the central government and 1.5% to Puerto Rico's municipalities. One half of the 5.5% Commonwealth Sales Tax is transferred to the Dedicated Sales Tax Fund, created by Act 91 of 2006, as amended, and the balance goes to the General Fund. The 1.5% Municipal Sales Tax is divided as follows: (i) 1% goes to the municipalities, and (ii) 0.5% goes to the Municipal Improvements Fund. The increase in revenues generated by the Sales Tax has been partly offset by the elimination of the 5% general excise tax and the effect of the income tax reduction measures included in Act 117.

The Treasury Department originally reported and recorded Commonwealth Sales Tax revenues on a "modified cash basis." This means that the figures for each month represent the sales taxes corresponding to sales made by merchants and retailers and sales tax collected by such merchants and retailers during that month, but reported and remitted to the Treasury Department during the following month.

Effective fiscal year 2010, the Treasury Department began reporting Commonwealth Sales Tax revenues on a cash basis in order to report these revenues on the same basis and at the same time as it reports all other tax revenues. Accordingly, for fiscal year 2010, Commonwealth Sales Tax revenues were reported in the month in which such revenues were received by the Treasury Department. The new reporting method became effective as of July 1, 2009. Thus, the figures for sales tax collections previously reported in June 2009 were transferred to July 2009.

The Sales Tax generated revenues for the General Fund of approximately \$543.2 million for fiscal year 2012 and generated approximately \$552.8 million for fiscal year 2013 according to preliminary unaudited numbers for fiscal year 2013.

Act 40 made the following changes to the Sales Tax:

- (i) the daily rental of motor vehicles is subject to the Sales Tax unless it qualifies under the business to business services exemption.
- (ii) the business to business services exemption to the Sales Tax was amended to exclude various transactions such as bank service charges to commercial clients, collection services, security and armored services, cleaning services, laundry services, repair and maintenance of real and personal property (not capitalizable), telecommunication services, and waste disposal services. These services will qualify for the business to business services exemption if performed by related parties.
- (iii) the resellers exemption certificate is limited for sales after July 31, 2013 to eligible resellers that mainly sell to businesses that purchase articles exempt from the Sales Tax or for export. This date was administratively extended to August 15, 2013. Commencing August 16, 2013, sales to non-eligible resellers will be subject to the 6% of the Sales Tax payable to the Treasury Department but a reseller credit mechanism will be available to such non-eligible resellers limited to 70% of the Commonwealth Sales Tax paid by the reseller for each month. This credit may be increased to 100% once a demand deposit account is established by

the taxpayer in Puerto Rico. Pursuant to administrative interpretation, the sales to resellers will continue to be exempt from the 1% of the sales tax payable to the municipalities. Also, pursuant to an administrative ruling, wholesalers that meet certain requirements will be entitled to a Sales Tax collection waiver.

- (iv) the exemption for purchases made by universities and higher education institution is repealed.
- (v) the exemption for purchases made by cooperatives is repealed.
- (vi) the exemption for purchases made by hospitals is limited.
- (vii) the exemption for purchases during the back to school tax holiday period is limited. Textbooks and notebooks are will be exempt from the Sales Tax all year round. Other school supplies such as uniforms will be subject to two tax holiday periods, one in July and another in January. Electronic items such as televisions and computers are no longer considered items covered by the back to school holiday.
- (viii) the Municipal Sales Tax is reduced from 1.5% to 1% effective December 1, 2013 for a total Sales Tax of 6.5% instead of 7%. The decrease in the Sales Tax may be postponed or reversed upon further study by the Government.

The elimination or limitation of the various exemptions explained above, will broaden the tax base of the Sales Tax and permit a reduction of the Sales Tax from a 7% to 6.5%.

In addition, (i) Act 40 also requires the establishment of a plan to control and monitor, the collection and deposit of the Sales Tax to increase the Sales Tax revenues of the Commonwealth; (ii) Act 42 of 2013 amended the 2011 Code to broaden the nexus rules used to determine when a merchant will be considered to be engaged in the sale of taxable items in Puerto Rico for purposes of the Sales Tax; and (iii) Act 46 of 2013 requires the declaration and payment of the Sales Tax on imported goods at the time of their entry into Puerto Rico. This requirement does not apply to goods imported for resale.

### *Excise Taxes*

The PR Code imposes an excise tax on certain articles and commodities, such as cigarettes, alcohol, sugar, cement, motor vehicles, heavy equipment, boats and certain petroleum products, which are taxed at different rates.

Under Act 7, the excise tax was increased on certain articles (cigarettes and certain alcoholic beverages) and was expanded with respect to others (motor vehicles). With respect to cigarettes, the increase was approximately 81% per taxable unit. For certain alcoholic beverages, the increase ranged between \$0.30 and \$0.70 per standard gallon. The 2011 Code incorporated most of the increases made by Act 7, but provided an increase in the tax applicable to concentrated wine must (from \$4.48 to \$7.00 per gallon), while reducing the tax payable with respect to champagne from concentrated wine must (from \$4.48 to \$2.25 per gallon). Motorcycles, all-terrain vehicles and “scooters,” which used to be subject to the Sales Tax, are now subject to an excise tax of 10% under the 2011 Code.

Act 41 of 2013 increased the excise tax applicable to cigarettes from \$11.15 to \$16.15 per hundred cigarettes effective July 1, 2013, and to \$17.00 per hundred cigarettes effective July 1, 2015. Act 41-2013 also imposes a new tax on smokeless tobacco of \$1.00 per pound for chewing tobacco and \$3.02 per pound for powdered tobacco (“snuff”) or other products derived from tobacco.

Act 40 of 2013 imposes a special 1% tax for taxable years commencing after December 31, 2012, on premiums earned after June 30, 2013 by insurance companies authorized to do business in Puerto Rico. Annuities and premiums for Medicare Advantage, Medicaid and Mi Salud programs are excluded.

Act 48 of 2013 imposed a special tax of 1.5% of the value of contracts for professional and consulting services, including advertising, legal, public relations, communications and lobbying services executed by the Government or any of its agencies, instrumentalities, public corporations and the legislative and judicial branches. This tax is not creditable or deductible for income tax purposes.

Act 31 of 2013 reduced the tax on gas oil or diesel oil from \$.08 to \$.04 per gallon and increased the tax on crude oil products and hydrocarbons from \$3.00 per barrel dependent on the price of crude oil to a fixed \$9.25 per barrel subject to adjustment for inflation every four years.

### *Property Taxes*

Personal property, which accounts for approximately 46% of total collections of taxable property, is self-assessed. Real property taxes are assessed based on 1958 property values. No real property reassessment has been made since 1958, and construction taking place after that year has been assessed on the basis of what the value of the property would have been in 1958. Accordingly, the overall assessed valuation of real property for taxation purposes is substantially lower than the actual market value. Also, an exemption on the first \$15,000 of assessed valuation in owner-occupied residences is available.

Property taxes are assessed, determined and collected for the benefit of the municipalities by the Municipal Revenues Collection Center (“CRIM”), a government instrumentality of the Commonwealth. However, 1.03% of the property tax based on the assessed value of all property (other than exempted property) is used for purposes of paying the Commonwealth’s general obligation debt and is deposited in the Commonwealth’s Redemption Fund.

Act 7 did impose, however, an additional real property tax on residential and commercial real properties with appraised values in excess of approximately \$210,000. This tax applied during fiscal years 2010, 2011 and 2012. The additional real property tax, which was collected by the Treasury Department, amounted to 0.591% of such properties’ appraised value as determined by the CRIM. The 2011 Code eliminated this additional real property tax for fiscal year 2012.

Act 40 of 2013 provides that the Sales Tax paid by a reseller is excluded from the valuation of inventory for personal property tax purposes.

The following table presents the assessed valuations and real and personal property taxes collected for fiscal years 2009 to 2013.

**Commonwealth of Puerto Rico**  
**Assessed Valuations and Real and Personal Property Taxes**  
**(Commonwealth and Municipalities Combined)**  
**(in thousands)**

Fiscal Years Ended June 30,	Assessed Valuations <sup>(1)</sup>	Taxes Levied	Collections of Current Year	Collections of Previous Years	Total Collections

*Other Taxes and Revenues*

Motor vehicle license plate and registration fees comprise the major portion of license tax receipts. Act 30 of 2013 approved the transfer to the Highways and Transportation Authority of the portion of \$25 currently allocated to the General Fund from the \$40 or more charged as annual motor vehicle registration fees.

Non-tax revenues consist principally of lottery proceeds, documentary stamps, permits, fees and forfeits, proceeds of land sales and receipts from public corporations in lieu of taxes.

*Revenues from Non-Commonwealth Sources*

Revenues from non-Commonwealth sources include customs duties collected in Puerto Rico and excise taxes on shipments of rum from Puerto Rico to the United States mainland. The customs duties and excise taxes on shipments are imposed and collected by the United States and returned to the Commonwealth. The excise tax on shipments of rum from Puerto Rico and other rum producing countries is currently \$13.50 per gallon. Of this amount, the lesser of \$10.50 per proof gallon and the actual excise tax imposed is currently returned (“covered over”) to the Commonwealth. Since 1999, however, the United States Congress has enacted special supplementary legislation increasing the maximum amount covered over to the Commonwealth to \$13.25 per proof gallon. For fiscal year 2012, the total excise taxes on rum shipments returned to the Commonwealth was \$400.5 million, of which \$302.3 million went to the General Fund.

In June 2008, the Government of the United States Virgin Islands (the “USVI”) signed an agreement with Diageo USVI, Inc. (“Diageo”) for the construction and operation of a new rum distillery in St Croix, USVI, that will manufacture Captain Morgan branded products to be sold in the United States beginning in January 2012. Previously, all rum used in Captain Morgan products sold in the United States was procured through a supply contract with Serrallés Distillery (“Serrallés”) in Puerto Rico which expired on December 31, 2011. The

Commonwealth estimates that the exports of Captain Morgan rum produced in Puerto Rico by Serrallés during calendar year 2009 were 9,403,224 proof gallons. These rum exports of Captain Morgan resulted in an estimated \$124.5 million in excise tax on rum shipments returned by the United States to Puerto Rico during fiscal year 2009. As a result of the termination of the contract between Serrallés and Diageo, it is expected that after 2011, the income received by the Commonwealth from the federal excise tax on rum shipments will decrease, unless Serrallés is able to find other clients in the United States for the volume of bulk rum previously purchased by Diageo for its Captain Morgan products.

In an effort to maintain the local rum industry, as a result of the threat posed by the USVI's agreement with Diageo, and to preserve or increase the amount of federal excise taxes on rum shipments returned to the Commonwealth under the cover-over program, Act No. 178 of December 1, 2010 ("Act 178") was enacted, which increases from 10% to 25% the portion of the monies from the federal excise tax that the Commonwealth may invest to provide incentives to, and promote, the Puerto Rican rum industry. The law also authorizes the Governor to increase this percentage up to 46% after December 31, 2011, through an Executive Order. In order to promote the Puerto Rican rum industry in general, the amount received from such refund will be transferred to a special account of the General Fund, which may be used for marketing, production and infrastructure investment incentives. Effective January 1, 2011, Act 1 of 2011 replaced Act 178 and contains identical provisions.

As permitted under Act 1 of 2011, the Commonwealth entered into a definitive agreement with three rum producers and is currently in negotiations with other producers to provide them a series of subsidies and incentives, by allowing such companies to benefit from the cover-over program rebate. These agreements are expected to promote and encourage the export of rum produced in Puerto Rico. As a result of these agreements, during fiscal year 2013 the Treasury Department allocated \$75.4 million of total revenues from the federal excise tax on rum shipments for these incentives. The amount of the payments during fiscal year 2013 was affected by the federal offset of federal funds related to a debt with the USACE. See "Recent Developments-Federal Offset Program" under INTRODUCTION for an explanation of this situation.

### **Administrative Measures to Increase Collections of Income, Sales, and Excise Taxes and Property Taxes**

The Treasury Department has elaborated a strategic plan designed to improve tax collections. The plan includes initiatives to increase tax compliance, implement effective enforcement measures, and attack tax evasion. To promote taxpayers' compliance, the Treasury Department has liberalized the procedures to enter into payment plans, offers-in-compromise agreements, and encouraged voluntary disclosure agreements.

In addition, the Treasury Department has developed initiatives focused on effective enforcement methods, such as improving the efficiency of its audit selection process, and the use of technological solutions to improve collections. The Treasury Department has also integrated its databases and established a tax intelligence project to identify tax evasion and improve its audit selection process.

On September 28, 2010, the Treasury Department signed an agreement for the implementation of a new point of sale system that is intended to strengthen its Sales Tax

enforcement efforts. The system is designed to: (i) transmit daily to the Treasury Department information on all sales tax transactions; (ii) reconcile transmitted transactional information with information reported by merchants; (iii) provide wireless transmission devices for use by street vendors; and (iv) capture a greater percentage of cash sales through the implementation of a special lottery using sales receipts as lottery tickets (the “IVU Loto”). The Treasury Department implemented this new point of sale system in phases between December of 2010 and December of 2012. All qualifying merchants were required to register for participation in the point of sale system program on or prior to April 30, 2011. As of September 30, 2013, 225,037 locations had registered in the program and 102,316 of such locations will be required to acquire and use the new point of sale system.

The Treasury Department has developed various initiatives directed towards increasing collections of income taxes and the Sales Tax through the implementation of various enforcement and compliance programs. Other programs are geared towards the use of technology to detect noncompliance. For example, the Treasury Department completed the integration of its general computer systems with the Sales Tax database in order to better detect non-compliance. Such integration has allowed the Treasury Department to compare the electronic information provided by the transactional database and the data contained in the tax returns repository. Such comparison offers the Treasury Department with detailed information about which merchants reflect taxable transactions but are either (i) not duly submitting the corresponding sales and use tax return; (ii) submitting erroneously prepared tax returns – returns with less sales volume transactions than the information provided by the transactional database; (iii) merely submitting with no payment as the law requires; (iv) or merchants not reporting cash sales. In order to address these possible instances of non-compliance, the Treasury Department created a task force consisting of fiscal auditors and agents from the Consumer Tax Bureau and the Tax Evasion Bureau. The fiscal auditors are responsible for investigating inconsistencies reported by the point of sale system, determine tax deficiencies and issue preliminary deficiency notices. The agents of the Consumer Tax Bureau provide assistance to the fiscal auditors in connection with any additional information requirements and visit merchants and retailers to investigate the status of their permits and point of sale systems. Finally, the agents from the Tax Evasion Bureau are responsible for investigating any tax crimes discovered by the fiscal auditors and/or agents from the Sales and Use Tax Bureau. As a result of these initiatives, as of June 28, 2013, Treasury issued notices to merchants requiring the filing of 304,731 monthly Sales Tax returns. Treasury collected tax for \$5,400,000 from the filing of 89,851`returns (29.4%) affecting 63,216 merchants. Furthermore, Treasury collected a tax for \$1,800,000 for insufficiency for a total collection in the amount of 7,200,000.

In addition to the above, the new administration is pursuing the automatic collection of the Sales Tax through a direct deposit process directly from point of sale services providers. The Secretary of the Treasury has hired an expert consultant in the technology of point of sales systems and devices with the specific assignment of having this new collection methodology operational as soon as possible. Such initiative is already in the design and planning phase and is expected to be operational within the next 12 to 18 months. Also, Treasury designed and developed a standardize selection process focused on merchants that have been affected by the enactment of Act 40-2013 to verify compliance with SUT, licenses, and IVU loto program. The design and development process was divided in two groups: (1) merchants that are affected by the business to business provisions and (2) any other merchants. On July 2, 2013, Treasury issued Circular Letter 13-04 to clarify application of the elimination of the business to business

exemption for certain services. Treasury implemented the initiative at the beginning of August 2013 by visiting the selected merchants to orientate on Circular Letter 13-04.

Treasury identified that taxpayers were incorrectly using the resellers exemption certificates negatively affecting the Sales Tax collection. Act 40 eliminated the resellers exemption certificates, which have been cancelled as of August 16, 2013. As such, new processes are being implemented to allow a credit for tax payment in resale businesses as provided on Act 40 on the Sales Tax monthly tax return.

## **Transfers to General Obligation Redemption Fund**

These consist of transfers from the General Fund to the Redemption Fund for the amortization of the principal of, and interest on, general obligation bonds and notes of the Commonwealth.

## **Components of General Fund Expenditures**

### *Grants and Subsidies*

This category includes grants and contributions to municipalities, public corporations with independent treasuries, and charitable institutions. It also includes items for, or included in, court awards, damage awards for personal injury or property damage, and payment of taxes and payments in lieu of taxes.

### *Personal Services*

This category includes compensation paid for personal services rendered to the Commonwealth and its public instrumentalities by individuals or firms in the form of salaries, wages, per diems, fees, commissions, or other forms of compensation.

### *Other Services*

This category includes compensation for services other than the services referred to above, including advertising, printing, communications, legal expenses, utilities, building and equipment rental and maintenance expenses, insurance premiums and miscellaneous services.

### *Materials and Supplies*

This category includes all articles that ordinarily have a short life and durability, lose their characteristic identity in the process of use, have only nominal value (\$25 or less), or are not otherwise chargeable as equipment.

### *Equipment Purchases*

This category includes items that have three special characteristics distinguishing them from materials: durability, long useful life, and high unit cost. In addition, these items are subject to centralized inventory control as fixed assets.

### *Capital Outlays and Other Debt Service*

Capital outlays are made primarily for land acquisition or interests in land, construction of buildings, roads, bridges and other structures, and permanent improvements and additions. Other debt service includes payments on notes held by GDB to be paid from the General Fund and payments for the amortization of the principal of, and interest on, non-general obligation debt payable from Commonwealth appropriations.

### *Transfers to Agencies*

These transfers include the repayment of loans and advances to other funds, certain refunds, advances from other funds and other receipts, repayment of advances from other funds, grants and contributions to other funds under the custody of the Secretary of the Treasury and other items. The major portion of grants and contributions in recent fiscal years has consisted of transfers to cover the costs of health reform and advances to the municipalities.

### *Other Expenditures*

This category represents recurring General Fund expenditures not appropriately attributable to other expenditure line items, such as advances to government agencies and municipalities, which advances are by law required to be reimbursed to the General Fund.

### *Federal Grants*

The Commonwealth receives grants under numerous federal programs. Federal grants to the agencies and instrumentalities of the Commonwealth are estimated to be \$4.646 billion for fiscal year 2012, a decrease of \$378 million, or 8%, from fiscal year 2011. Federal grants for fiscal year 2013 are projected at \$4.499 billion, which is consistent with the level for fiscal year 2012. The following table presents revenues from federal grants by broad program areas, which are accounted in the central accounting system of the Treasury Department. The figures for fiscal years 2009 through 2012 are actual figures. The figures for fiscal year 2013 are the amounts included in the adopted budget.

<sup>(1)</sup>Budget.

Source: *Office of Management and Budget*

## BUDGET OF THE COMMONWEALTH OF PUERTO RICO

### Office of Management and Budget

OMB's primary role is to assist the Governor in overseeing the preparation of the budget of the Commonwealth and supervise its administration in the agencies of the Executive Branch. In helping to formulate the Governor's budget, OMB evaluates the effectiveness of agency programs, policies, and procedures, assesses competing funding demands among agencies, and sets funding priorities.

In addition, OMB oversees and coordinates the administration's initiatives in financial management, information technology, general management and organizational structure, and supervises the agencies' compliance with the Governor's program and regulatory policies. In each of these areas, OMB's role is to help improve administrative management, develop better performance measures and coordinating mechanisms, and promote efficiency in the use of public funds.

### Budgetary Process

The fiscal year of the Commonwealth begins each July 1. The Governor is constitutionally required to submit to the Legislative Assembly an annual balanced budget of total resources, capital improvements, and operating expenses of the central government for the ensuing fiscal year. The annual budget is prepared by OMB, in coordination with the Planning Board, the Treasury Department, and other government offices and agencies. Section 7 of Article VI of the Constitution provides that "The appropriations made for any fiscal year shall not exceed the total resources estimated for said fiscal year unless the imposition of taxes sufficient to cover said appropriations is provided by law."

The annual budget, which is developed utilizing elements of program budgeting, includes an estimate of revenues and other resources for the ensuing fiscal year under (i) laws existing at the time the budget is submitted, and (ii) legislative measures proposed by the Governor and

submitted with the proposed budget, as well as the Governor's recommendations as to appropriations that in his judgment are necessary, convenient, and in conformity with the four-year investment plan prepared by the Planning Board.

The Legislative Assembly may amend the budget submitted by the Governor but may not increase any items so as to cause a deficit without imposing taxes or identifying additional resources to cover such deficit. Upon passage by the Legislative Assembly, the budget is referred to the Governor, who may decrease or eliminate any item but may not increase or insert any new item in the budget. The Governor may also veto the budget in its entirety and return it to the Legislative Assembly with the Governor's objections. The Legislative Assembly, by a two-thirds majority in each house, may override the Governor's veto. If a budget is not adopted prior to the commencement of a fiscal year, the budget for such fiscal year shall be the annual budget for the preceding fiscal year as originally approved by the Legislative Assembly and the Governor until a new budget is approved. This permits the Commonwealth to continue making payments of its operating and other expenses until a new budget is approved.

### **Financial Control and Adjustment Procedures**

Revenue estimates for budgetary purposes are prepared by the Treasury Department, except for estimates of federal grants, which are prepared by OMB based on information received from the various departments and other recipients of such grants. Revenue and federal grant estimates are under continuous review and, if necessary, are revised during the fiscal year. Fiscal control over expenditures is exercised by the Governor, through the Director of OMB, and the Secretary of the Treasury.

During any fiscal year in which the resources available to the Commonwealth are insufficient to cover the appropriations approved for such year, the Governor may take administrative measures to reduce expenses and submit to both houses of the Legislative Assembly a detailed report of any adjustment necessary to balance the budget, or make recommendations to the Legislative Assembly for new taxes or authorize borrowings under provisions of existing legislation or take any other necessary action to meet the estimated deficiency. Any such proposed adjustments shall give effect to the "priority norms" established by law for the disbursement of public funds in the following order of priority; first, the payment of the interest on and amortization requirements for public debt (Commonwealth general obligations and guaranteed debt for which the Commonwealth's guarantee has been exercised); second, the fulfillment of obligations arising out of legally binding contracts, court decisions on eminent domain, and other unavoidable obligations to protect the name, credit and good faith of the Commonwealth; third, current expenditures in the areas of health, protection of persons and property, education, welfare, and retirement systems; and fourth, all other purposes.

A Budgetary Fund was created by Act No. 147 of June 18, 1980, as amended (the "Budgetary Fund"), to cover the appropriations approved in any fiscal year in which the revenues available for such fiscal year are insufficient, to secure the payment of public debt, and to provide for unforeseen circumstances in the provision of public service. An amount equal to one percent of the General Fund net revenues of the preceding fiscal year is required to be deposited annually into the Fund. In addition, other income (not classified as revenues) that is not assigned by law to a specific purpose is also required to be deposited in the Budgetary Fund. The maximum balance of the Budgetary Fund may not exceed 6% of the total appropriations included in the budget for the preceding fiscal year. During the last fiscal years, the Legislative

Assembly approved joint resolutions to halt temporarily the deposit of funds into the Budgetary Fund, and such funds were used instead to cover the budgetary deficit. As of June 30, 2013, the balance in the Budgetary Fund was \$4.8 million.

An Emergency Fund was created by Act No. 91 of June 21, 1966 (“Act 91 of 1966”), as amended (the “Emergency Fund”), to cover unexpected public needs caused by calamities, such as wars, hurricanes, earthquakes, droughts, floods and plagues, and to protect people’s lives and property and the public sector credit. The Emergency Fund is capitalized annually with an amount totaling no less than one percent of the General Fund net revenues of the preceding fiscal year. Act No. 91 was amended in 2003 to set an upper limit to the Emergency Fund of \$150 million at the beginning of the fiscal year. Act No. 91 was further amended in 2005 to authorize the disbursement of funds from the Emergency Fund to cover certain General Fund expenditures and operational costs of the State Emergency Management Agency and authorized GDB to lend to the Commonwealth up to \$150 million to replenish the Emergency Fund to provide funding for emergency and disaster needs. As of June 30, 2013, the Emergency Fund had \$2.9 million available to be borrowed from GDB. Joint Resolution No. 60 of July 1, 2011 authorized the conversion of this loan into a revolving line of credit with the same authorized limit of \$150 million.

## **Appropriations**

Appropriations in the central government budget of Puerto Rico consist of the following:

(i) *General Fund appropriations for recurring ordinary operating expenses of the central government and of the Legislative Assembly.* These are made by a single annual law known as the Joint Resolution of the General Budget.

(ii) *General Fund appropriations for special operating expenses, for contributions to municipalities, the University of Puerto Rico and the Judicial Branch, and for capital expenditures.* These are authorized by separate law.

(iii) *Disbursements of Special Funds for operating purposes and for capital improvements.* For the most part, these do not require annual legislative authorization, because they are authorized by previous legislation or by the United States Congress. Federal grants constitute the major part of the resources of the Special Funds.

(iv) *Bond Fund appropriations for capital expenditures financed by bonds.* Expenditures of these funds occur in one or more years.

(v) *Other Funds.* Appropriations may be made from time to time from non-recurring surplus funds extractions or dividends from control government agency special funds, public corporations or other sources.

In Puerto Rico, the central government performs many functions, which in the fifty states are the responsibility of local governments, such as providing public education, police and fire protection. The central government also provides significant annual grants to the University of Puerto Rico and to the municipalities. In addition, the Commonwealth appropriates annually to the Judicial Branch an amount equal to 4% of the average annual revenue from internal sources

for each of the two preceding fiscal years. This percentage may be increased upon review, with scheduled reviews every five years.

For fiscal year 2011, approximately 25% of the General Fund was committed to the payment of fixed charges such as municipal subsidies, grants to the University of Puerto Rico, mandated funding for the Judicial Branch, rent payments to PBA, and debt service on the direct debt of the Commonwealth (excluding debt service that was refinanced, as discussed below). This proportion remained stable in fiscal years 2012 and 2013, remaining at 25% in fiscal year 2013.

For fiscal year 2009, over 64% of the controllable funds portion of the General Fund was committed for the payment of the central government payroll (not including the University of Puerto Rico and the Judicial Branch). This percentage has decreased gradually and OMB estimates that it will continue to decrease in fiscal year 2014, based on a year over year payroll for the July and August 2014 period compared to July and August 2013.

The following table shows a breakdown between controllable and non-controllable General Fund expenses for fiscal years 2013 and 2014. The following expenses are categorized as controllable in the table: utility payments to public corporations and all contributions to the government retirement systems, including, among others, regular payroll contributions, Act 70 annuities, incremental Act 114 and Act 116 payroll contributions, voluntary additional appropriations and special laws. The increase in rent payments shown in the table below corresponds to the planned payment in full by PBA of its debt service, and the corresponding effect on rent estimated to the General Fund. During prior fiscal years 2012 and 2013, PBA refinanced its debt service, leading to substantially lower rent payments. See “Recent Measures to Address Fiscal Condition and Promote Economic Growth” under “THE ECONOMY”.

**Expenses Breakdown for the General and Stabilization Funds  
(in millions)**

	<b>2013 *</b>	<b>2014**</b>
<b>Non-Controllable Expenses</b>

Sources: Treasury Department and Office of Management and Budget

The budget for fiscal year 2014 provides for total resources of \$15.985 billion, of which \$9.770 billion are General Fund resources. General Fund resources include \$245 million in deficit financing to be provided by GDB or third party lenders.

The principal changes in the fiscal year 2014 budgeted General Fund revenues compared to the fiscal year 2013 budget are accounted mainly by the projected collections from the Sales Tax (up \$208.0 million attributed mostly to the elimination of various exemptions to the application of the Sales Tax), corporate income tax (up \$466.0 million), withholding taxes on non-residents (down \$122.0 million), alcoholic beverage taxes (down \$6.0 million), excise taxes on motor vehicles and accessories (up \$32.0 million), projected increases in excise tax under Act 154 (up \$206 million), and personal income taxes (down \$19.0 million).

The budget for fiscal year 2014 provides for total expenditures of \$15.985 billion (of which \$9.770 billion correspond to the General Fund), consisting of \$4.637 billion for education, \$3.066 billion for welfare, \$1.673 billion for public safety and protection, and \$6.609 billion for other expenses, expecting a \$159 million year-end balance. The increase in proposed budget General Fund expenses for fiscal year 2014 totals \$688.0 million. The main drivers of this increase are incremental debt service, additional contributions to government employee retirement systems, increases in funding pursuant to the University of Puerto Rico appropriation formula due to legislation approved which changes the basis for formula calculation; and an increase in the budget to the Department of Education which operated partially during Fiscal Year 2013 with a non-recurring, carry-forward surplus reserve from prior fiscal years.

Proposed incremental debt service from the General Fund of \$59 million contemplates \$34 additional general obligation and \$19 additional in TRANS and other debt. Additional PBA debt service of \$171.3 million in order to reduce reliance on debt restructuring and \$40 million in certain municipal obligations previously payable from municipal share of the Sales Tax have not been categorized as debt, but have been included in each agency's budget.

Proposed incremental retirement system contributions from the General Fund of \$202 million includes proposed additional appropriations of \$120 million for increasing the liquidity and solvency of the Employees Retirement System, in excess of those appropriations provided for by Act 3 and an additional \$20 million for municipal retirees benefits; an additional \$46 million for the required 1% additional employer payroll contribution to the Employees Retirement System and the Teachers Retirement System pursuant to Act 114 and Act 116; an additional \$37 million to increase annuity payments for employees retired during Fiscal Year 2013 pursuant to Act 70; and net decrease of \$21 million payable from the General Fund for special laws payable to the Employees Retirement System and the Teachers Retirement System, after implementation of the 2013 pension reform under Act 3.

Proposed incremental appropriation to the Department of Education from the General Fund of \$120 million – net of higher rent payments to the PBA and other special appropriations—substitutes funding of Fiscal Year 2013 expenses which were partially funded by a non-recurring, carry-forward reserve of prior year surpluses totaling \$105 million; and which reinforces Commonwealth funding in light of declining levels of federal funding of approximately \$80 million. Proposed appropriations to the University of Puerto Rico increased \$77 million due to legislation which, among other changes, restored certain revenue sources which had been excluded by Act 7.

### **Differences between Budget and Basic Financial Statements**

Revenues and expenditures, as reported by the Treasury Department in its Basic Financial Statements, may differ substantially from resources and appropriations in the annual budget for a number of reasons, including the following:

(i) The budgetary accounts are on a cash basis, while financial statements prepared by the Treasury Department include accruals and other adjustments as required by government accounting standards.

(ii) Expenditures for current purposes in a particular fiscal year may include amounts appropriated for earlier periods but not previously expended or amounts not budgeted for a particular fiscal year, but expended during that year, and, conversely, may exclude amounts appropriated for such fiscal year but not expended until later periods.

(iii) Bonds are authorized by the Commonwealth in accordance with a four-year capital improvement program. Since bond sales are determined by bond market conditions and other factors, the amounts of bonds sold for these improvements are financed by advances from the General Fund to the Capital Projects Fund, which are later reimbursed from proceeds of bond or notes sales.

### **LITIGATION**

*General.* The Commonwealth is a defendant in numerous legal proceedings pertaining to matters incidental to the performance of routine governmental operations. Under Act No. 104 of June 25, 1955, as amended, persons are authorized to sue the Commonwealth only for causes of actions specified in said Act. The Commonwealth may be liable under Act 104 for damages up to a maximum amount of \$75,000, or \$150,000 if the suit involves actions for damages to more than one person or where a single injured party is entitled to several causes of action.

Under certain circumstances, as provided in Act No. 9 of November 26, 1975, as amended, the Commonwealth may provide its officers and employees, including directors of public corporations and government instrumentalities and mayors of the municipalities of the Commonwealth, with legal representation, as well as assume the payment of any judgment that may be entered against them. There is no limitation on the amount of the judgment that may be paid under the Act in cases before federal court, but in all other cases the Puerto Rico Secretary of Justice may determine whether, and to what extent, the Commonwealth will assume payment of such judgment.

With respect to pending and threatened litigation (5,282 cases) excluding the litigation mentioned in the following paragraphs, as of June 30, 2013, the Commonwealth is currently estimating \$2.7 billion for awarded and anticipated unfavorable judgments. Such amount represents the amount estimated at the time as a probable liability or a liability with a fixed or expected due date, which would require future available financial resources for its payment. The amounts claimed exceed \$7.6 billion; however, the ultimate specific liability cannot be presently determined, especially because of the nature of labor claims, where the awards for unpaid salaries are calculated by the agencies. The Commonwealth believes that most of the claims are excessive or frivolous, for which the ultimate liability compared with the amounts currently estimated would not be that significant.

*Recovery of Medicaid Funds.* The Commonwealth is a defendant in two lawsuits filed, one in Commonwealth court and one in the U.S. District Court for the District of Puerto Rico, by certain Federally Qualified Health Centers (“FQHC”) seeking to recover from the Commonwealth approximately \$800 million in Medicaid wraparound payments which the Department of Health failed to make since 1997, when the Commonwealth first became a participant in the Medicaid Program. Since the beginning of the case, the Commonwealth admitted the noncompliance with the WAP requirement and that the only controversy is the total amount owed. To that effect, and after several appeals, five partial judgments have been entered in this case. One of the aforementioned partial judgments is still pending appeal in the Commonwealth Court of Appeals. The approximate amounts owed under this judgment total \$110.38 million in favor of 16 centers and \$1.33 million owed to the Commonwealth by one of the centers.

At this time, there are four partial judgments that are final, having been denied appeal by the Puerto Rico Supreme Court, for a total amount of \$28,210,042.72. The court ordered the Commonwealth to budget these amounts for fiscal year 2013-2014, although partial payments may be made throughout the year according to the order’s specifications.

With respect to the federal case, in February 2005, the U.S. Court of Appeals (First Circuit) upheld a preliminary injunction issued by the U.S. District Court for the District of Puerto Rico requiring the Commonwealth to make Medicaid “wraparound” payments to the health centers. In December 2008, the U.S. Court of Appeals determined that the U.S. District Court erred when it vacated the preliminary injunction entered against two of the FQHCs and determined that the Department of Health had met its obligations to establish and implement a payment system for FQHCs in compliance with the federal Medicaid statute. The U.S. Court of Appeals reversed the District Court’s order vacating the preliminary injunction and remanded the case for further proceedings.

Recently, the Court entered a preliminary injunction as to the remaining 15 health centers, and granted a request by the Department of Health for Eleventh Amendment sovereign immunity. The plaintiff FQHCs immediately filed an appeal regarding the issue of Eleventh Amendment sovereign immunity.

Meanwhile, the Department of Health filed a counter appeal regarding the Court’s interpretation of certain components of the wraparound formula that must be used under the preliminary injunction to calculate wraparound payments owed to the plaintiffs. The Court has appointed a Special Master to receive the evidence and present recommendations on the amounts owed by the Commonwealth. Plaintiffs claim for a Prospective Payment System (PPS) for the

wraparound payments. In order to properly establish the PPS the parties are litigating the Base Rate of cost per visit for the computation of said payment. This base rate is submitted for the consideration of the Special Master and later a determination from the Court. The other issue before the Special Master and the Court is the eligible population upon which a payment of the costs is required by law.

The Department has already made approximately \$40 million in uncontested wraparound payments owed under the injunction. However, the Court granted the Department's request for a stay pending appeal regarding payment of an additional \$29 million that are owed under the Court's wraparound formula. This sum has already been consigned with the Court pending appeal or otherwise deposited in specially earmarked accounts, amount that must be increased by the Department close to the difference between the amounts owed under the Court's formula and the Department's formula since the consignment.

There are additional costs related to the litigations of both cases, in particular, those referring to the services of the Special Master Cesar Cintrón Vázquez, CPA, Esq. In the state case, the Commonwealth is responsible for the totality of the amounts billed as per the order of the court. In the federal case, the Commonwealth is responsible for half the amounts billed as per the order of the court.

As of June 30, 2013, this legal contingency has an estimated exposure of \$650 million.

*Special Education Students.* The Commonwealth is also a defendant in a class action initiated in 1980 by parents of special-education students before Commonwealth courts alleging that the Puerto Rico Department of Education had failed to provide legally required special education and related services. In February 2002, the court issued a judgment approving the stipulations reached by the parties regarding the manner special education services should be provided. Since December 2002, the Department of Education has paid fines for not complying with the stipulations reached. The fines were originally set in the amount of \$1,000 daily, and were raised to \$2,000 daily in January 2006. In February 8, 2010, the court issued a resolution advancing its intention to establish a new scheme of fines ranging from \$0.25 to \$0.75 daily per registered student. As of December 31, 2012, there were 121,339 students registered in the Special Education Program, but this number changes frequently since new claims are filed constantly. Said resolution also creates a new scheme of monitoring compliance with the stipulations, including the added participation of 12 experts (each party has the right to designate 2 experts) in 6 areas of expertise. Said monitoring scheme began on July 1, 2010.

The February 2002 judgment only disposed of the injunctive relief sought by plaintiffs. Still pending before the court are individual claims for damages regarding the failure to provide adequate services. In 2005, the Court of First Instance denied damages for the class as a whole. Plaintiffs appealed and, in October 2005, the Court of Appeals sustained the instance court, concluding that every member of the class must come forward and prove their individual damages within the case. The Commonwealth's strategy is to defend vigorously each case.

At the Commonwealth's request, the plaintiffs submitted a settlement offer. Settlement conversations stopped after the parties reached an impasse during negotiations.

As of June 30, 2013, this legal contingency has an estimated exposure of \$650 million.

*Police Institutional Reform.* The Commonwealth is a defendant in a lawsuit presented by the United States Department of Justice (“USDOJ”) alleging a pattern of civil rights violations and excessive use of force by the officers of the Police Department of Puerto Rico. In July 17, 2013, the parties signed a settlement agreement which include a deep institutional reform of the Police Department, to be implemented in the next 10 years.

Although the USDOJ’s claim does not include damages, the institutional reform will require an investment of at least \$600 million. The USDOJ is aware of the implementation costs, and it is willing to sign and submit a joint agreement providing that the Commonwealth allocate \$20 million in the first year and the USDOJ \$9-20 million, from the USDOJ Assets Forfeiture Fund, specifically, from the equitable sharing payments made to the Commonwealth of Puerto Rico for its assistance to the federal government in forfeiture cases. On July 17, 2013, the court entered a conditional judgment dismissing the claim, but retained jurisdiction to assure compliance through the Technical Compliance Advisor.

*Pension Reform.* As has been the case with each comprehensive pension reform measure enacted in the United States, certain public employees have brought suit challenging the constitutionality of pension reform in Puerto Rico.

As of May 14, 2013, the main case filed against Law 3 involved sixty-eight (68) employees of the Office of the Comptroller of the Commonwealth of Puerto Rico, who filed a Complaint on May 8, 2013, in the Commonwealth of Puerto Rico’s Court of First Instance, San Juan Part, alleging that Law 3 is unconstitutional as applied to them. The Complaint alleged that plaintiffs had certain acquired rights under Act 447 and that Law 3 violates the Contract Clause because, although the solvency of the System is a compelling state interest, the State has not shown that the enactment of the law was necessary to promote that interest, nor that there were not less onerous means to advance or achieve that interest.

The Commonwealth of Puerto Rico argued that the constitutional attack of Law 3 and the claims were meritless. By June 30, 2013, the Puerto Rico Supreme Court had upheld the constitutionality of Act 3 and all the related complaints were already dismissed and the appeals denied.

*Wage Claims.* The Commonwealth is also a defendant in a suit instituted in 2007 by over 3,000 employees from Department of Family, the Administration of Vocational Rehabilitation and the Administration of Juvenile Institutions claiming that wages in the total amount of \$85,000,000.00 are owed to them. The plaintiffs claim for loss of earnings due to the failure of compliance by the agency of the equal payment for equal work under different laws. The plaintiffs claim that they have been adversely affected by reason of the agencies failure to revise the scales of remuneration each time the federal minimum wage changed.

On July 10, 2007, the number of plaintiffs increased through an amended complaint that was filed. On July 20, 2007, the defendants filed a motion seeking dismissal of the complaint as amended. Said dismissal was denied. A second petition for summary judgment filed by defendants was also denied by the Court on May 12, 2012. The case is pending to be posted for pre-trial conference and trial.

As of June 30, 2013, this legal contingency has an estimated exposure of \$85 million plus an undetermined amount for interest.

*Other.* The Commonwealth and various component units are defendants in other lawsuits alleging violations of civil rights, breach of contract, and other damage claims. Preliminary hearings and discovery proceedings are in progress. No provision for any liability that may result upon adjudication of these lawsuits has been recognized by the Commonwealth. The Commonwealth believes that the ultimate liability, if any, would not be significant.
